100% Pass 2026 FCP_FSM_AN-7.2: FCP - FortiSIEM 7.2 Analyst–Valid Printable PDF

What's more, part of that SureTorrent FCP_FSM_AN-7.2 dumps now are free: https://drive.google.com/open?id=1BNhiKt8Xu3xUqH-PJrjJPssJ5HcvrmDo

As a reliable company providing professional IT certificate exam materials, we not only provide quality guaranteed products for FCP_FSM_AN-7.2 exam software, but also offer high quality pre-sale and after-sale service. Our online service will give you 24/7 online support. If you have any question about FCP_FSM_AN-7.2 exam software or other exam materials, or any problem about how to purchase our products, you can contact our online customer service directly. Besides, during one year after you purchased our FCP_FSM_AN-7.2 Exam software, any update of FCP_FSM_AN-7.2 exam software will be sent to your mailbox the first time.

If you choose to buy the SureTorrent's raining plan, we can make ensure you to 100% pass your first time to attend Fortinet Certification FCP_FSM_AN-7.2 Exam. If you fail the exam, we will give a full refund to you.

100% Pass Fortinet - FCP_FSM_AN-7.2 Authoritative Printable PDF

Many people may worry that the FCP_FSM_AN-7.2 guide torrent is not enough for them to practice and the update is slowly. We guarantee you that our experts check whether the FCP_FSM_AN-7.2 study materials is updated or not every day and if there is the

update the system will send the update to the client automatically. So you have no the necessity to worry that you don't have latest FCP_FSM_AN-7.2 Exam Torrent to practice. We provide the best service to you and hope you are satisfied with our product and our service.

Fortinet FCP_FSM_AN-7.2 Exam Syllabus Topics:

Topic	Details
Topic 1	• Machine learning, UEBA, and ZTNA: This section of the exam measures the skills of Advanced Security Architects and covers the integration of modern security technologies. It involves performing configuration tasks for machine learning models, incorporating UEBA (User and Entity Behavior Analytics) data into rules and dashboards for enhanced threat detection, and understanding how to integrate ZTNA (Zero Trust Network Access) principles into security operations.
Topic 2	• Rules and subpatterns: This section of the exam measures the skills of SOC Engineers and focuses on the construction and implementation of analytics rules. It involves identifying the different components that make up a rule, utilizing advanced features like subpatterns and aggregation, and practically configuring these rules within the FortiSIEM platform to detect security events.
Topic 3	• Incidents, notifications, and remediation: This section of the exam measures the skills of Incident Responders and encompasses the entire incident management lifecycle. This includes the skills required to manage and prioritize security incidents, configure policies for alert notifications, and set up automated remediation actions to contain and resolve threats.
Topic 4	• Analytics: This section of the exam measures the skills of Security Analysts and covers the foundational techniques for building and refining queries. It focuses on creating searches from events, applying grouping and aggregation methods, and performing various lookup operations, including CMDB and nested queries to effectively analyze and correlate data.

Fortinet FCP - FortiSIEM 7.2 Analyst Sample Questions (Q10-Q15):

NEW QUESTION # 10
What are two required components of a rule? (Choose two.)

- A. Exception policy
- B. Clear policy
- C. Subpattern
- D. Detection Technology

Answer: C,D

Explanation:
A Subpattern defines the specific conditions or event patterns the rule is designed to detect, and the Detection Technology specifies the type of detection logic (e.g., real-time, historical). Both are essential for a rule to function in FortiSIEM.

NEW QUESTION # 11
How does FortiSIEM update the incident table if a performance rule triggers repeatedly?

- A. FortiSIEM generates a new incident based on the Rule Frequency value, and updates the First Seen and Last Seen timestamps.
- B. FortiSIEM generates a new incident each time the rule triggers, and updates the First Seen and Last Seen timestamps.
- C. FortiSIEM updates the Incident Count value and Last Seen timestamp.
- D. FortiSIEM changes the incident status to Repeated, and updates the Last Seen timestamp.

Answer: C

Explanation:
When a performance rule triggers repeatedly, FortiSIEM updates the existing incident by incrementing the Incident Count and

refreshing the Last Seen timestamp. This avoids flooding the incident table with duplicates while still tracking repeated occurrences.

NEW QUESTION # 12
Refer to the exhibit.
How was this incident cleared?

- A. The endpoint was rebooted and sent an all-clear signal to FortiSIEM.
- B. The analyst manually cleared the incident from the incident table.
- C. FortiSIEM cleared the incident automatically after 24 hours.
- D. The incident was cleared automatically by the rule.

Answer: D

Explanation:
The Incident Status shows "Auto Cleared", and the Cleared Reason states: "Rule has not been triggered for 20 minutes." This indicates that the incident was automatically cleared by the rule logic after a defined period of inactivity.

NEW QUESTION # 13
Refer to the exhibit.
An analyst is trying to generate an incident with a title that includes the Source IP, Destination IP, User, and Destination Host Name. They are unable to add a Destination Host Name as an incident attribute.
What must be changed to allow the analyst to select Destination Host Name as an attribute?

- A. The Destination Host Name must be added as an Event type in the FortiSIEM.
- B. The Destination IP Event Attribute must be removed.
- C. The Destination Host Name must be set as an aggregate item in a subpattern.
- D. The Destination Host Name must be selected as a Triggered Attribute.

Answer: D

Explanation:
For an attribute like Destination Host Name to be used in the incident title, it must first be included in the Triggered Attributes list. Only attributes listed there are available for substitution in the title template (e.g., $destIpAddr, $srcIpAddr).

NEW QUESTION # 14
What can you use to send data to FortiSIEM for user and entity behavior analytics (UEBA)?

- A. FortiSIEM worker
- B. FortiSIEM agent
- C. SNMP
- D. SSH

Answer: B

Explanation:
The FortiSIEM agent can be used to send detailed endpoint data such as user activity and process behavior to FortiSIEM, which is essential for performing User and Entity Behavior Analytics (UEBA).

NEW QUESTION # 15
