New AWS-Certified-Developer-Associate Real Exam | AWS-Certified-Developer-Associate Test Questions Vce

Though our AWS-Certified-Developer-Associate study guide has three formats which can meet your different needs, PDF version, software version and online version, i love the PDF version to the best. If you choose the PDF version, you can download our AWS-Certified-Developer-Associate exam material and print it for studying everywhere. And you can take notes on them as long

as any new thoughts come to you. If a new version of the AWS-Certified-Developer-Associate learning guide comes out, we will send you a new link to your E-mail box and you can download it again.

Amazon AWS Certified Developer Associate Exam (DVA-C02) Sample Questions (Q90-Q95):

NEW QUESTION # 90

A multinational organization has applications deployed in three different AWS regions. These applications must securely communicate with each other by VPN. According to the organization's security team, the VPN must meet the following requirements:

AES 128-bit encryption

SHA-1 hashing

User access via SSL VPN

PFS using DH Group 2

Ability to maintain/rotate keys and passwords

Certificate-based authentication

Which solution should you recommend so that the organization meets the requirements?

- A. AWS hardware VPN between the virtual private gateway and customer gateway
- B. A third-party VPN solution deployed from AWS Marketplace
- C. AWS hardware VPN between the virtual private gateways in each region
- D. A private MPLS solution from an international carrier

Answer: C

NEW QUESTION # 91

A user is running a MySQL RDS instance. The user will not use the DB for the next 3 months. How can the user save costs?

- A. Change the instance size to micro
- B. Pause the RDS activities from CLI until it is required in the future
- C. Stop the RDS instance
- D. Create a snapshot of RDS to launch in the future and terminate the instance now

Answer: D

Explanation:

The RDS instances unlike the AWS EBS backed instances cannot be stopped or paused. The user needs to take the final snapshot, terminate the instance and launch a new instance in the future from that snapshot.

NEW QUESTION # 92

Your company's policy requires that all VPCs peer with a "common services" VPC. This VPC contains a fleet of layer 7 proxies and an Internet gateway. No other VPC is allowed to provision an Internet gateway. You configure a new VPC and peer with the common service VPC as required by policy. You launch an Amazon EC2 Windows instance configured to forward all traffic to the layer 7 proxies in the common services VPC. The application on this server should successfully interact with Amazon S3 using its properly configured AWS Identity and Access Management (IAM) role. However, Amazon S3 is returning 403 errors to the application.

Which step should you take to enable access to Amazon S3?

- A. Configure a VPC endpoint for Amazon S3 in the same subnet as the instance.
- B. Exclude 169.254.169.0/24 from the instance's proxy configuration.
- C. Update the S3 bucket policy with the private IP address of the instance.

- D. Update the CORS configuration for Amazon S3 to allow traffic from the proxy.

Answer: D

NEW QUESTION # 93

A company has a web application that is hosted on Amazon EC2 instances. The EC2 instances are configured to stream logs to Amazon CloudWatch Logs. The company needs to receive an Amazon Simple Notification Service (Amazon SNS) notification when the number of application error messages exceeds a defined threshold within a 5-minute period. Which solution will meet these requirements?

- A. Rewrite the application code to stream application logs to Amazon SNS. Configure an SNS topic to send a notification when the number of errors exceeds the defined threshold within a 5-minute period.
- B. Install and configure the Amazon Inspector agent on the EC2 instances to monitor for errors. Configure Amazon Inspector to send an SNS notification when the number of errors exceeds the defined threshold within a 5-minute period.
- C. Configure a subscription filter on the CloudWatch Logs log group. Configure the filter to send an SNS notification when the number of errors exceeds the defined threshold within a 5-minute period.
- D. Create a CloudWatch metric filter to match the application error pattern in the log data. Set up a CloudWatch alarm based on the new custom metric. Configure the alarm to send an SNS notification when the number of errors exceeds the defined threshold within a 5-minute period.

Answer: D

Explanation:

* CloudWatch for Log Analysis: CloudWatch is the best fit here because logs are already centralized.

Here's the process:

* Metric Filter: Create a metric filter on the CloudWatch Logs log group. Design a pattern to specifically identify application error messages.

* Custom Metric: This filter generates a new custom CloudWatch metric (e.g., ApplicationErrors).

This metric tracks the error count.

* CloudWatch Alarm: Create an alarm on the ApplicationErrors metric. Configure the alarm with your desired threshold and a 5-minute evaluation period.

* SNS Action: Set the alarm to trigger an SNS notification when it enters the alarm state.

NEW QUESTION # 94

Which statements about DynamoDB are true? Choose 2 answers.

- A. DynamoDB restricts item access during writes.
- B. DynamoDB uses a pessimistic locking model.
- C. DynamoDB restricts item access during reads.
- D. DynamoDB uses conditional writes for consistency.
- E. DynamoDB uses optimistic concurrency control.

Answer: D,E

NEW QUESTION # 95

.....

Generally speaking, a satisfactory practice material should include the following traits. High quality and accuracy rate with reliable services from beginning to end. As the most professional group to compile the content according to the newest information, our AWS-Certified-Developer-Associate practice materials contain them all, and in order to generate a concrete transaction between us we take pleasure in making you a detailed introduction of our AWS-Certified-Developer-Associate practice materials. We would like to take this opportunity and offer you a best AWS-Certified-Developer-Associate practice material as our strongest items as

follows. Here are detailed specifications of our product.
