

Latest Test Oracle 1z0-1075-25 Simulations & Valid 1z0-1075-25 Vce Dumps

Oracle 1Z0-1075-25 Oracle Manufacturing Cloud 2025 Implementation Professional QUESTION & ANSWERS

Visit Now: <https://www.dumps-certify.com>

DOWNLOAD the newest DumpsActual 1z0-1075-25 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1OKV2s-1notqBgxKagdn2YLV1qFrqMaue>

If you prefer to practice your 1z0-1075-25 training materials on paper, then our 1z0-1075-25 exam dumps will be your best choice. 1z0-1075-25 PDF version is printable, and you can print them into hard one, and you can take them with you, and you can also study them anywhere and any place. Besides, 1z0-1075-25 test materials are compiled by professional expert, therefore the quality can be guaranteed. You can obtain the download link and password for 1z0-1075-25 exam materials within ten minutes, and if you don't receive, you can contact us, and we will solve this problem for you.

In the Oracle Manufacturing Cloud 2025 Implementation Professional (1z0-1075-25) Web-based Practice Test, you will get the 1z0-1075-25 questions that are real and accurate. Furthermore, the 1z0-1075-25 practice exam works smoothly on all operating systems including Mac, Linux, IOS, Android, and Windows. it is a browser-based Oracle Manufacturing Cloud 2025 Implementation Professional (1z0-1075-25) practice test software, there is no need for any specific software installation or additional plugins to function correctly.

Valid 1z0-1075-25 Vce Dumps - 1z0-1075-25 Test Cram Pdf

We will provide you with comprehensive study experience by give you 1z0-1075-25 free study material & Oracle exam prep torrent. The questions & answers from the Oracle practice torrent are all valid and accurate, made by the efforts of a professional IT

team. The authority and validity of Oracle 1z0-1075-25 training practice are the guarantee for all the IT candidates. We arrange our experts to check the update every day. Once there is any new technology about 1z0-1075-25 Exam Dumps, we will add the latest questions into the 1z0-1075-25 study pdf, and remove the useless study material out, thus to ensure the 1z0-1075-25 exam torrent you get is the best valid and latest. So 100% pass is our guarantee.

Oracle Manufacturing Cloud 2025 Implementation Professional Sample Questions (Q12-Q17):

NEW QUESTION # 12

You are defining a standard operation for visual inspection. You want the completion of this standard operation to be reported in all work orders that reference it.

Which setup task must you perform to achieve this?

- A. Select the Count Point check box while defining the standard operation.
- B. Select the Automatically Transact check box while defining the standard operation.
- C. Ensure that the Charge Type of the resource is Automatic.
- D. Deselect the Count Point check box while defining the standard operation.

Answer: A

NEW QUESTION # 13

A Manufacturing Engineer in a plant is creating an alternate manufacturing process for an item using its existing work definitions. After copying from the existing work definition, WD1, to the alternate work definition, WD2, the engineer finds that the operation items were not copied in the alternate manufacturing process WD2.

What is the reason for this?

- A. Production Priority was not populated in the new WD2 during creation.
- B. Start Date was not populated in the new WD2 during creation.
- C. Item and Structure Name were changed in the new WD2 during creation.
- D. Item and Structure Name in the existing WD1 were retained in the new WD2 during creation.

Answer: C

Explanation:

When creating an alternate work definition (WD2) by copying from an existing one (WD1), if the Item and Structure Name were changed during the creation of WD2, the operation items would not be copied. This is because operation items are tied to specific item structures. Changing the structure results in a disconnect between the original operation items and the new work definition.

* Item and Structure Name are critical in ensuring that the operation items (components and materials) are transferred when copying work definitions. If these names are changed, the system does not assume the same items should be used.

Oracle Manufacturing Cloud documentation explains that maintaining consistency in the Item and Structure Name is key when copying work definitions to ensure all operation items are carried over.

NEW QUESTION # 14

Which statement is NOT true about cumulative lead time?

- A. It updates lead time percent at the operation level in the work definition.
- B. It calculates cumulative manufacturing lead times by rolling up manufacturing lead times of make items.
- C. It updates the item's lead time attributes at the end of the calculation process: cumulative manufacturing and cumulative total lead times.
- D. It calculates cumulative total lead times by rolling up lead times of make items and adding up lead time values of buy items.

Answer: A

Explanation:

Cumulative lead time is a key concept in Oracle Manufacturing Cloud, where it calculates the total time required to manufacture an item. The following points clarify the calculations:

* Statement D is incorrect because cumulative lead time does not update the lead time percent at the operation level in the work definition. Instead, cumulative lead time focuses on rolling up the lead times of both make and buy items to provide an overall lead time for the entire production process.

Correct Statements:

* Statement A : The system calculates cumulative manufacturing lead time by summing up the lead times of all make items in the production process.

* Statement B : At the end of the cumulative lead time calculation process, it updates the lead time attributes of the item, specifically cumulative manufacturing and cumulative total lead times.

* Statement C : Cumulative total lead time includes both make and buy item lead times, representing the complete production cycle from procurement to manufacturing.

Oracle Cloud SCM guide on "Lead Time Calculations " explains how cumulative lead times are calculated and updated but does not mention lead time percent at the operation level.

NEW QUESTION # 15

Your client is planning to override the Plant Production Calendar with One or More Date-Effective Work Center Calendars. You need to explain the consideration when using the Override the Plant Production Calendar with One or More Date-Effective Work Center Calendars feature.

Which three statements are true when overriding the production calendar?

- A. Even if there are override calendars, the lead time calculation in days for an item remains based on the plant calendar and not on work center calendars.
- B. While defining override calendars, you need to ensure that the date effective range for a work center calendar association can be overlapping and contiguous.
- C. Supplier operations used in outside processing use the work center calendar in work order scheduling.
- D. When the user executes search action in the Review Dispatch List page, if more than one work center are selected and if the start date or completion date is based on Shift-based search, then the operations are queried based on the shifts of the plant calendar only.
- E. The Work Execution Work Area Infolets and Manage Production Exceptions page are based on the plant calendar and not on work center calendars.

Answer: A,D,E

Explanation:

Overriding the plant production calendar with date-effective work center calendars provides flexibility in scheduling specific work centers with different operating hours. However, certain aspects of production planning and execution remain tied to the plant-level calendar. Here are the details:

* Statement A : The Work Execution Work Area Infolets and Manage Production Exceptions page are based on the plant calendar and not on work center calendars - Even when work centers have their own calendars, the high-level overview and exception reporting remain based on the plant calendar.

* Statement C : Lead time calculation in days for an item remains based on the plant calendar - Lead times are calculated using the plant calendar, regardless of work center-specific calendars, ensuring consistency in planning.

* Statement D : Search actions in the Review Dispatch List page query operations based on the plant calendar shifts when multiple work centers are selected - For consistency in dispatching, the system references the plant calendar when shift-based search parameters are used across multiple work centers.

Incorrect Statements:

* Statement B : Date-effective ranges for work center calendars should not overlap for accuracy in scheduling.

* Statement E : Supplier operations in outside processing generally rely on the plant calendar for consistency unless explicitly configured otherwise.

Oracle Manufacturing Cloud documentation on "Calendar Overrides " explains how plant and work center calendars interact and the impact on work execution, scheduling, and reporting

NEW QUESTION # 16

Your client needs to implement operational checks for compliance with training and job requirements. Which four statements are true about this functionality?

- A. You do not have the ability to associate a Job profile with a Work order operation resource.
- B. You have the ability to associate a Job profile with a Standard operation resource.
- C. You have the ability to associate a Job profile with a Work definition operation resource.
- D. The qualification Is enforced during reporting of labor usage.
- E. A qualified operator need not be specified to report resource transactions.
- F. The qualification Is used to warn a production supervisor If they assign operators that don ' t meet the skill requirements

against the resource.

Answer: B,C,D,F

Explanation:

Oracle Manufacturing Cloud provides functionality to enforce compliance with training and job requirements through operational checks. The correct statements are:

* Statement B : You can associate a job profile with a work definition operation resource. This ensures that only operators who meet the job requirements are allowed to perform the work.

* Statement C : Qualifications are enforced when reporting labor usage, meaning that if an operator lacks the required qualifications, the system can prevent or warn about the labor transaction.

* Statement D : You can also associate a job profile with a standard operation resource to enforce skills and training compliance.

* Statement F : If an unqualified operator is assigned to a task, the system can notify the production supervisor to avoid non-compliance with skill requirements.

Incorrect options:

* Statement A : A qualified operator must be specified to report resource transactions.

* Statement E : You can associate a job profile with a work order operation resource, contrary to what is implied.

Oracle Manufacturing Cloud documentation on "Operational Checks for Compliance" explains the enforcement of job profiles and qualifications in production operations.

NEW QUESTION # 17

.....

Our users are all over the world and they have completed their exams through the help of our 1z0-1075-25 study guide. As you can see the feedbacks from our loyal customers, all of them are grateful to our 1z0-1075-25 exam braindumps and become successful people with the 1z0-1075-25 Certification. And what are you waiting for? Just selecting our 1z0-1075-25 learning materials, the next one to get an international certificate is you!

Valid 1z0-1075-25 Vce Dumps: <https://www.dumpsactual.com/1z0-1075-25-actualtests-dumps.html>

Secondly, SOFT Version of 1z0-1075-25 latest dumps questions is created into a questions and answers mode, which simulates the 1z0-1075-25 real test environment, which is conducive for you to adapt the exam with ease, Oracle Latest Test 1z0-1075-25 Simulations It surely becomes the springboard to development and promotion for the employees, Our specialists check daily to find whether there is an update on the 1z0-1075-25 study tool.

The standard error streams stderr, cerr, and System.err are normally 1z0-1075-25 unbuffered by default, A protective film can be used in conjunction with other screen covers, an iPad mini case, or other accessories.

Pass 1z0-1075-25 Exam with Trustable Latest Test 1z0-1075-25 Simulations by DumpsActual

Secondly, SOFT Version of 1z0-1075-25 Latest Dumps Questions is created into a questions and answers mode, which simulates the 1z0-1075-25 real test environment, which is conducive for you to adapt the exam with ease.

It surely becomes the springboard to development and promotion for the employees, Our specialists check daily to find whether there is an update on the 1z0-1075-25 study tool.

The PDF version of our 1z0-1075-25 study tool is very practical, which is mainly reflected on the special function, Just buy our 1z0-1075-25 study materials, then you will win it.
