Die Schulungsunterlagen zur IAPP AIGP Zertifizierungsprüfung aus ZertPruefung sind nicht nur echt, sondern auch preiswert. Nach dem Kauf unserer Prüfungsmaterialien werden Sie einjährige Aktualisierung genießen. Sie können einen Teil von den kostenlosen originalen Fragen herunterladen, bevor Sie die Schulungsunterlagen zur IAPP AIGP Zertifizierungsprüfung aus ZertPruefung kaufen. Wenn Sie die IAPP AIGP Prüfung nicht bestehen oder die Schulungsunterlagen zur IAPP AIGP Zertifizierungsprüfung irgend ein Problem haben, geben wir Ihnen eine bedingungslose volle Rückerstattung.

IAPP AIGP Prüfungsplan:

Thema	Einzelheiten

Thema 1	<ul style="list-style-type: none"> • Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.
Thema 2	<ul style="list-style-type: none"> • Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.
Thema 3	<ul style="list-style-type: none"> • Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.
Thema 4	<ul style="list-style-type: none"> • Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.

AIGP Prüfungsguide: IAPP Certified Artificial Intelligence Governance Professional & AIGP echter Test & AIGP sicherlich-zu-bestehen

ZertPruefung ist eine erstklassige Website für die IAPP AIGP Zertifizierungsprüfung. Im ZertPruefung können Sie Tipps und Prüfungsmaterialien finden. Sie können auch die Examensfragen-und antworten teilweise als Probe kostenlos herunterladen. ZertPruefung kann Ihnen umsonst die Updaets der Prüfungsmaterialien für die IAPP AIGP Prüfung bieten. Alle unseren Zertifizierungsprüfungen enthalten Antworten. Unser Eliteteam von IT-Fachleuten wird die neuesten und richtigen Examenübungen nach ihren fachlichen Erfahrungen bearbeiten, um Ihnen bei der Prüfung zu helfen. Alles in allem, wir werden Ihnen alle einschlägigen Materialien in Bezug auf die IAPP AIGP Zertifizierungsprüfung bieten.

IAPP Certified Artificial Intelligence Governance Professional AIGP Prüfungsfragen mit Lösungen (Q115-Q120):

115. Frage

CASE STUDY

Please use the following to answer the next question:

A premier payroll services company that employs thousands of people globally, is embarking on a new hiring campaign and wants to implement policies and procedures to identify and retain the best talent. The new talent will help the company's product team expand its payroll offerings to companies in the healthcare and transportation sectors, including in Asia.

It has become time consuming and expensive for HR to review all resumes, and they are concerned that human reviewers might be

susceptible to bias.

To address these concerns, the company is considering using a third-party AI tool to screen resumes and assist with hiring. They have been talking to several vendors about possibly obtaining a third-party AI-enabled hiring solution, as long as it would achieve its goals and comply with all applicable laws.

The organization has a large procurement team that is responsible for the contracting of technology solutions. One of the procurement team's goals is to reduce costs, and it often prefers lower-cost solutions. Others within the company deploy technology solutions into the organization's operations in a responsible, cost-effective manner.

The organization is aware of the risks presented by AI hiring tools and wants to mitigate them. It also questions how best to organize and train its existing personnel to use the AI hiring tool responsibly. Their concerns are heightened by the fact that relevant laws vary across jurisdictions and continue to change.

All of the following are potential negative consequences created by using the AI tool to help make hiring decisions EXCEPT:

- A. Disparate impacts.
- B. Automation bias.
- C. Privacy violations.
- **D. Candidate quality.**

Antwort: D

Begründung:

Candidate quality is an intended positive outcome of using the AI tool, not a negative consequence; the other options represent common risks associated with AI hiring systems.

116. Frage

You are a privacy program manager at a large e-commerce company that uses an AI tool to deliver personalized product recommendations based on visitors' personal information that has been collected from the company website, the chatbot and public data the company has scraped from social media.

A user submits a data access request under an applicable US state privacy law, specifically seeking a copy of their personal data, including information used to create their profile for product recommendations.

What is the most challenging aspect of managing this request?

- A. Some of the visitor's data is synthetic data that the company does not have to provide to the data subject.
- B. The data subject's data is structured data that can be searched, compiled and reviewed only by an automated tool.
- C. The data subject is not entitled to receive a copy of their data because some of it was scraped from public sources.
- **D. Some of the data subject's data is unstructured data and you cannot untangle it from the other data, including information about other individuals.**

Antwort: D

Begründung:

Unstructured data that cannot be easily separated from information about other individuals makes fulfilling the data access request complex while ensuring privacy for others.

117. Frage

The use of paid generative AI public tools is appealing because? (Choose three.)

- **A. They have additional privacy and security controls.**
- **B. They are convenient to adopt.**
- C. They eliminate concerns about the data used to generate outputs.
- **D. They have frequent enhancements of new features.**
- E. They provide transparency in models and in decision-making.

Antwort: A,B,D

Begründung:

Paid generative AI tools are appealing because they are convenient to adopt, often include enhanced privacy and security controls, and receive frequent feature updates.

118. Frage

WonderTemp, a temporary staffing company, terminated most of its employees after implementing a virtual assistant to help write emails, policies and marketing materials, and answer client questions. Three months later, WonderTemp learns that four of its biggest clients are not renewing their contracts because the work product from WonderTemp is full of inaccuracies. Based on these facts, what type(s) of harm has WonderTemp suffered as a result of their reliance on the virtual assistant?

- A. Disinformation and reportable harm.
- **B. Economic and reputational harm.**
- C. Individual and societal harm.
- D. Legal and regulatory harm.

Antwort: B

119. Frage

MULTI-SELECT

Please select 3 of the 5 options below. No partial credit will be given.

What are the roles and responsibilities of deployers of a proprietary model?

- **A. Technical performance.**
- B. Ethical design.
- **C. Regulatory compliance.**
- **D. Ethical testing.**
- E. System documentation.

Antwort: A,C,D

Begründung:

Deployers of proprietary models are not responsible for design, but they are accountable for how the system performs in their context of use, including ensuring ethical behavior, performance, and legal compliance.

From the AI Governance in Practice Report 2025:

"Deployers of AI systems must take reasonable steps to ensure that systems are used ethically, perform safely, and align with applicable laws and standards." (p. 11-12)

"Operational governance... includes performance monitoring protocols, incident management plans, and regulatory oversight." (p. 12) Thus:

- * #A. Ethical testing- Required to mitigate misuse and unintended harms.
- * #B. Ethical design- Belongs to developers/providers, not deployers.
- * #C. Technical performance- Deployers must ensure that AI performs as expected.
- * #D. System documentation- This is the provider's obligation.
- * #E. Regulatory compliance- Deployers must ensure system use complies with applicable laws.

120. Frage
