New SAP C_TS422_2023 Test Discount & Valid C_TS422_2023 Exam Camp Pdf

More about C_TS422_2023 Exams Dumps: If you want to know more about our test preparations materials, you should explore the related C_TS422_2023 exam Page. You may go over our C_TS422_2023 brain dumps product formats and choose the one that suits you best. You can also avail of the free demo so that you will have an idea how convenient and effective our C_TS422_2023 exam dumps are for C_TS422_2023 Certification. Rather we offer a wide selection of braindumps for all other exams under the C_TS422_2023 certification. This ensures that you will cover more topics thus increasing your chances of success. With the multiple learning modes in C_TS422_2023 practice exam software, you will surely find your pace and find your way to success.

SAP C_TS422_2023 Exam Syllabus Topics:

Topic	Details
Topic 1	• Lean Manufacturing in SAP S • 4HANA: This section covers repetitive manufacturing master data, line load planning, and Kanban systems.
Topic 2	• Introduction to SAP S • 4HANA Supply Chain Planning: This part covers the background and motivation for SAP S • 4HANA, its main components, business applications, and user experience strategy.
Topic 3	• Master Data in SAP S • 4HANA: This section covers the exploration of crucial production-related master data elements, with emphasis on bill of material, routing, and production version.
Topic 4	• Production Orders in SAP S • 4HANA: This section covers BOM item categorization, order status management, availability checks, routing selection, order type setup, and material handling processes.

Topic 5	• Introduction to SAP S • 4HANA Production Planning: This section covers an overview of production planning components, functions, and planning approaches. Exploration of emerging trends.
Topic 6	• Capacity Planning in SAP S • 4HANA: This section covers a discussion of SAP S • 4HANA best practices, SAP HANA database concept, SAP Fiori user experience, and embedded analytics capabilities.
Topic 7	• Demand Management in SAP S • 4HANA: This section covers a comparison of production methods in various manufacturing environments.

Valid C_TS422_2023 Exam Camp Pdf, C_TS422_2023 Valid Exam Cost

BraindumpsIT has put emphasis on providing our C_TS422_2023 exam questions with high quality products with high passing rate. Many exam candidates are uninformed about the fact that our C_TS422_2023 preparation materials can help them with higher chance of getting success than others. It is all about efficiency and accuracy. And what is more charming than our C_TS422_2023 Study Guide with a passing rate as 98% to 100%? The answer is no. Our C_TS422_2023 practice quiz is unique in the market.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q12-Q17):

NEW QUESTION # 12

Your company manufactures materials whose characteristics differ for each manufacturing process. Which application do you have to use in SAP S/4HANA Cloud Private Edition to be able to track and use this information in all areas of logistics?

- A. Process order management
- B. Quality management
- C. Batch management
- D. Engineering change management

Answer: C

Explanation:

In SAP S/4HANA Cloud Private Edition, tracking materials with varying characteristics across manufacturing processes and logistics requires:

* Batch management(D): Batch management (activated in material master, MM01, General Plant Data
/Storage view, field: Batch Management) assigns unique batch numbers to materials (e.g., via MSC1N).

It tracks characteristics (e.g., viscosity, color) via classification (CL02, linked in MSC2N), ensuring this information is available in all logistics areas-production (e.g., CO11N goods issue), inventory (MMBE), and sales (VA01 batch determination). This is ideal for materials like chemicals with process- specific traits.

Process order management(A) (COR1) executes production but relies on batch management for characteristic tracking-it's not the tracking tool itself.Engineering change management(B) (CC01) manages design changes, not runtime characteristics.Quality management(C) (e.g., QA01) inspects batches but doesn't track characteristics across logistics-batch management underpins it. This is per SAP's batch management capabilities.

NEW QUESTION # 13

What are the consequences when you assign a planned order to a production line manually, using the planning table in repetitive manufacturing?

- A. The planned order's components are copied to the picking list.
- B. The planned order generates capacity requirements
- C. The planned order is converted to a production order.
- D. The planned order's component availability is checked.

Answer: B

Explanation:
When you assign a planned order to a production line manually, using the planning table in repetitive manufacturing, the system generates capacity requirements for the planned order. The capacity requirements are calculated based on the production line, the quantity, and the production rate of the planned order. The system also checks the availability of the production line and displays any capacity overload or underload. The planned order is not converted to a production order, nor is the component availability or the picking list affected by the manual assignment. Reference: SAP Help Portal - Assigning Planned Orders to Production Lines, SAP S/4HANA Production Planning and Manufacturing Certification Guide - Chapter 7: Repetitive Manufacturing

NEW QUESTION # 14

You have maintained the parameters for simple discontinuation in the material master of a component. Which business process will be affected if the available stock is zero and the discontinuation date is in the past?

- A. Backflushing
- B. Kanban
- C. Production order release
- D. Material requirements planning

Answer: D

Explanation:
If the available stock is zero and the discontinuation date is in the past, the material requirements planning (MRP) process will be affected. MRP will not create any planned orders or purchase requisitions for the discontinued component. Instead, it will create a discontinuation indicator in the MRP list and a discontinuation message in the exception message list. This will inform the planner that the component is no longer available and that a follow-up material should be used instead. Reference: [SAP Help Portal] - Discontinuation of Materials.

NEW QUESTION # 15

What is the purpose of a reporting point confirmation in repetitive manufacturing?
Note: There are 2 Correct answers to this question?

- A. To determine the work in progress along the production line
- B. To provide timely updates of inventory management for the staged components
- C. To reduce the total production lead time for a long production line
- D. To stage different components for a production line simultaneously

Answer: A,B

Explanation:
A reporting point confirmation is a function that allows you to backflush the material components and activities that have been consumed and performed at a specific operation in a repetitive manufacturing process. It also reduces the dependent requirements for the planned orders. You can use reporting point confirmation for the following purposes:
To determine the work in progress (WIP) along the production line, by posting the quantity that is on the production line at each reporting point. This helps you to calculate the volume and value of unfinished products.
To provide timely updates of inventory management for the staged components, by recording the withdrawal of components at a time that is close to the time of the operation in which they are used. This helps you to avoid discrepancies between the actual and planned consumption of materials. Reference: Reporting Point Confirmation, Repetitive Manufacturing Confirmation

NEW QUESTION # 16

You are a consultant on an SAP S/4HANA Cloud brownfield project. In a meeting, the customer decides to remodel an existing business process in accordance with clean core principles. Which of the following SAP Signavio solutions can be used for the remodeling?

- A. SAP Signavio Process Intelligence
- B. SAP Signavio Process Manager
- C. SAP Signavio Process Insights
- D. SAP Signavio Process Governance

Answer: B,D

Explanation:
In an SAP S/4HANA Cloud brownfield project,clean core principlesemphasize minimizing customizations, leveraging standard processes, and ensuring extensibility. SAP Signavio tools support process remodeling:
* SAP Signavio Process Governance(C): This tool (part of the Signavio suite) enables process execution and monitoring, ensuring compliance with redesigned standard processes. It supports workflow automation and governance, aligning remodeled processes with clean core by enforcing best practices and reducing custom code.
* SAP Signavio Process Manager(D): This tool is used for process modeling and documentation (e.g., BPMN 2.0). It allows the customer to redesign existing processes visually, map them to S/4HANA standard capabilities, and identify deviations, supporting a clean core approach by aligning with SAP's reference processes.
SAP Signavio Process Insights(A) provides analytics on current process performance (e.g., bottlenecks), not remodeling.SAP Signavio Process Intelligence(B) focuses on process mining and data-driven insights, not direct remodeling. This is per SAP's Signavio and clean core documentation.

NEW QUESTION # 17

......

BraindumpsIT's study material is available in three different formats. The reason we have introduced three formats of the SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C_TS422_2023) practice material is to meet the learning needs of every student. Some candidates prefer C_TS422_2023 practice exams and some want Real C_TS422_2023 Questions due to a shortage of time. At BraindumpsIT, we meet the needs of both types of aspirants. We have SAP C_TS422_2023 PDF format, a web-based practice exam, and SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C_TS422_2023) desktop practice test software.
