

Exam AZ-305 Simulator Fee, AZ-305 Exam Outline

Exam AZ-305:
Designing Microsoft Azure Infrastructure Solutions

skilr

STUDY GUIDE

STEP 1: UNDERSTAND THE EXAM OBJECTIVES

- DESIGN IDENTITY, GOVERNANCE, AND MONITORING SOLUTIONS (25-30%)
- DESIGN DATA STORAGE SOLUTIONS (20-25%)
- DESIGN BUSINESS CONTINUITY SOLUTIONS (15-20%)
- DESIGN INFRASTRUCTURE SOLUTIONS (30-35%)

STEP 2: USE STUDY METHODS

- EXAM GUIDE
- MICROSOFT TRAINING: SELF PACED AND INSTRUCTOR LED
- STUDY GROUPS

STEP 3: USE PRACTICE EXAM

ENHANCE YOUR ANSWERING SKILLS, FIND OUT WEAK AREAS, AND HAVE A BETTER PREPARATION BY USING THE PRACTICE EXAM TESTS FOR EXAM AZ-305: DESIGNING MICROSOFT AZURE INFRASTRUCTURE SOLUTIONS.

Microsoft AZ-305 Exam Outline & AZ-305 Reasonable Exam Price

A professional Microsoft certification serves as the most powerful way for you to show your professional knowledge and skills. For those who are struggling for promotion or better job, they should figure out what kind of AZ-305 Test Guide is most suitable for them. However, some employers are hesitating to choose. We here promise you that our AZ-305 certification material is the best in the market, which can definitely exert positive effect on your study. Our Designing Microsoft Azure Infrastructure Solutions learn tool create a kind of relaxing leaning atmosphere that improve the quality as well as the efficiency, on one hand provide conveniences, on the other hand offer great flexibility and mobility for our customers. That's the reason why you should choose us.

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q75-Q80):

NEW QUESTION # 75

You have an Azure subscription that contains the storage accounts shown in the following table.

- You plan to implement two new apps that have the requirements shown in the following table.
 - Which storage accounts should you recommend using for each app? To answer, select the appropriate options in the answer area.
- NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

<https://docs.microsoft.com/en-us/azure/storage/common/storage-account-overview>

<https://www.edureka.co/community/40011/different-storage-accounts-there-major-difference-between>

<https://insidemstech.com/tag/general-purpose-v2/>

In conclusion the correct answers are:

Box1 --> Storage1 and Storage3 only

Box2 --> Storage1 and Storage4 only

<https://docs.microsoft.com/en-us/azure/storage/files/storage-how-to-create-file-share?tabs=azure-portal#basics>

NEW QUESTION # 76

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company plans to deploy various Azure App Service instances that will use Azure SQL databases. The App Service instances will be deployed at the same time as the Azure SQL databases.

The company has a regulatory requirement to deploy the App Service instances only to specific Azure regions.

The resources for the App Service instances must reside in the same region.

You need to recommend a solution to meet the regulatory requirement.

Solution: You recommend creating resource groups based on locations and implementing resource locks on the resource groups.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

Resource locks are not used for compliance purposes. Resource locks prevent changes from being made to resources.

Reference:

<https://docs.microsoft.com/en-us/azure/azure-resource-manager/management/lock-resources>

NEW QUESTION # 77

You are designing a virtual machine that will run Microsoft SQL Server and will contain two data disks. The first data disk will store log files, and the second data disk will store data. Both disks are P40 managed disks.

You need to recommend a caching policy for each disk. The policy must provide the best overall performance for the virtual machine.

Which caching policy should you recommend for each disk? To answer, drag the appropriate policies to the correct disks. Each policy may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

<https://docs.microsoft.com/en-us/azure/virtual-machines/windows/sql/virtual-machines-windows-sql-performance>

NEW QUESTION # 78

You need to design an Azure policy that will implement the following functionality:

* For new resources, assign tags and values that match the tags and values of the resource group to which the resources are deployed.

* For existing resources, identify whether the tags and values match the tags and values of the resource group that contains the resources.

* For any non-compliant resources, trigger auto-generated remediation tasks to create missing tags and values.

The solution must use the principle of least privilege.

What should you include in the design? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Modify

Modify is used to add, update, or remove properties or tags on a resource during creation or update. A common example is updating tags on resources such as costCenter. Existing non-compliant resources can be remediated with a remediation task. A single Modify rule can have any number of operations.

Box 2: A managed identity with the Contributor role

* Managed identity

How remediation security works: When Azure Policy runs the template in the deployIfNotExists policy definition, it does so using a managed identity. Azure Policy creates a managed identity for each assignment, but must have details about what roles to grant the managed identity.

* Contributor role

The Contributor role grants the required access to apply tags to any entity.

<https://docs.microsoft.com/en-us/azure/governance/policy/how-to/remediate-resources>

<https://docs.microsoft.com/en-us/azure/azure-resource-manager/management/tag-resources>

<https://docs.microsoft.com/en-us/azure/governance/policy/concepts/effects#modify>

NEW QUESTION # 79

You have several Azure App Service web apps that use Azure Key Vault to store data encryption keys. Several departments have the following requests to support the web app:

Which service should you recommend for each department's request? To answer, configure the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 80

.....

VCEDumps has designed Designing Microsoft Azure Infrastructure Solutions which has actual exam Dumps questions, especially for the students who are willing to pass the Microsoft AZ-305 exam for the betterment of their future. The study material is available in three different formats. Microsoft Practice Exam are also available so the students can test their preparation with unlimited tries and pass Designing Microsoft Azure Infrastructure Solutions (AZ-305) certification exam on the first try.
