## Latest L3M6 Test Vce, Valid L3M6 Exam Tutorial

At the information age, knowledge is wealth as well as productivity. All excellent people will become outstanding one day as long as one masters skill. In order to train qualified personnel, our company has launched the L3M6 Study Materials for job seekers. We are professional to help tens of thousands of the candidates get their L3M6 certification with our high quality of L3M6 exam questions and live a better life.

## CIPS Socially Responsible Warehousing and Distribution Sample Questions (Q17-Q22):

### NEW QUESTION # 17

There is no law to control noise pollution.

- A. FALSE
- B. TRUE

**Answer: A**

**Explanation:**

Laws to control noise pollution exist globally and nationally, contradicting the statement. The CIPS L3M6 module references examples like the UK's Control of Pollution Act 1974 and EU noise directives, which set limits on acceptable noise levels (e.g., decibels from transport or industry). These regulations mandate mitigation measures (e.g., noise barriers, curfews) and penalties for non-compliance, ensuring environmental protection. In procurement, such laws influence equipment choices and site operations, aligning with LO2's focus on regulatory impacts on supply chains. The presence of these laws makes the statement false.

---

### NEW QUESTION # 18

An example of Q60 is when a new factory is built in the middle of the countryside.

- A. FALSE
- B. TRUE

**Answer: A**

Explanation:

B (Assuming Q60 refers to visual pollution examples)

Q60 lists visual pollution examples (billboards, graffiti, landfills), not a factory in the countryside, which is more about land take (Q56). The CIPS L3M6 module distinguishes these-visual pollution impairs aesthetics directly, while a factory's rural placement is environmental disruption. This makes the statement false in LO2's context.

### NEW QUESTION # 19

Which of the following sources contribute to a warehouse carbon footprint calculation? Select all that apply.

- A. Transport
- B. Energy use from heating, cooling, and insulation
- C. Waste
- D. Material handling and other equipment

**Answer: A,B,C,D**

Explanation:

A warehouse's carbon footprint measures the total greenhouse gas (GHG) emissions generated by its operations, both directly and indirectly. According to the CIPS L3M6 syllabus, all listed sources-energy use from heating, cooling, and insulation; material handling and other equipment; transport; and waste-are key contributors. Energy use (A) includes electricity and fuel for climate control, a major emission source in warehousing. Material handling equipment (B), such as forklifts, often relies on fossil fuels or electricity, adding to the footprint. Transport (C) covers emissions from vehicles moving goods to, from, and within the warehouse, a significant factor in logistics. Waste (D) contributes through disposal processes, including methane from landfills. The syllabus emphasizes monitoring these elements as part of CSR to reduce environmental impact, making "All the above" the correct choice.

### NEW QUESTION # 20

Which of the following 'Economic and engineering aspects' factors would you be considering when developing location strategies for stores and warehouses? Select all that apply.

- A. Service and utility connections
- B. A, C, and D
- C. Road safety impact assessment to assess the impact of changing the road layout
- D. Geotechnical considerations, such as the ground material of the proposed site
- E. Planning permission

**Answer: B**

Explanation:

Economic and engineering aspects include geotechnical considerations (A), road safety assessments (C), and utility connections (D), as these influence construction feasibility and costs. Planning permission (B) is more regulatory than economic/engineering. The CIPS L3M6 syllabus identifies these as key factors, making A, C, and D correct.

### NEW QUESTION # 21

Sustainable procurement is based on the principle that socially responsible products and services are not only good for the environment but are also essential for long-term profitability, especially as consumers are increasingly demanding socially responsible products.

- A. TRUE
- B. FALSE

**Answer: A**

Explanation:

Sustainable procurement prioritizes socially and environmentally responsible products, benefiting the environment while supporting long-term profitability through consumer demand and risk reduction. The CIPS L3M6 module emphasizes this dual advantage, noting the growing trend of consumer preference for ethical products.
