Learning is just a part of our life. We do not hope that you spend all your time on learning the Plat-Admn-202 certification materials. Life needs balance, and productivity gives us a sense of accomplishment and value. So our Plat-Admn-202 real exam dumps have simplified your study and alleviated your pressure from study. It is our goal that you study for a short time but can study efficiently. At present, thousands of candidates have successfully passed the Plat-Admn-202 Exam with less time input. In fact, there is no point in wasting much time on invalid input. As old saying goes, all work and no play makes jack a dull boy. Our Plat-Admn-202 certification materials really deserve your choice. Contact us quickly. We are waiting for you.

Salesforce Plat-Admn-202 Exam Syllabus Topics:

Topic	Details
Topic 1	• User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.
Topic 2	• Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.
Topic 3	• App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.

Topic 4	• Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.
Topic 5	• Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.

Salesforce Certified Platform App Builder Study Training Dumps Grasp the Core Knowledge of Plat-Admn-202 Exam - PassExamDumps

The chance of making your own mark is open, and only smart one can make it. We offer Plat-Admn-202 exam materials this time and support you with our high quality and accuracy Plat-Admn-202 learning quiz. Comparing with other exam candidates who still feel confused about the perfect materials, you have outreached them. So it is our sincere suggestion that you are supposed to get some high-rank practice materials like our Plat-Admn-202 Study Guide.

Salesforce Certified Platform App Builder Sample Questions (Q84-Q89):

NEW QUESTION # 84
DreamHouse Realty (DR) has many properties for sale and wants to identify the highest value of all Offer__c records on each Property__c record.
What solution should the app builder use to meet DreamHouse Realty's needs?

- A. Multi-select Picklist
- B. Text Area (Long)
- C. Master-Detail Child Object
- D. Lookup Object

Answer: C

Explanation:
The solution that the app builder should use to meet DreamHouse Realty's needs is Master-Detail Child Object. A master-detail relationship can be used to create a parent-child relationship between two objects, where the child records inherit the sharing and security settings of their parent record. The app builder can create a roll-up summary field on the parent object to calculate the highest value of all child records. Option B is incorrect because Text Area (Long) is a field type that allows users to enter up to 131,072 characters on one line, which is not suitable for this requirement. Option C is incorrect because Multi-select Picklist is a field type that allows users to select multiple values from a predefined list, which is not suitable for this requirement. Option D is incorrect because Lookup Object is not a valid term, but rather Lookup Relationship, which is a type of relationship that links two objects together, but does not support roll-up summary fields.

NEW QUESTION # 85
A business user wants a quick way to edit a record's status and enter a custom due date field from the record's feed in Salesforce Mobile App.
What should be used to accomplish this?

- A. Custom URL formula Field
- B. Custom quick access link
- C. Custom action
- D. Custom button

Answer: C

Explanation:
To allow quick editing of a record's status and entering a due date from the record's feed in the Salesforce Mobile App:
A . Custom action. This option enables users to perform specific tasks directly from the record page in the Salesforce Mobile App, such as editing fields.
Steps to create a custom action:
Navigate to Setup → Object Manager → select the relevant object.
Click Buttons, Links, and Actions → New Action.
Set Action Type to 'Update a Record'.
Configure the action layout to include the Status and Custom Due Date fields.
Add the action to the Salesforce Mobile layout.
This setup provides an efficient way for users to update key fields without navigating away from the record feed.
For detailed setup instructions, see Salesforce's documentation on Creating Quick Actions.

NEW QUESTION # 86
Universal Containers (UC) wants to test code against a subset of production data that is under 5 GB. Additionally, UC wants to refresh this sandbox every weekend.
Which type of sandbox should be used to accomplish this?

- A. Partial Copy
- B. Developer Pro
- C. Full Copy
- D. Developer

Answer: A

Explanation:
To test code against a subset of production data under 5 GB and to refresh the sandbox environment weekly, the most suitable type of sandbox is:
Partial Copy (B). A Partial Copy sandbox includes a copy of your production org's metadata and a subset of your production data as defined by the sandbox template. It allows up to 5 GB of data and can be refreshed every 5 days, making it ideal for scenarios where a representative sample of production data is needed for testing without the storage and refresh limitations of a Full Copy sandbox.
Developer Pro (A) and Developer (D) sandboxes also allow for testing and development but do not include a subset of production data-they either have no data or only limited sample data. A Full Copy sandbox (C) provides a full replica of production data, far exceeding the 5 GB requirement and generally is refreshed less frequently due to larger data volume and longer copy times.
Reference for sandbox types and their capabilities:
Sandbox Types and Templates: https://help.salesforce.com/articleView?id=sf.data_sandbox_implementation_tips.htm&type=5

NEW QUESTION # 87
A sales rep at AW Computing is unable to find what they are looking for while scrolling through their Chatter feed.
How can a filter be utilized to show only posts from their key account and opportunity records?

- A. Create a Chatter group.
- B. Create a Chatter notification.
- C. Create a Chatter stream.
- D. Create Chatter bookmarks

Answer: C

Explanation:
Create a Chatter stream. This is correct because a Chatter stream allows users to follow multiple records and people in one feed, and filter the feed by selecting a stream.

NEW QUESTION # 88

An app Builder creates an Account validation rule on the Industry field that will throw an error if the length of the field is longer than 6 characters. Another App Builder creates a workflow rule with a field update that sets the Industry field to Technology whenever the Billing City field is set to San Francisco. What will happen the next time a sales person saves an Account with a Billing City of San Francisco?

- A. The record will not save and no error message will be displayed
- B. The record will save but the Industry field will not change to Technology
- C. The record will save and the Industry field will change to Technology
- D. The record will not save and the validation rule's error messagewill be displayed

Answer: D

Explanation:
The record will not save and the validation rule's error message will be displayed because the field update will violate the validation rule. The validation rule will prevent the record from being saved if the Industry field is longer than 6 characters, and Technology is 10 characters long.

NEW QUESTION # 89

......

The Plat-Admn-202 practice exam we offered is designed with the real questions that will help you in enhancing your knowledge about the Plat-Admn-202 certification exam. Our online test engine will improve your ability to solve the difficulty of Plat-Admn-202 Real Questions and get used to the atmosphere of the formal test. Our experts created the valid Plat-Admn-202 study guide for most of candidates to help them get good result with less time and money.
