CAP Simulated Test, Latest CAP Study Plan

With both CAP exam practice test software you can understand the Certified AppSec Practitioner Exam (CAP) exam format and polish your exam time management skills. Having experience with CAP exam dumps environment and structure of exam questions greatly help you to perform well in the final Certified AppSec Practitioner Exam (CAP) exam. The desktop practice test software is supported by Windows.

The SecOps Group Certified AppSec Practitioner Exam Sample Questions (Q10-Q15):

NEW QUESTION # 10

Tracy is the project manager of the NLT Project for her company. The NLT Project is scheduled to last 14 months and has a budget at completion of \$4,555,000. Tracy's organization will receive a bonus of \$80,000 per day that the project is completed early up to \$800,000. Tracy realizes that there are several opportunities within the project to save on time by crashing the project work.

Crashing the project is what type of risk response?

- A. Enhance
- B. Exploit
- C. Transference
- D. Mitigation

Answer: A

NEW QUESTION # 11

A robots.txt file tells the search engine crawlers about the URLs which the crawler can access on your site.

Which of the following is true about robots.txt?

- A. Developers must not list any sensitive files and directories in this file
- B. Both A and B
- C. Developers must list all sensitive files and directories in this file to secure them
- D. None of the above

Answer: A

Explanation:

The robots.txt file is a text file placed in a website's root directory to communicate with web crawlers (e.g., Googlebot) about which pages or resources should not be accessed or indexed. It uses directives like Disallow to specify restricted areas (e.g., Disallow: /admin/). However, robots.txt is not a security mechanism; it is only a request to crawlers, and malicious bots or users can ignore it.

* Option A ("Developers must not list any sensitive files and directories in this file"): Correct.

Listing sensitive files or directories (e.g., Disallow: /secret/) in robots.txt can inadvertently expose their existence to attackers, who can then attempt to access them directly. The best practice is to avoid mentioning sensitive paths and rely on proper access controls (e.g., authentication, authorization) instead.

* Option B ("Developers must list all sensitive files and directories in this file to secure them"): Incorrect.

Listing sensitive paths in robots.txt does not secure them; it only informs crawlers to avoid them, and it can serve as a roadmap for attackers.

* Option C ("Both A and B"): Incorrect, as A and B are contradictory; B is false.

* Option D ("None of the above"): Incorrect, as A is true.

The correct answer is A, aligning with the CAP syllabus under "Web Crawler Security" and "Information Disclosure

Prevention."References: SecOps Group CAP Documents - "robots.txt Usage," "Information Exposure," and "OWASP Web Security Testing Guide" sections.

NEW QUESTION # 12

According to FIPS Publication 199, what are the three levels of potential impact on organizations in the event of a compromise on confidentiality, integrity, and availability?

- A. Low, Moderate, and High
- B. Minimum, Moderate, and High
- C. Low, Normal, and High
- D. Confidential, Secret, and High

Answer: A

Explanation:

Section: Volume D

NEW QUESTION # 13

A security policy is an overall general statement produced by senior management that dictates what role security plays within the organization. Which of the following are required to be addressed in a well designed policy?

Each correct answer represents a part of the solution. Choose all that apply.

- A. Who is expected to comply with the policy?
- B. Where is the vulnerability, threat, or risk?
- C. Who is expected to exploit the vulnerability?
- D. What is being secured?

Answer: A,B,D

NEW QUESTION # 14

Management wants you to create a visual diagram of what resources will be utilized in the project deliverables. What type of a chart is management asking you to create?

- A. Work breakdown structure
- B. Roles and responsibility matrix
- C. Resource breakdown structure
- D. RACI chart

Answer: C

NEW QUESTION # 15

.....
