AIGP Actual Test Answers - Trusted AIGP Exam Resource

An updated IAPP AIGP study material is essential for the best preparation for the IAPP AIGP exam and subsequently passing the IAPP AIGP test. Students may find study resources on many websites, but they are likely to be outdated. CramPDF resolved this issue by providing updated and real AIGP PDF Questions.

IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q13-Q18):

NEW QUESTION # 13
According to the EU AI Act, providers of what kind of machine learning systems will be required to register with an EU oversight agency before placing their systems in the EU market?

- A. AI systems that are harmful based on a legal risk-utility calculation.
- B. AI systems that are "strong" general intelligence.
- C. AI systems that are high-risk.
- D. AI systems trained on sensitive personal data.

Answer: C

Explanation:
According to the EU AI Act, providers of high-risk AI systems are required to register with an EU oversight agency before these systems can be placed on the market. This requirement is part of the Act's framework to ensure that high-risk AI systems comply

with stringent safety, transparency, and accountability standards.
High-risk systems are those that pose significant risks to health, safety, or fundamental rights. Registration with oversight agencies helps facilitate ongoing monitoring and enforcement of compliance with the Act's provisions. Systems categorized under other criteria, such as those trained on sensitive personal data or exhibiting "strong" general intelligence, also fall under scrutiny but are primarily covered under different regulatory requirements or classifications.

NEW QUESTION # 14
CASE STUDY
Please use the following answer the next question:
Good Values Corporation (GVC) is a U.S. educational services provider that employs teachers to create and deliver enrichment courses for high school students. GVC has learned that many of its teacher employees are using generative Al to create the enrichment courses, and that many of the students are using generative Al to complete their assignments.
In particular, GVC has learned that the teachers they employ used open source large language models ("LLM") to develop an online tool that customizes study questions for individual students. GVC has also discovered that an art teacher has expressly incorporated the use of generative Al into the curriculum to enable students to use prompts to create digital art.
GVC has started to investigate these practices and develop a process to monitor any use of generative Al, including by teachers and students, going forward.
Which of the following risks should be of the highest concern to individual teachers using generative Al to ensure students learn the course material?

- A. Model accuracy.
- B. Copyright infringement.
- C. Financial cost.
- D. Technical complexity.

Answer: A

Explanation:
The highest concern for individual teachers using generative AI to ensure students learn the course material is model accuracy. Ensuring that the AI-generated content is accurate and relevant to the curriculum is crucial for effective learning. If the AI model produces inaccurate or irrelevant content, it can mislead students and hinder their understanding of the subject matter.
Reference: According to the AIGP Body of Knowledge, one of the core risks posed by AI systems is the accuracy of the data and models used. Ensuring the accuracy of AI-generated content is essential for maintaining the integrity of the educational material and achieving the desired learning outcomes.

NEW QUESTION # 15
According to the EU Al Act, providers of what kind of machine learning systems will be required to register with an EU oversight agency before placing their systems in the EU market?

- A. Al systems that are harmful based on a legal risk-utility calculation.
- B. Al systems that are "strong" general intelligence.
- C. Al systems that are high-risk.
- D. Al systems trained on sensitive personal data.

Answer: C

Explanation:
According to the EU AI Act, providers of high-risk AI systems are required to register with an EU oversight agency before these systems can be placed on the market. This requirement is part of the Act's framework to ensure that high-risk AI systems comply with stringent safety, transparency,and accountabilitystandards. High- risk systems are those that pose significant risks to health, safety, or fundamental rights. Registration with oversight agencies helps facilitate ongoing monitoring and enforcement of compliance with the Act's provisions. Systems categorized under other criteria, such as those trained on sensitive personal data or exhibiting "strong" general intelligence, also fall under scrutiny but are primarily covered under different regulatory requirements or classifications.

NEW QUESTION # 16
All of the following may be permissible uses of an Al system under the EU Al Act EXCEPT?

- A. To implement social scoring.
- B. To promote equitable distribution of welfare benefits.
- C. To detect an individual's intent for law enforcement purposes.
- D. To manage border control.

Answer: A

Explanation:
The EU AI Act explicitly prohibits the use of AI systems for social scoring by public authorities, as it can lead to discrimination and unfair treatment of individuals based on their social behavior or perceived trustworthiness. While AI can be used to promote equitable distribution of welfare benefits, manage border control, and even detect an individual's intent for law enforcement purposes (within strict regulatory and ethical boundaries), implementing social scoring systems is not permissible under the Act due to the significant risks to fundamental rights and freedoms.

NEW QUESTION # 17
After initially deploying a third-party AI model, you learn the developer has released a new version.
As deployer of this third-party model, what should you do?

- A. Audit the model.
- B. Seek input from data scientists.
- C. Communicate necessary updates to your users.
- D. Retrain the model.

Answer: A

Explanation:
When anew versionof a third-party model is released, the deployer must ensure it still meets safety, performance, and compliance requirements - which calls for aformal audit.
From theAI Governance in Practice Report 2024:
"Any updates or changes to AI systems should trigger a re-evaluation to ensure continued compliance and performance." (p. 12)
"Post-market monitoring includes reassessing the impact of updated models or retraining." (p. 35)

NEW QUESTION # 18
.....

We will provide you with comprehensive study experience by give you AIGP free study material & IAPP exam prep torrent. The questions & answers from the IAPP practice torrent are all valid and accurate, made by the efforts of a professional IT team. The authority and validity of IAPP AIGP training practice are the guarantee for all the IT candidates. We arrange our experts to check the update every day. Once there is any new technology about AIGP Exam Dumps, we will add the latest questions into the AIGP study pdf, and remove the useless study material out, thus to ensure the AIGP exam torrent you get is the best valid and latest. So 100% pass is our guarantee.
