SAP C-S4CPR-2502 Exam Syllabus Topics:

Topic	Details

Topic 1	• Extensibility and Integration: This section of the exam measures skills of a SAP Integration Consultant and covers the basic principles of system extensibility and integration in SAP S • 4HANA Cloud. It touches upon in-app and side-by-side extensions as well as integrating with external systems through APIs and standard tools.
Topic 2	• System Landscapes and Identity Access Management: This section of the exam measures skills of a SAP System Administrator and covers basic understanding of the SAP S • 4HANA Cloud system architecture, including identity and access management concepts. It focuses on setting up user roles, managing authorizations, and maintaining secure system access within the SAP landscape.
Topic 3	• Implementation and Configuration for Sourcing and Procurement: This section of the exam measures skills of a SAP Sourcing and Procurement Consultant and covers the core configuration tasks required to set up sourcing and procurement processes in SAP S • 4HANA Cloud. It includes implementing purchase requisitions, purchase orders, approvals, sourcing, and invoice management while ensuring alignment with organizational procurement needs.
Topic 4	• Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops: This section of the exam measures skills of a SAP Project Manager and covers the methodology for successful cloud implementation projects. It includes adopting a cloud mindset, assembling the right project team, and conducting fit-to-standard workshops to ensure efficient and value-driven implementations.
Topic 5	• Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of a SAP Implementation Specialist and covers how to configure and personalize the SAP Fiori Launchpad. It includes understanding app management, tile groups, catalogs, and business roles to ensure a user-friendly and efficient experience for end users.

We can make sure the short time on C-S4CPR-2502 training engine is enough for you to achieve the most outstanding result.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q74-Q79):

NEW QUESTION # 74
If a customer wants to develop their own custom application and integrate it with SAP S/4HANA Cloud Public Edition, what tools would you recommend to develop the app? Note: There are 2 correct answers to this question.

- A. SAP HANA Cloud
- B. SAP Cloud Portal Service
- C. SAP Build
- D. SAP Business Application Studio

Answer: A,D

NEW QUESTION # 75

What do you use to collect the values that are entered into the configuration activities in SAP Central Business Configuration?

- A. Availability and Dependencies of Solution Processes Excel
- B. SAP Cloud ALM Requirements app
- C. SAP Cloud ALM Processes app
- D. Business Driven Configuration Questionnaire

Answer: D

Explanation:

InSAP Central Business Configuration, theBusiness Driven Configuration Questionnaire (BDCQ)is used to collect the values entered into configuration activities. The BDCQ is a key tool in the implementation process, allowing users to define business-specific settings based on their requirements. It ensures that the configuration aligns with the organization's business processes and industry standards.

* Business Driven Configuration Questionnaire (BDCQ):The BDCQ is designed to guide users through the configuration of SAP S/4HANA Cloud Public Edition by asking relevant questions about business processes. The responses provided in the questionnaire are used to configure the system automatically. This approach simplifies the configuration process and ensures consistency across the implementation. TheSAP Central Business Configuration Guideconfirms that the BDCQ is the primary tool for collecting configuration values.

* B. Availability and Dependencies of Solution Processes Excel:This Excel file is used to analyze the availability and dependencies of solution processes but does not collect configuration values. It is more of a planning tool rather than a configuration tool.

* C. SAP Cloud ALM Requirements app:The SAP Cloud ALM Requirements app is used for managing and tracking requirements during the implementation process. While it helps in documenting requirements, it does not directly collect configuration values.

* D. SAP Cloud ALM Processes app:The SAP Cloud ALM Processes app is used for process management and monitoring. It focuses on process flows and does not play a role in collecting configuration values.

* SAP Central Business Configuration Guide:Explains the role of the Business Driven Configuration Questionnaire in collecting configuration values.https://help.sap.com

* SAP Activate Methodology for SAP S/4HANA Cloud Public Edition:Provides an overview of the tools and methods used in the configuration process, including the BDCQ.

* SAP Cloud ALM Documentation:Describes the functionalities of the SAP Cloud ALM apps, including the Requirements and Processes apps.

Why Option A is Correct:Why the Other Options Are Incorrect:Key References:

NEW QUESTION # 76

In the Price for Request (1XF) Process, using the Manage Supplier Quotations SAP Fiori app, which follow- on documents can be created after awarding a quotation? Note: There are 2 correct answers to this question.

- A. Scheduling Agreement
- B. Purchase Requisition
- C. Purchase Order
- D. Purchase Contract

Answer: C,D

Explanation:

In thePrice for Request (1XF)process, after awarding a supplier quotation using theManage Supplier QuotationsSAP Fiori app, follow-on documents can be created to formalize the procurement process. Below is an explanation of the correct answers:

* Purchase Contract (A):A purchase contract can be created as a follow-on document to establish long- term agreements with the supplier for recurring purchases based on the awarded quotation.

* Purchase Order (D):A purchase order is the most common follow-on document, used to formally request the delivery of goods or services from the supplier based on the awarded quotation.

* Purchase Requisition (B):Purchase requisitions are internal requests for procurement and are typically created before quotations are requested. They are not follow-on documents after awarding a quotation.

* Scheduling Agreement (C):While scheduling agreements are similar to contracts, they are not typically created directly from awarded quotations in this process.

NEW QUESTION # 77

When using the Local SAP S/4HANA Database Schema migration approach, what is the maximum file size?
Note: There are 2 correct answers to this question.

- A. 160 MB per ZIP file
- B. 100 MB per file
- C. 160 MB per file
- D. 100 MB per ZIP file

Answer: B,D

Explanation:
When using theLocal SAP S/4HANA Database Schema migration approach, there are specific file size limitations to ensure successful data migration. These limitations apply to both individual files and compressed (ZIP) files.
* 100 MB per ZIP file (Option B):When migrating data using the Local SAP S/4HANA Database Schema approach, the maximum size for a compressed (ZIP) file is100 MB. This limitation ensures that the migration process remains efficient and avoids issues related to large file uploads. TheSAP Data Migration Guidespecifies this file size restriction.
* 100 MB per file (Option C):Similarly, the maximum size for an individual uncompressed file is also
100 MB. This ensures that each file can be processed without exceeding system limits. The sameSAP Data Migration Guideconfirms this restriction.
* A. 160 MB per file:This is incorrect because the maximum file size for individual files is 100 MB, not
160 MB.
* D. 160 MB per ZIP file:This is also incorrect because the maximum size for a ZIP file is 100 MB, not
160 MB.
* SAP Data Migration Guide for SAP S/4HANA Cloud Public Edition:Specifies the file size limitations for the Local SAP
S/4HANA Database Schema migration approach.https://help.sap.com
* SAP S/4HANA Cloud Migration Best Practices:Provides guidelines for preparing and uploading migration files, including size restrictions.
Why Options B and C Are Correct:Why the Other Options Are Incorrect:Key References:

NEW QUESTION # 78
What are the key process flows of service procurement? Note: There are 3 correct answers to this question.

- A. Manage service contracts
- B. Manage invoices
- C. Maintain quota arrangements
- D. Manage service entry sheets
- E. Manage purchase orders

Answer: B,D,E

Explanation:
Service procurement involves specific process flows that ensure the proper acquisition and management of services. Below is an explanation of the correct answers:
* Manage invoices (A):Invoicing is a critical step in service procurement, where the supplier submits an invoice for the services rendered. This process ensures accurate payment based on agreed terms.
* Manage purchase orders (B):Purchase orders are used to formally request services from a supplier.
They define the scope, terms, and conditions of the service procurement.
* Manage service entry sheets (C):Service entry sheets are used to confirm the completion of services by the supplier. They serve as a basis for invoice verification and payment.
* Manage service contracts (D):While service contracts are important for long-term agreements, they are not part of the standard service procurement process flows.
* Maintain quota arrangements (E):Quota arrangements are used for material procurement to allocate sources of supply and are not relevant to service procurement.
