The actual CompTIA CAS-004 exam questions are in PDF format for the one who wants to study offline. The actual CompTIA CAS-004 exam questions are in simple PDF form. The PDF format is suitable both for smartphones as well as tablets. You can print documents and study anywhere. The plus point is that the PDF version is updated regularly to improve its CAS-004 Exam Questions and reflect changes in the syllabus of the exam.

CompTIA CAS-004 (CompTIA Advanced Security Practitioner (CASP+)) Certification Exam is a vendor-neutral industry certification that validates the advanced-level security skills and knowledge of experienced IT professionals. CAS-004 exam is designed for professionals who have a minimum of ten years of experience in IT administration, including at least five years of hands-on technical security experience. CompTIA Advanced Security Practitioner (CASP+) Exam certification exam covers a wide range of security topics, including risk management, enterprise security architecture, research and collaboration, and integration of network, endpoint and cloud security.

CompTIA CAS-004 (CompTIA Advanced Security Practitioner (CASP+)) certification exam is a highly respected certification in the field of security. It is a vendor-neutral certification that validates the skills and knowledge required to design, implement, and manage cybersecurity solutions. The CASP+ certification is designed for IT professionals who want to advance their career in cybersecurity and demonstrate their expertise in the field.

## CompTIA Advanced Security Practitioner (CASP+) Exam Sample Questions (Q448-Q453):

### NEW QUESTION # 448

A security architect discovers the following page while testing a website for vulnerabilities:

404 - page not found: /gy67162

The page you have requested is no. available on .his server.

Apache Tomcat 7.0.52

Which of the following best describes why this issue should be corrected?

- A. The website is generating a server error.
- B. The website fuzzing tool has overloaded the server's capacity.
- C. The information can be used for more targeted attacks.**
- D. The URL for this page can be used for directory traversal.

### Answer: C

Explanation:

Step by Step Explanation:

\* The information disclosed in the error message (e.g., "Apache Tomcat 7.0.52") provides attackers insights into the software version, which may have known vulnerabilities.

\* Correcting this issue ensures that attackers cannot use the disclosed information to tailor more sophisticated or targeted attacks.

\* Best practices include suppressing unnecessary error details to mitigate the risk of information disclosure.

Reference: CASP+ Exam Objectives 5.3 - Mitigate vulnerabilities related to service information leakage.

### NEW QUESTION # 449

A technician uses an old SSL server due to budget constraints and discovers performance degrades dramatically after enabling PFS. The technician cannot determine why performance degraded so dramatically.

A newer version of the SSL server does not suffer the same performance degradation.

Performance rather than security is the main priority for the technician. The system specifications and configuration of each system are listed below:

	Old server	New server
Decryption chips	8	10
System RAM	16GB	8GB
Disk size	1TB	6TB
Algorithm	RSA	ECC
Connections	500	450

Which of the following is MOST likely the cause of the degradation in performance and should be changed?

- A. Connection requests
- B. Using ECC**

- C. Disk size
- D. Decryption chips
- E. Using RSA
- F. Memory size

**Answer: E**

**NEW QUESTION # 450**

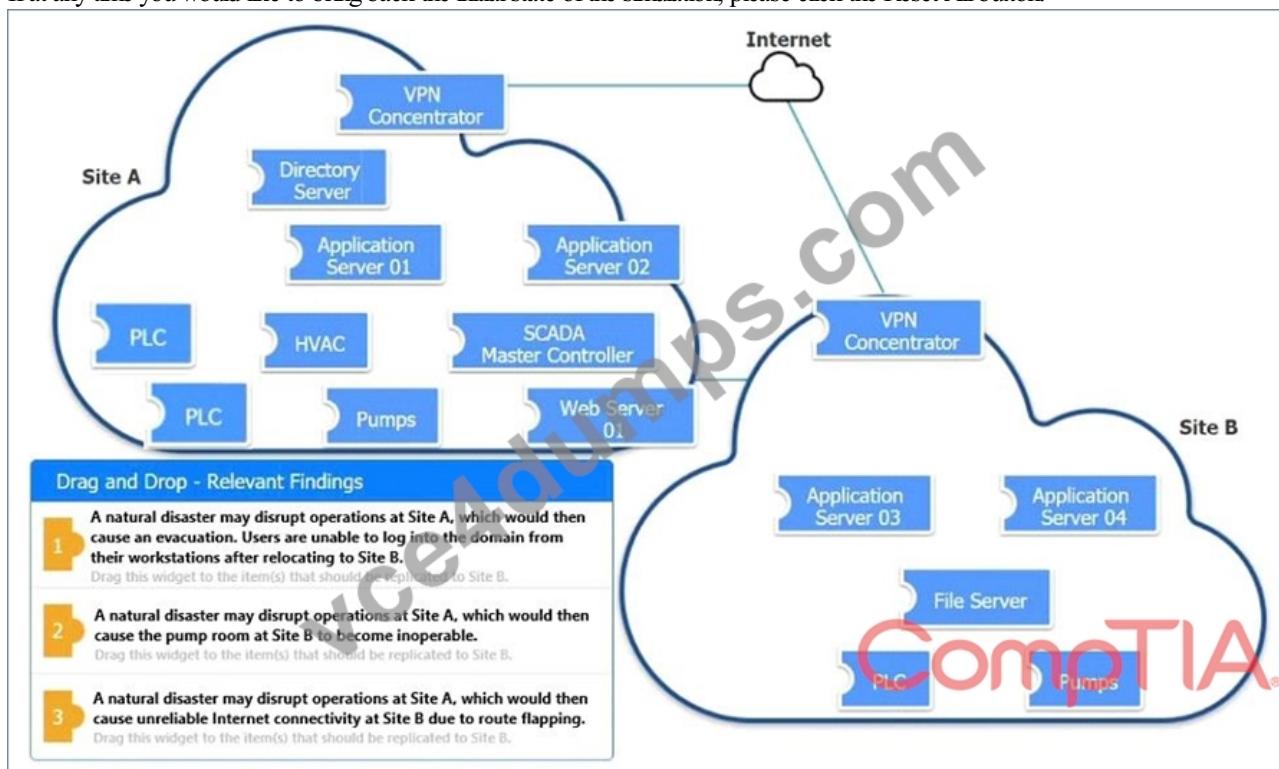

An organization is planning for disaster recovery and continuity of operations.

**INSTRUCTIONS**

Review the following scenarios and instructions. Match each relevant finding to the affected host.

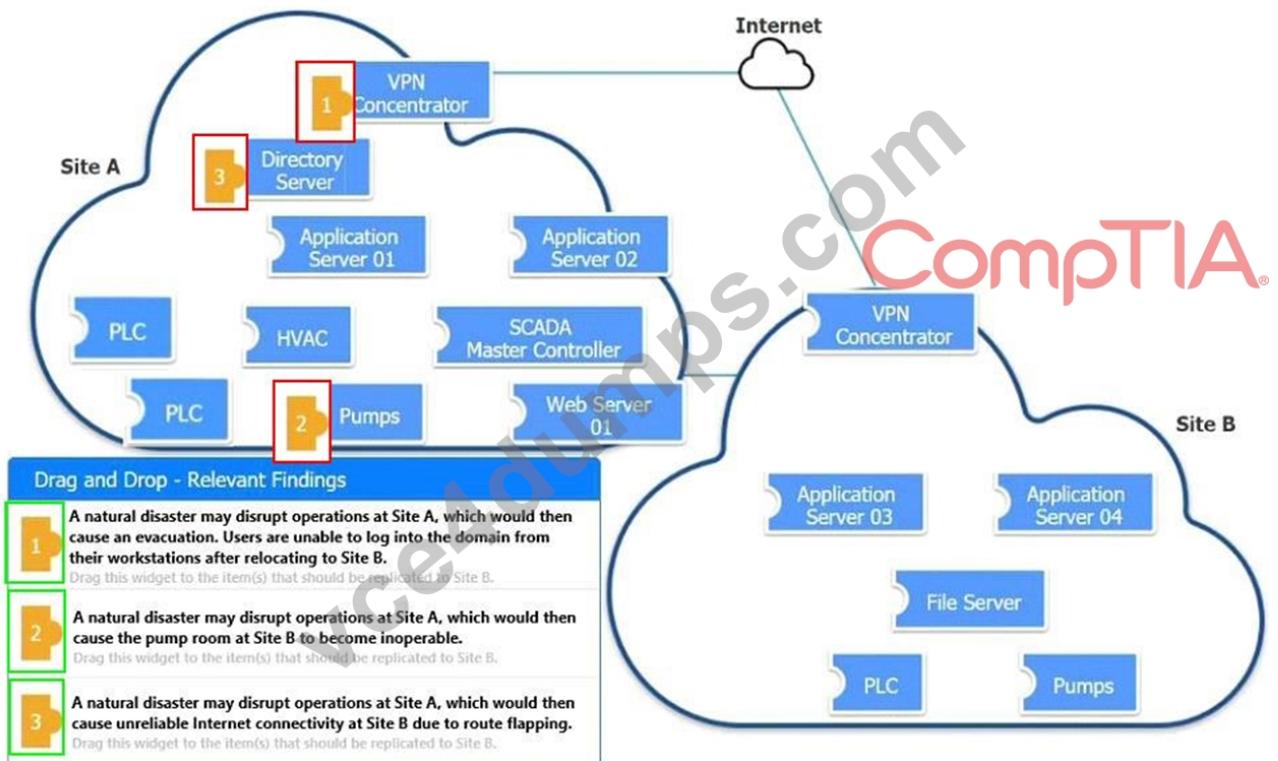

After associating scenario 3 with the appropriate host(s), click the host to select the appropriate corrective action for that finding. Each finding may be used more than once.

If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

**Answer:**

Explanation:

#### NEW QUESTION # 451

A security analyst is reviewing network connectivity on a Linux workstation and examining the active TCP connections using the command line.

Which of the following commands would be the BEST to run to view only active Internet connections?

- A. sudo netstat -plntu | grep -v "Foreign Address"
- B. sudo netstat -pnut -w | column -t -s \$"w"
- C. sudo netstat -nlt -p | grep "ESTABLISHED"
- D. sudo netstat -antu | grep "LISTEN" | awk '{print\$5}'
- E. sudo netstat -pnut | grep -P
