Being a social elite and making achievements in your own field may be the dream of all people. However, only a very few people seize the initiative in their life. Perhaps our research data will give you some help. As long as you spend less time on the game and spend more time on learning, the 312-76 study materials can reduce your pressure so that users can feel relaxed and confident during the preparation and certification process. It is believed that many users have heard of the 312-76 Study Materials from their respective friends or news stories. So why don't you take this step and try? You will not regret your wise choice.

Targeted Audience

Go for this test if you see yourself working under the job roles of security testers, system administrators, firewall administrators, risk assessment professionals, and network server administrators. Such specialists can sharpen acquired skills and get equipped with more profound work acquaintance once they gain the EDRP certification.

For candidates who are going to buy 312-76 exam torrent online, you may pay more attention to the privacy protection. We respect

private information of you, and if you choose us, your personal information such as your name and email address will be protected well. Once the order finishes, your personal information will be concealed. In addition, 312-76 Exam Dumps are high quality and efficiency, and you can improve your efficiency by using them. You can obtain the downloading link and password within ten minutes after payment for 312-76 exam barindumps, and the latest version will be sent to your email automatically.

EC-COUNCIL EC-Council Disaster Recovery Professional (EDRP) Sample Questions (Q102-Q107):

NEW QUESTION # 102

Which of the following terms refers to the ability to restore data and applications that run businesses should their data centers, servers, or other infrastructure get damaged or destroyed due to a disaster?

- **A. Disaster Recovery**
- B. Recovery Management
- C. Data Recovery
- D. Application Recovery

Answer: A

Explanation:

Disaster Recovery (DR) encompasses restoring data, applications, and infrastructure post-disaster, ensuring business operations resume, aligning with the question's broad scope.

* Option A (Data Recovery): Limited to data, not applications or infrastructure.

* Option C (Application Recovery): Focuses only on applications.

* Option D (Recovery Management): A process, not the ability itself.

* "Disaster Recovery restores data, applications, and infrastructure after a disaster, enabling business continuity" (Module: Disaster Recovery Planning, Section: DR Definition).

NEW QUESTION # 103

John wanted to transfer his organization's data to an alternate site. He wanted the alternate site to run in parallel to the primary site, which would allow his organization to continue normal business operations almost immediately in the event of a disruption. Which of the following sites is best suited to John's requirements?

- A. Warm Site
- **B. Hot Site**
- C. Cold Site
- D. Colocation Facilities

Answer: B

Explanation:

A Hot Site is a fully operational alternate site with duplicated systems and data, running in parallel to the primary site. It allows immediate failover and continuity of operations with minimal downtime, meeting John's need for near-instant resumption.

* Option A (Cold Site): A basic facility with power and space, requiring significant setup time.

* Option B (Warm Site): Partially equipped, with some pre-installed systems, but not fully operational in real time.

* Option D (Colocation Facilities): Shared data centers, not inherently designed for immediate failover.

* "Hot Sites are fully redundant, mirrored environments that operate concurrently with primary sites, ensuring zero to minimal downtime during failover, ideal for critical operations" (Module: Alternate Sites, Section: Site Types).

NEW QUESTION # 104

Timothy works as a network administrator in a multinational organization. He decides to implement a dedicated network for sharing storage resources. He uses a _____ as it separates the storage units from the servers and the user network.

- A. SCSI
- **B. SAN**
- C. SAS
- D. NAS

Answer: B

Explanation:

A Storage Area Network (SAN) is a dedicated high-speed network that separates storage devices from servers and user networks, providing centralized block-level storage access.

* Option A (NAS): Network Attached Storage uses the user network, not a dedicated one.

* Option B (SCSI): Small Computer System Interface, a protocol, not a network (likely a typo for SAS).

* Option D (SAS): Serial Attached SCSI, a drive interface, not a network.

* "SANs provide a dedicated storage network, isolating storage from server and user traffic for efficiency and security" (Module: Storage Technologies, Section: SAN Overview).

NEW QUESTION # 105

Which of the following processes is involved in identifying, measuring, and controlling events?

- A. Incident Management
- **B. Risk Management**
- C. Disaster Recovery
- D. Response Management

Answer: B

NEW QUESTION # 106

Lisa's organization has multiple servers to cater to the needs of different businesses and clients. Each of these servers runs different applications in order to keep them isolated from each other. The server room incurs a huge cost because of the number of servers owing to the massive cooling systems, server maintenance, data center footprint, and quicker server provisioning. An audit of the resources discovered that most of the servers are idle two-thirds of business hours since these servers are dedicated towards faster recovery during disasters and the isolation of applications. Lisa is looking for a solution to bring down the cost of maintaining these servers, optimize the use of resources, and save money on the energy spent to keep these servers cool. Which solution can meet all these needs of Lisa?

- A. Virtual Desktop Infrastructure
- B. Server Replication
- **C. Server Virtualization**
- D. Operating System Virtualization

Answer: C

Explanation:

Server Virtualization consolidates multiple physical servers into virtual machines on fewer hosts, reducing costs, optimizing resources, and lowering cooling needs, as Lisa requires.

* Option A (VDI): Desktop-focused, not server optimization.

* Option B (OS Virtualization): Container-based, less broad than server virtualization.

* Option C (Replication): Duplicates servers, not cost-saving.

* "Server Virtualization reduces physical server count, cutting maintenance and cooling costs while optimizing resource use" (Module: Virtualization and Recovery, Section: Server Virtualization Benefits).

NEW QUESTION # 107

.....

Itcerttest presents 312-76 exam questions in a convenient PDF format for effective preparation for the EC-Council Disaster Recovery Professional (EDRP) (312-76) exam. EC-COUNCIL 312-76 exam questions PDF file is designed for easy comprehension, allowing you to download it onto various smart devices. Whether you possess a PC, laptop, Mac, tablet, or smartphone, accessing your 312-76 Practice Exam Questions PDF anytime and anywhere is effortless.
