- A. Update the assigned Permission Set.
- B. Update default sharing to Public Read/Write.
- C. Create a criteria-based sharing rule.

To ensure that a subset of Service Delivery records are visible to selected staff while maintaining private sharing settings, you should use criteria-based sharing rules:
* Navigate to Sharing Settings:

* Go to Setup in Salesforce.
* Enter "Sharing Settings" in the Quick Find box and select it.
* Create a Criteria-Based Sharing Rule:
* In the Sharing Settings, locate the object for which you want to create the sharing rule (e.g., Service Deliveries).
* Create a new sharing rule and select "Based on Criteria" as the rule type.
* Define the criteria that records must meet to be shared (e.g., specific fields or values that identify the subset of records).
* Specify the users or roles that should have access to these records and define the level of access (Read/Write).
* Save and Apply the Rule:
* Save the sharing rule and ensure it is activated.
* Verify that the selected staff have the appropriate access to the records as defined by the rule.
