It is known to us that the 21st century is an information era of rapid development. Now the people who have the opportunity to gain the newest information, who can top win profit maximization. In a similar way, people who want to pass AD0-E117 exam also need to have a good command of the newest information about the coming exam. However, it is not easy for a lot of people to learn more about the information about the study materials. Luckily, the AD0-E117 exam dumps from our company will help all people to have a good command of the newest information. Because our company have employed a lot of experts and professors to renew and update the AD0-E117 test training guide for all customer in order to provide all customers with the newest information. If you also choose the AD0-E117 study questions from our company, we can promise that you will have the chance to enjoy the newest information provided by our company.

Adobe Experience Manager Architect Master Sample Questions (Q39-Q44):

NEW QUESTION # 39

A client wants to change how they publish their content. Refer to the following client business requirements:

- * The client has a seasonal business that has significant content changes across their site that need to be rolled out at once based on the season change over date.
- * The content authors need to be able to work one season in advance of publish dates to ensure that all changes can be completed on time.
- * The content authors need a way to indicate that all the seasonal changes are ready. If the content changes are not completed, then the pages should not get published.
- * The content authors need the ability to modify the current live pages without rolling back changes for a future content rollout.

What approach should the Architect recommend?

- A. Use Launches inside of AEM for each new season and use the production ready flag to show changes are completed.
- B. Use the Versioning feature when editing a page to toggle and publish changes when ready.
- C. Use the Manage Publication with scheduling value set to the season change over date when changes are completed.
- D. Create a Project inside of AEM for each new season and create a task for notifying that changes are completed.

Answer: A

Explanation:

"using Launches inside of AEM for each new season can allow content authors to work on future content changes without affecting the current live pages and use the production ready flag to indicate when changes are completed".

NEW QUESTION # 40

A customer wants to migrate their AEM environment from an on-premise infrastructure to a public cloud to improve performance. The customer currently hosts many assets (images, videos, documents) in the DAM.

Approximately 10 business users frequently upload new assets and update existing assets. Editors then use these assets on the sites. What should an Architect do as part of this migration?

- A. Set up Connected Assets to share the DAM assets in the sites
- B. Run online revision cleanup before moving to the new storage format
- C. Set up a horizontally scalable AEM environment on MongoDB
- D. Move to a shared datastore and enable binary less replication

Answer: B

Explanation:

"running online revision cleanup before moving to the new storage format can reduce the size of the repository and improve performance".

NEW QUESTION # 41

A customer has a requirement to allow authors to access AEM with single sign-on. To achieve this an Architect needs to integrate AEM with the customer's identity management system.

Which two actions could an Architect take to meet this requirement? (Choose two.)

- A. Implement a custom JAAS Login Module
- B. Implement the generic SSO Authentication Handler interface
- C. Configure the generic SSO Authentication Handler
- D. Configure the SAML Authentication Handler
- E. Configure the Sling Authentication Requirements for the OSGi HTTP Service

Answer: B,C

Explanation:

"implementing and configuring the generic SSO Authentication Handler interface can enable single sign-on integration with an identity management system".

NEW QUESTION # 42

An AEM customer is designing a new website. The design shows that images are very prominent on the website but there is a

concern about the big variety of aspect ratios used. Images can potentially be used on different places and components on the website. The customer is looking for a maintainable solution to limit the amount of content editing work when adding the assets to the pages.

Which solution should an Architect recommend?

- A. Use inline cropping feature of the image component on the pages
- B. Use the cropping feature on the asset in the AEM DAM
- C. Integrate with Dynamic Media (Scene 7) and enable smart cropping
- **D. Integrate with Dynamic Media (Scene 7) and enable smart imaging**

Answer: D

Explanation:

"integrating with Dynamic Media (Scene 7) and enabling smart imaging can optimize the image delivery for different devices and screen sizes without requiring manual cropping".

NEW QUESTION # 43

A client's site does not show the latest page content for some site visitors. The client has two data centers with each configured with a Dispatcher connected to two Publish machines. The site load issue only occurs intermittently for visitors from one of the data centers.

Which step should the Architect take to resolve the issue?

- A. Review the log files on the Author instances to determine if there are any template errors
- B. Check the Publish instance(s) attached to the Dispatcher associated to the impacted data center
- **C. Check the SSL certificate on the impacted data center's load balance.**
- D. Disable caching on all impacted data centers Dispatchers to force the Publish machines to serve the page content

Answer: C

NEW QUESTION # 44

.....
