

Microsoft Cybersecurity Architect Test Engine & SC-100 Free Pdf & Microsoft Cybersecurity Architect Actual Exam

The screenshot shows the Microsoft Certified: Cybersecurity Architect Expert certification overview. It includes sections for 'Who is this certification for?', 'Prerequisite', 'Exam details', 'Certification', and 'Products featured'. The 'Who is this certification for?' section describes the Microsoft cybersecurity architect as having subject matter expertise in designing and evolving an organization's cybersecurity strategy to protect its mission and business processes across all aspects of their enterprise architecture. The 'Prerequisite' section lists four certification options: Security Operations Analyst Associate (OS), Security and Privacy Administrator Associate (DP), Azure Security Engineer Associate (DR), and Security Administrator Associate (DA). The 'Exam details' section specifies the exam is SC-100: Microsoft Cybersecurity Architect. The 'Certification' section shows a 'Pass certification exam SC-100' button and a 'Get this certification' badge. The 'Products featured' section lists Microsoft Azure, Azure Active Directory, Microsoft Defender for Cloud, Microsoft Sentinel, and Microsoft 365 Defender.

Eliminates confusion while taking the Microsoft SC-100 certification exam. Prepares you for the format of your SC-100 exam dumps, including multiple-choice questions and fill-in-the-blank answers. Comprehensive, up-to-date coverage of the entire Microsoft Cybersecurity Architect (SC-100) certification curriculum. Microsoft SC-100 practice questions are based on recently released SC-100 exam objectives.

Microsoft SC-100, also known as the Microsoft Cybersecurity Architect exam, is designed to validate the skills and knowledge of professionals in the field of cybersecurity architecture. SC-100 exam focuses on assessing the candidate's ability to design and implement secure computing solutions using Microsoft technologies. SC-100 exam covers various topics such as security principles, identity and access management, threat protection, information protection, and data governance.

Microsoft SC-100 Exam is an essential certification for those who are interested in pursuing a career in cybersecurity. Microsoft Cybersecurity Architect certification demonstrates to potential employers that the candidate possesses the necessary knowledge and skills to design and implement secure solutions to protect against cyber threats. The Microsoft SC-100 Exam provides an excellent foundation for further cybersecurity certifications and is an excellent starting point for those who are new to the field of cybersecurity.

Pass Guaranteed Quiz 2026 Microsoft SC-100 Marvelous Free Dumps

Nobody wants to be stranded in the same position in his or her company and be a normal person forever. Maybe you want to get the SC-100 certification, but daily work and long-time traffic make you busier to improve yourself. There is a piece of good news for you. Thanks to our SC-100 Training Materials, you can learn for your SC-100 certification anytime, everywhere. With our SC-100 study materials, you will easily pass the SC-100 examination and gain more confidence. Now let's see our products together.

Microsoft Cybersecurity Architect Sample Questions (Q280-Q285):

NEW QUESTION # 280

You are designing a ransomware response plan that follows Microsoft Security Best Practices.

You need to recommend a solution to minimize the risk of a ransomware attack encrypting local user files.

What should you include in the recommendation?

- A. Windows Defender Device Guard
- B. BitLocker Drive Encryption (BitLocker)
- C. Azure Files
- D. **protected folders**
- E. Microsoft Defender for Endpoint

Answer: D

NEW QUESTION # 281

Your company is developing a serverless application in Azure that will have the architecture shown in the following exhibit.

□ You need to recommend a solution to isolate the compute components on an Azure virtual network. What should you include in the recommendation?

- A. Azure service endpoints
- B. an Azure Active Directory (Azure AD) application proxy
- **C. an Azure App Service Environment (ASE)**
- D. Azure Active Directory (Azure AD) enterprise applications

Answer: C

Explanation:

App Service environments (ASEs) are appropriate for application workloads that require:

Very high scale, Isolation and secure network access, High memory utilization. This capability can host your:

Windows web apps, Linux web apps

Docker containers, Mobile apps

Functions

<https://docs.microsoft.com/en-us/azure/app-service/environment/overview>

NEW QUESTION # 282

You have an on-premises datacenter and an Azure Kubernetes Service (AKS) cluster named AKS1.

You need to restrict internet access to the public endpoint of AKS 1. The solution must ensure that AKS1 can be accessed only from the public IP addresses associated with the on-premises datacenter.

What should you use?

- A. a network security group (N5G)
- **B. an authorized IP range**
- C. a private endpoint
- D. a service endpoint

Answer: B

NEW QUESTION # 283

Your company is preparing for cloud adoption.

You are designing security for Azure landing zones.

Which two preventative controls can you implement to increase the secure score? Each NOTE: Each correct selection is worth one point.

- A. Microsoft Sentinel
- B. Microsoft Defender for Cloud alerts
- **C. Azure Web Application Firewall (WAF)**
- **D. Azure Firewall**
- E. Azure Active Directory (Azure AD Privileged Identity Management (PIM))

Answer: C,D

Explanation:

<https://docs.microsoft.com/en-us/azure/defender-for-cloud/secure-score-security-controls>

NEW QUESTION # 284

You have a multicloud environment that contains an Azure subscription, an Amazon Web Services (AWS) subscription, and a Google Cloud Platform (GCP) subscription.

You plan to assess data security and compliance.

You need to design a Compliance Manager solution that meets the following requirements:

- Provides recommended improvement actions that include detailed implementation guidance
- Automatically monitors regulatory compliance
- Minimizes administrative effort

What should you include in the solution?

- A. Microsoft Sentinel
- B. Compliance Manager connectors
- **C. Microsoft Defender for Cloud**
- D. Microsoft Defender for Cloud Apps

Answer: C

Explanation:

Microsoft Purview, Configure cloud settings for use with Compliance Manager Compliance Manager integrates with Microsoft Defender for Cloud to provide multicloud support.

Organizations must have at least one subscription within Microsoft Azure and then enable Defender for Cloud so that Compliance Manager can receive the necessary signals to monitor your cloud services. Once you have Defender for Cloud, you need to assign the relevant industry and regulatory standards to your subscriptions.

View available environments

1. In Defender for Cloud, select Environment settings on the left navigation.
2. View the available environments and subscriptions currently visible to MDC for your tenant.

You may need to expand your management groups to view subscriptions, which you can do by selecting Expand all below the search bar. In addition to your Azure subscriptions, you'll also see any Google Cloud Platform (GCP) projects or Amazon Web Services (AWS) accounts connected to Defender for Cloud.
