Exam4Labs Cisco 300-710 practice exam software went through real-world testing with feedback from more than 90,000 global professionals before reaching its latest form. The Cisco 300-710 Exam Dumps are similar to real exam questions. Our Cisco 300-710 practice test software is suitable for computer users with a Windows operating system.

Cisco 300-710 exam covers a wide range of topics related to Cisco Firepower, including architecture and design, deployment, configuration, management, and troubleshooting. Candidates are expected to have a deep understanding of NGFW technologies, such as intrusion prevention systems (IPS), malware protection, URL filtering, and application control. They should also be able to demonstrate expertise in implementing security policies, managing Firepower devices, and analyzing security events.

Understanding the General Outline

Cisco 300-710 is a well-structured exam that aims at directional learning. It is divided into four main domains, and each of them is focused on a different skill set and imparts updated cognizance.

Cisco 300-710 Exam, also known as Securing Networks with Cisco Firepower (SNCF), is a certification exam designed for network security professionals who want to validate their knowledge and skills in deploying and managing Cisco Firepower Next-Generation Firewall (NGFW) appliances. 300-710 exam is part of the Cisco Certified Network Professional Security (CCNP

Security) certification track, which is one of the most sought-after certifications in the IT industry.

300-710 Reliable Exam Prep & Certification 300-710 Cost

Our Cisco 300-710 practice materials from our company are invulnerable. And we are consigned as the most responsible company in this area. So many competitors concede our superior position in the market. Besides, we offer some promotional benefits for you. The more times you choose our Cisco 300-710 Training Materials, the more benefits you can get, such as free demos of our 300-710 exam dumps, three-version options, rights of updates and so on. So customer orientation is the beliefs we honor.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q44-Q49):

NEW QUESTION # 44

An engineer currently has a Cisco FTD device registered to the Cisco FMC and is assigned the address of 10.10.50.12. The organization is upgrading the addressing schemes and there is a requirement to convert the addresses to a format that provides an adequate amount of addresses on the network. What should the engineer do to ensure that the new addressing takes effect and can be used for the Cisco FTD to Cisco FMC connection?

- A. Delete and reregister the device to Cisco FMC
- B. **Update the IP addresses from IPv4 to IPv6 without deleting the device from Cisco FMC**
- C. Cisco FMC does not support devices that use IPv4 IP addresses.
- D. Format and reregister the device to Cisco FMC.

Answer: B

NEW QUESTION # 45

Drag and drop the configuration steps from the left into the sequence on the right to enable external authentication on Cisco FMC to a RADIUS server.

□

Answer:

Explanation:

□ Explanation:

4, 1, 2, 3

NEW QUESTION # 46

A consultant is working on a project where the customer is upgrading from a single Cisco Firepower 2130 managed by FDM to a pair of Cisco Firepower 2130s managed by FMC for high availability. The customer wants the configurations of the existing device being managed by FDM to be carried over to FMC and then replicated to the additional device being added to create the high availability pair. Which action must the consultant take to meet this requirement?

- A. The FTD configuration must be converted to ASA command format, which can then be migrated to FMC.
- B. **The current FDM configuration will be converted automatically into FMC when the device registers.**
- C. The current FDM configuration must be configured by hand into FMC before the devices are registered.
- D. The current FDM configuration must be migrated to FMC using the Secure Firewall Migration Tool.

Answer: B

Explanation:

When an FTD device that is managed by FDM is registered to FMC, the existing configuration is automatically converted and imported into FMC. The FMC then pushes the configuration back to the device.

This process preserves most of the FDM configuration, except for some features that are not supported by FMC, such as VPN wizards and certificates.

NEW QUESTION # 47

Refer to the exhibit.

What must be done to fix access to this website while preventing the same communication to all other websites?

- A. Create an access control policy rule to allow port 443 to only 172.1.1.50
- B. Create an intrusion policy rule to have Snort allow port 443 to only 172.1.1.50
- C. Create an intrusion policy rule to have Snort allow port 80 to only 172.1.1.50.
- D. **Create an access control policy rule to allow port 80 to only 172.1.1.50.**

Answer: D

NEW QUESTION # 48

A network administrator is troubleshooting access to a website hosted behind a Cisco FTD device. External clients cannot access the web server via HTTPS. The IP address configured on the web server is 192.168.7.46. The administrator is running the command capture CAP interface outside match ip any 192.168.7.46

255.255.255.255 but cannot see any traffic in the capture. Why is this occurring?

- A. The FTD has no route to the web server.
- B. The access policy is blocking the traffic.
- C. **The capture must use the public IP address of the web server.**
- D. The packet capture shows only blocked traffic

Answer: C

NEW QUESTION # 49

.....

The Exam4Labs is committed to presenting the excellent viable observe cloth to prevail within the Cisco 300-710 examination. With actual PDF questions, customizable exercise checks, and 24/7 guide, customers can be assured that they're getting the fine possible prep cloth.
