Salesforce Certified Sharing and Visibility Architect certification is recognized as the highest level of expertise in the field of Salesforce sharing and visibility, and it is specifically designed to validate the skills and knowledge required to design and implement enterprise-level sharing and visibility solutions.

## Salesforce Certified Sharing and Visibility Architect Sample Questions (Q27-

## Q32):

### NEW QUESTION # 27

Universal Containers has enabled External Default Sharing and wants to allow for external users to have the External Sharing Default set to Public Read-Only for a custom object. Which two options are valid Internal Default sharing settings for the custom object?

- A. Public Read Only
- B. Private
- C. Public Read/Write
- D. Controlled by Parent

**Answer: A,C**

### NEW QUESTION # 28

Universal Containers wants to create a way to store sensitive Invoice Data in Salesforce. A User who owns an Account should not see every Invoice, but only invoices that they or their subordinates own. Which two features should be considered during this solution implementation?

Choose 2 answers.

- A. Deploy the Relationship between Accounts and the Invoices Object as Master-Detail.
- B. Ensure that the Organization-Wide Default sharing for Invoices is set to Private.
- C. Create a Workflow that populates the Invoice sharing object upon Insert.
- D. Deploy the Relationship between Accounts and the Invoices Object as Lookup.

**Answer: A,B**

### NEW QUESTION # 29

Universal Containers requested to leverage Lightning Web Components (LWC) to improve support reps' user experience. LWC will be used as view layer, and Apex classes will have the business logic.

Which attention points should the development team consider when implementing this solution?

- A. Create test classes including runAs to test different users accessing the data.
- B. Once that Apex runs on system mode, the development team needs to enforce record visibility.
- C. Use isSharesble, isEditable, and isCreatable to enforce field permissions.

**Answer: B**

### NEW QUESTION # 30

Universal Containers has implemented Customer Community with Customer Community Plus licenses for its distributors. Some distributors requested granting specific community users (agents) to view cases submitted by other agents of the same distributor. Which feature only supports these requirements?

- A. Partner super user
- B. Permission set to grant community admin permission
- C. Delegate external user

**Answer: A**

### NEW QUESTION # 31

Sales reps at Universal Containers sometimes create large files as a part of the sales process that are too large to share over email. They would like users to be able to share files with customers, but the CISO has requested that any file links shared must be password-protected.

How can this be accomplished?

- A. Set up an Experience Cloud site for customers to access files and share the file with customers via Chatter. Customers can then log in to the site to access the content.

- B. Create a content delivery; during creation, the user should select the option to require 3 password to access content.
- C. Utilize an AppExchange product for delivering password protected files to customers

**Answer: B**

Explanation:

Content Delivery is a Salesforce feature designed for secure file sharing. When creating a content delivery, users can require a password for access, ensuring compliance with the CISO's requirement.

\* Option A: While AppExchange products could provide similar functionality, Salesforce's native Content Delivery feature already meets the requirement without additional cost or complexity.

\* Option B (Correct): Content Delivery allows the sharing of files via secure, password-protected links.

\* Option C: Setting up an Experience Cloud site is an excessive and unnecessary solution for this simple file-sharing requirement.
