P.S. Free 2026 Cisco 300-710 dumps are available on Google Drive shared by Real4exams: https://drive.google.com/open?id=1k_CbBUxe-wgozMW7AlmkPmUZa0_xobW5

The 300-710 exam questions are being offered in three different formats. The names of these formats are Securing Networks with Cisco Firepower (300-710) desktop practice test software, web-based practice test software, and PDF dumps file. The Cisco desktop practice test software and web-based practice test software both give you real-time Cisco 300-710 Exam environment for quick and complete exam preparation.

Cisco Firepower is a suite of advanced security products that provide comprehensive network protection against a wide range of threats, including malware, viruses, and other forms of cyber-attacks. The Cisco 300-710 exam focuses on the specific features and functionality of Cisco Firepower, including its advanced threat detection and prevention capabilities.

Cisco 300-710 certification exam is a vendor-specific certification offered by Cisco Systems. Securing Networks with Cisco Firepower certification exam is part of the Cisco Certified Network Professional Security (CCNP Security) certification track. By passing 300-710 Exam, candidates will earn the CCNP Security certification, which is recognized globally and highly valued by employers. Additionally, the CCNP Security certification validates that a candidate has the knowledge and skills to secure networks using industry-leading Cisco Firepower technology.

The Securing Networks with Cisco Firepower certification exam consists of 60-70 multiple-choice and multiple-answer questions, and candidates have 90 minutes to complete the exam. 300-710 Exam Tests the candidates' knowledge of Cisco Firepower NGFW concepts, architecture, deployment, and management, as well as their ability to configure and troubleshoot Cisco Firepower NGFW features such as access control, intrusion prevention, network analysis, and malware protection. Candidates who pass the exam will earn the Cisco Certified Network Professional Security (CCNP Security) certification, which is a globally recognized credential that demonstrates their expertise in securing Cisco networks using advanced security technologies.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q361-Q366):

NEW QUESTION # 361

A VPN administrator converted an instance of Cisco Secure Firewall Threat Defense, which is managed by Cisco Secure Firewall Management Center, from using LDAP to LDAPS for remote access VPN authentication. Which certificate must be added to allow for remote users to authenticate over the VPN?

- A. LDAPS server certificate must be added to Secure Firewall Management Center realms.
- B. Secure Firewall Management Center certificate must be added to the LDAPS server.
- C. Secure Firewall Threat Defense certificate must be added to the LDAPS server.
- **D. LDAPS server certificate must be added to Secure Firewall Threat Defense.**

Answer: D

NEW QUESTION # 362

An engineer is configuring a multidomain instance of Cisco Secure Firewall Management Center. The instance must be integrated with Cisco Secure Endpoint. What must the engineer configure to allow multiple domains to have hosts with the same IP-MAC address pairs?

- A. second-level domain
- B. subdomain
- C. global domain
- **D. leaf domain**

Answer: D

NEW QUESTION # 363

An engineer is configuring a Cisco Secure Firewall Threat Defense device and wants to create a new intrusion rule based on the detection of a specific pattern in the data payload for a new zero-day exploit. Which keyword type must be used to add a Line that identifies the author of the rule and the date it was created?

- A. gtp_info
- **B. metadata**
- C. reference
- D. content

Answer: B

Explanation:

When creating a new intrusion rule in a Cisco Secure Firewall Threat Defense (FTD) device, the keyword type "metadata" must be used to add a line that identifies the author of the rule and the date it was created.

The metadata keyword is used to store additional information about the rule, such as authorship and creation date.

Steps:

* In FMC, navigate to Policies > Intrusion > Rules.

* Create a new rule or edit an existing one.

* Use the "metadata" keyword to add information about the author and date.

Example:

metadata: created_at 2023-06-15, author "John Doe";

By using the metadata keyword, you ensure that the rule contains relevant information for tracking its creation and authorship, which is essential for maintaining rule documentation and accountability.

NEW QUESTION # 364

An engineer must export a packet capture from Cisco Secure Firewall Management Center to assist in troubleshooting an issue on a Secure Firewall Threat Defense device. When the engineer navigates to the URL for Secure Firewall Management Center at: <https://capture/CAP/pcap/sample.pcap>

The engineer receives a 403: Forbidden error instead of being provided with the PCAP file. Which action resolves the issue?

- A. Enable HTTPS in the device platform policy.
- B. Disable the HTTPS server and use HTTP.
- C. Disable the proxy setting on the client browser.
- D. Enable the proxy setting in the device platform policy.

Answer: A

NEW QUESTION # 365

How many report templates does the Cisco Firepower Management Center support?

- A. 0
- B. 1
- C. unlimited
- D. 2

Answer: C

NEW QUESTION # 366
