## **Secure-Software-Design Study Materials and WGU Secure Software Design (KEO1) Exam Test Dumps - Secure-Software-Design PDF Guide - Pass4SureQuiz**

These Secure-Software-Design exam question formats contain real, valid, and updated WGU Secure-Software-Design exam questions that will assist you in WGU WGU Secure Software Design (KEO1) Exam exam preparation and enable you to pass the challenging WGU Secure-Software-Design Exam with good scores. The WGU Secure-Software-Design questions are prepared by highly experienced professionals and, thus, are kept to the point and concise.

### **WGU Secure Software Design (KEO1) Exam Sample Questions (Q67-Q72):**

#### **NEW QUESTION # 67**

What is the privacy impact rating of an application that stores personally identifiable information, monitors users with ongoing transfers of anonymous data, and changes settings without notifying the user?

- A. P4 no privacy risk
- B. P2 moderate privacy risk
- C. P3 low privacy risk
- **D. P1 high privacy risk**

**Answer: D**

Explanation:

The privacy impact rating for an application that stores personally identifiable information (PII), monitors users with ongoing transfers of anonymous data, and changes settings without notifying the user would be P1 high privacy risk. Storing PII already poses a significant risk due to the potential for data breaches and misuse. Monitoring users and transferring data, even if anonymous, increases the risk as it involves ongoing data collection. Changing settings without user notification is a serious privacy concern because it can lead to unauthorized data processing or sharing, further elevating the risk level.

#### **NEW QUESTION # 68**

Senior IT staff has determined that a new product will be hosted in the cloud and will support web and mobile users. Developers will need to deliver secure REST services, Android and IOS mobile apps, and a web application. Developers are currently determining how to deliver each part of the overall product.

Which phase of the software development lifecycle (SDLC) is being described?

- A. End of life
- **B. Design**
- C. Deployment
- D. Maintenance

**Answer: B**

Explanation:

The phase being described is the Design phase of the SDLC. During this phase, developers and IT staff determine the architectural and operational details of the product, which includes decisions on how to deliver various components such as secure REST services, mobile apps, and web applications. The Design phase is crucial for setting the foundation for the development work that will follow, ensuring that the product will be secure, scalable, and maintainable.

: The information aligns with the descriptions of the SDLC phases provided in resources such as GitHub's explanation of the SDLC1 and other industry-standard software development lifecycle resources234.

#### **NEW QUESTION # 69**

The security software team has cloned the source code repository of the new software product so they can perform vulnerability testing by modifying or adding small snippets of code to see if they can cause unexpected behavior and application failure.

Which security testing technique is being used?

- A. Binary Fault Injection
- B. Dynamic Code Analysis
- **C. Source-Code Fault Injection**
- D. Fuzz Testing

**Answer: C**

#### **NEW QUESTION # 70**

The security team is reviewing all noncommercial software libraries used in the new product to ensure they are being used according to the legal specifications defined by the authors.

What activity of the Ship SDL phase is being performed?

- A. Final security review
- **B. Open-source licensing review**
- C. Penetration testing
- D. Policy compliance analysis

**Answer: B**

Explanation:

The activity described pertains to the review of noncommercial software libraries to ensure compliance with the legal specifications set by the authors. This is part of the open-source licensing review, which is a critical activity in the Ship phase of the Security Development Lifecycle (SDL). This review ensures that all open-source components are used in accordance with their licenses, which is essential for legal and security compliance.

: The Ship phase of the SDL includes various activities such as policy compliance review, vulnerability scanning, penetration testing, open-source licensing review, and final security and privacy reviews<sup>12</sup>. The open-source licensing review specifically addresses the legal aspects of using third-party software components<sup>2</sup>.

#### NEW QUESTION # 71

Which type of threat exists when an attacker can intercept and manipulate form data after the user clicks the save button but before the request is posted to the API?

- A. Information disclosure
- B. Spoofing
- C. Elevation of privilege
- **D. Tampering**

**Answer: D**

#### NEW QUESTION # 72

.....

Pass4SureQuiz provides 24/7 customer support to answer any of your queries or concerns regarding the WGUSecure Software Design (KEO1) Exam (Secure-Software-Design) certification exam. They have a team of highly skilled and experienced professionals who have a thorough knowledge of the WGUSecure Software Design (KEO1) Exam (Secure-Software-Design) exam questions and format. With the aim of helping aspirants to achieve the WGUSecure Software Design (KEO1) Exam (Secure-Software-Design) certification, Pass4SureQuiz is committed to providing the best quality and updated WGU Secure-Software-Design exam dumps.
