To attempt the PMI CAPM exam optimally and ace it on the first attempt, proper exam planning is crucial. Since the PMI CAPM exam demands a lot of time and effort, we designed the PMI CAPM Exam Dumps in such a way that you would not have to go through sleepless study nights or disturb your schedule.

To be eligible for the CAPM certification exam, individuals must have a secondary degree (high school diploma, associate's degree or the global equivalent) and 1,500 hours of professional experience on a project team, or 23 hours of project management education. Certified Associate in Project Management (CAPM) certification is ideal for professionals who are new to project management or are looking to transition into a project management role. The CAPM certification demonstrates an individual's commitment to professional development and can lead to new career opportunities and increased earning potential.

The Certified Associate in Project Management (CAPM) certification is a valuable credential for individuals who want to demonstrate their understanding and knowledge of project management concepts and techniques. The CAPM Certification provides an entry-level certification in project management and is especially beneficial for individuals who are new to the field. By earning the CAPM certification, individuals can set themselves apart in a competitive job market and demonstrate their commitment to the project management field.

PMI Certified Associate in Project Management (CAPM) Sample Questions (Q165-Q170):

NEW QUESTION # 165

Which document describes the procurement item in sufficient detail to allow prospective sellers to determine if they are capable of providing the products, services, or results?

- A. Request for quote
- B. Procurement management plan
- C. Request for proposal
- **D. Procurement statement of work**

Answer: D

Explanation:

Section: Volume E

Explanation:

12.1.3.2 Procurement Statement of Work

The statement of work (SOW) for each procurement is developed from the project scope baseline and defines only that portion of the project scope that is to be included within the related contract. The procurement SOW describes the procurement item in sufficient detail to allow prospective sellers to determine if they are capable of providing the products, services, or results. Sufficient detail can vary based on the nature of the item, the needs of the buyer, or the expected contract form. Information included in a SOW can include specifications, quantity desired, quality levels, performance data, period of performance, work location, and other requirements.

The procurement SOW is written to be clear, complete, and concise. It includes a description of any collateral services required, such as performance reporting or post-project operational support for the procured item. In some application areas, there are specific content and format requirements for a procurement SOW. Each individual procurement item requires a SOW; however, multiple products or services can be grouped as one procurement item within a single SOW.

The procurement SOW can be revised and refined as required as it moves through the procurement process until incorporated into a signed agreement.
