CASPO-001 Test Guide will make you more prominent in the labor market than others, and more opportunities will take the initiative to find you. Next, let's take a look at what is worth choosing from CASPO-001 learning question.

GAQM CASPO-001 exam is an industry-recognized certification that validates the candidate's knowledge and expertise in Agile Scrum methodology. Certified Agile Scrum Product Owner (CASPO) certification program is designed for professionals who work in the software development and project management industries. Certified Agile Scrum Product Owner (CASPO) certification is ideal for individuals who want to improve their knowledge and skills in Agile Scrum methodology and become proficient in product ownership. Certified Agile Scrum Product Owner (CASPO) certification program includes a comprehensive curriculum that covers all aspects of Agile Scrum product ownership, including product visioning, product backlog management, and product delivery. CASPO-001 Exam is designed to test the candidate's knowledge and skills in all these areas and validate their proficiency in Agile Scrum product ownership.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q33-Q38):

NEW QUESTION # 33

There are five teams working on a product. How many Product Owners would there be? (Choose the best answer)

- **A. 0**
- B. Let the team decide
- C. It depends
- D. 1

Answer: A

Explanation:

A single product has one Product Owner, regardless of the number of teams. The Scrum Guide states: "The Product Owner is one person, not a committee... Multiple Scrum Teams often work together on the same product. One Product Backlog is used to describe the upcoming work on the product."

* A: Multiple Product Owners fragment accountability.

* B: Correct-one Product Owner for one product.

NEW QUESTION # 34

Holding a Sprint 0 is the most effective way to: (Choose the best answer)

- A. Create a complete Product Backlog
- B. Define a reference architecture
- **C. There is no Sprint 0 in Scrum**
- D. Work on team development

Answer: C

Explanation:

"Sprint 0" is a concept from pre-Scrum practices and isn't part of the official framework. The Scrum Guide mandates that Sprints deliver value: "A Sprint is a time-box of one month or less during which a 'Done', usable, and potentially releasable product Increment is created." A preparatory "Sprint 0" for architecture, team building, or backlog creation contradicts this by not producing an Increment.

* A, B, C: These may occur outside Sprints, but not as a "Sprint 0."

NEW QUESTION # 35

Who should know the most about the progress toward a business objective or a release? (Choose the best answer)

- A. The Scrum Master
- B. The Developers
- **C. The Product Owner**
- D. The Project Manager

Answer: C

Explanation:

The Scrum Guide states: "The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team" and for "developing and explicitly communicating the Product Goal." This makes them the primary person responsible for tracking progress toward business objectives or releases, as they align the Product Backlog with stakeholder needs and strategic goals. Option B (Developers) focuses on Sprint-level execution, not overarching objectives. Option C (Scrum Master) ensures process adherence, not business progress. Option D (Project Manager) isn't a Scrum role. Thus, A is correct.

NEW QUESTION # 36

Who creates the Definition of "Done"? (Choose the best answer)

- A. The Product Owner as he/she is responsible for the product's success
- **B. The development organization (or Scrum Team if none is available from the development organization)**
- C. The Scrum Master as he/she is responsible for the Developers' productivity
- D. The Scrum Team, in a collaborative effort where the result is the common denominator of all members' definitions

Answer: B

Explanation:

The Definition of "Done" is a shared standard, often set by the organization, but defaults to the Scrum Team if no broader standard exists. The Scrum Guide states: "If the Definition of Done for an increment is part of the conventions, standards, or guidelines of the development organization, all Scrum Teams must follow it as a minimum. If it is not an organizational standard, the Scrum Team must create a Definition of Done appropriate for the product."

* A: Correct-organizational standards take precedence, otherwise the Scrum Team defines it.

* B: Collaboration occurs, but it's not just a "common denominator."

NEW QUESTION # 37

Which three purposes does the Definition of "Done" serve? (Choose the best three answers)

- A. Describe the purpose, objective, and time-box of each Scrum event.
- **B. Create a shared understanding of when work is complete.**
- C. Describe the work that must be done before the Sprint is allowed to end.
- **D. Guide the Developers on how many Product Backlog items to select for the Sprint.**
- **E. Increase transparency.**

Answer: B,D,E

Explanation:

The Scrum Guide explains the Definition of "Done" as "a formal description of the state of the Increment when it meets the quality measures required for the product".

* A: It increases transparency by making quality expectations visible to all.

* B: It creates a shared understanding of "complete" across the Scrum Team.

NEW QUESTION # 38
