GAQM CASPO-001 (Certified Agile Scrum Product Owner) Certification Exam is a globally recognized certification for professionals who have experience in Agile and Scrum product development. Certified Agile Scrum Product Owner (CASPO) certification is designed to test your knowledge and skills in the Agile Scrum Product Owner role, including product vision, product backlog management, and stakeholder engagement.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q51-Q56):

NEW QUESTION # 51

When a Developers determines that it has over-committed itself for a Sprint, who has to be present when reviewing and adjusting the Sprint work selected? (Choose the best answer)

- A. The Developers.
- **B. The Product Owner and the Developers.**
- C. The Scrum Master, project manager, and Developers.
- D. The Product Owner and all stakeholders.

Answer: B

Explanation:

The Scrum Guide states that the Sprint Backlog is owned by the Developers, who are responsible for planning and executing the work to achieve the Sprint Goal. If they realize they've over-committed, they must adjust the Sprint Backlog. However, since the Product Owner is accountable for maximizing value and managing the Product Backlog, their involvement is critical to ensure adjustments align with value delivery and the Sprint Goal. The Scrum Guide notes: "The Product Owner may influence the Developers by helping them understand and select trade-offs." Option A includes a non-existent "project manager" role in Scrum, making it incorrect.

Option C involves stakeholders, who are not part of mid-Sprint adjustments (they provide feedback at the Sprint Review). Option D excludes the Product Owner, which is insufficient given their role. Thus, B is correct.

NEW QUESTION # 52

True or False: Scrum is a methodology that tells in detail how to build software incrementally.

- A. True
- **B. False**

Answer: B

Explanation:

The Scrum Guide defines Scrum as "a lightweight framework that helps people, teams, and organizations generate value through adaptive solutions for complex problems." It provides roles, events, and artifacts but intentionally avoids prescribing detailed "how-to" processes for building software (e.g., coding practices, tools). This distinguishes it from a methodology, which offers specific steps. Scrum focuses on "what" (e.g., deliver an Increment) and leaves "how" to the team's discretion, making the statement false. Thus, B is correct.

NEW QUESTION # 53

Who must do all the work to make sure Product Backlog items conform to the Definition of "Done"? (Choose the best answer)

- A. The Scrum Master
- B. QA Specialists
- C. The Product Owner
- D. The Scrum Team
- **E. The Developers**

Answer: E

Explanation:

The Scrum Guide clearly assigns the responsibility for delivering a "Done" Increment to the Developers: "The Developers are the people in the Scrum Team that are committed to creating any aspect of a usable Increment each Sprint." This includes all work-development, testing, integration, etc.-needed to meet the Definition of "Done," a shared commitment that ensures quality. Option A (Scrum Master) is too broad; while the Scrum Team collaborates, only the Developers perform the hands-on work. Option C (Product Owner) is incorrect- they manage the Product Backlog, not the execution. Option D (QA Specialists) introduces a role not defined in Scrum; quality is the Developers' collective responsibility. Option E (Scrum Master) is wrong- they facilitate, not build. Thus, B is correct.

NEW QUESTION # 54

What is typical work for a Product Owner in a Sprint? (Choose the best two answers)

- **A. Work with the Developers on Product Backlog refinement.**
- **B. Collaborate with stakeholders, user communities, and product managers.**
- C. Attend every Daily Scrum to answer functional questions on the discussed Sprint Backlog items.
- D. Create financial reporting upon the spent hours reported by the Developers.
- E. Update the work plan for the Developers on a daily basis.

Answer: A,B

Explanation:

The Scrum Guide outlines the Product Owner's responsibilities as maximizing value through Product Backlog management, which

* C: "Developing and explicitly communicating the Product Goal" and refining the Product Backlog with Developers to ensure clarity and readiness.

How does an organization know that a product built through Scrum is successful? (Choose the best answer)

- Answer: A**

Success in Scrum is tied to value delivery, not internal metrics. Option B-frequent releases with KPI updates-aligns with Scrum's empirical nature: "Scrum is founded on empiricism and lean thinking." Real- world feedback refines the Product Backlog, ensuring success.

* C:Time variance is irrelevant to value.
