## CASPO-001 Study Guides & Valid Test CASPO-001 Experience

Download the free CASPO-001 demo of whatever product you want and check its quality and relevance by comparing it with other available study contents within your access. ExamCost's study guides and CASPO-001 Dump will prove their worth and excellence. Check also the feedback of our clients to know how our products proved helpful in passing the exam.

### GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q68-Q73):

#### NEW QUESTION # 68

Which are NOT appropriate topics for discussion in a Sprint Retrospective? (Choose the best two answers)

- A. Definition of "Done"
- B. Sprint Backlog for the next Sprint
- C. Team relations
- D. How the team does its work
- E. The value of work currently represented in the Product Backlog

**Answer: B,E**

Explanation:

The Scrum Guide states: "The purpose of the Sprint Retrospective is to plan ways to increase quality and effectiveness" by inspecting the last Sprint's people, processes, and tools.

\* D: The next Sprint's Sprint Backlog is planned in Sprint Planning, not the Retrospective, making it inappropriate.

#### NEW QUESTION # 69

What best describes the relationship of the Product Owner and the stakeholders? (Choose the best answer)

- A. The Product Owner actively asks for stakeholder input and expectations to process into the Product Backlog.
- B. The Product Owner provides the stakeholders with acceptance forms at the Sprint Review to record their formal agreement over the delivered software.
- C. The Product Owner has the final call over the requirements and should involve the stakeholders as little as possible.
- D. The Product Owner writes the User Stories as provided by the stakeholders.

**Answer: A**

Explanation:

The Scrum Guide states: "The Product Owner is also accountable for effective Product Backlog management, which includes... representing the needs of many stakeholders in the Product Backlog." Option C reflects this collaborative approach—actively seeking stakeholder input to shape the Product Backlog. Option A is too passive; the Product Owner interprets, not just transcribes. Option B contradicts Scrum's emphasis on stakeholder engagement. Option D introduces a formal process not in Scrum; the Sprint Review is for feedback, not signed agreements. Thus, C is best.

#### NEW QUESTION # 70

True or False: A first Sprint can start before the Product Owner has a complete and exhaustive Product Backlog in place.

- A. False
- B. True

**Answer: B**

Explanation:

Scrum doesn't require a fully detailed Product Backlog to begin. The Scrum Guide notes: "The Product Backlog is an emergent, ordered list... It evolves over time." A minimal backlog with a Product Goal and some items is sufficient for the first Sprint, with refinement ongoing.

\* A: True—Scrum embraces starting with what's known.

### NEW QUESTION # 71

What two things should be done if the Product Owner is unavailable? (Choose the best two answers)

- A. In a permanent state of unavailability, a new Product Owner needs to be appointed. Development efforts without a Product Owner are not employing Scrum.
- B. There should be a Product Owner team to allow a different person from that team to instantly take over the role of Product Owner.
- C. Within the Sprint, the Developers make the best decisions possible to assure progress toward the Sprint Goal, re-aligning with the Product Owner once he/she is available again.

**Answer: A,C**

Explanation:

The Product Owner is a singular, critical role in Scrum: "The Product Owner is one person, not a committee." Temporary or permanent unavailability requires specific actions:

\* A: During a Sprint, the Developers' self-management allows them to proceed toward the Sprint Goal, adjusting with the Product Owner later, per: "The Developers are self-managing, meaning they internally decide who does what, when, and how."

\* C: Permanent absence means Scrum isn't being followed without a Product Owner, necessitating a replacement: "For Product Owners to succeed, the entire organization must respect their decisions."

### NEW QUESTION # 72

The Sprint Goal is a result of Sprint Planning, as is the Sprint Backlog. True or False?

- A. False
- B. True

**Answer: B**

Explanation:

The Sprint Goal and the Sprint Backlog are both outcomes of Sprint Planning, making this statement true.

According to the Scrum Guide, Sprint Planning is an event where the Scrum Team collaborates to define the work to be performed during the Sprint. The Sprint Goal is a single objective set for the Sprint, providing focus and coherence to the work selected. It is crafted collaboratively by the Product Owner, Developers, and Scrum Master during Sprint Planning. Simultaneously, the Sprint Backlog is created, consisting of the Product Backlog items selected for the Sprint plus a plan to deliver them, aligned with the Sprint Goal. The Scrum Guide states: "Sprint Planning initiates the Sprint by laying out the work to be performed... This resulting plan is created by the collaborative work of the entire Scrum Team." Thus, both the Sprint Goal and Sprint Backlog emerge from this event, confirming option A as correct.

### NEW QUESTION # 73

.....

Consider sitting for an Certified Agile Scrum Product Owner (CASPO) exam and discovering that the practice materials you've been using are incorrect and useless. The technical staff at ExamCost has gone through the GAQM certification process and knows the need to be realistic and exact.
