GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q79-Q84):

NEW QUESTION # 79

What happens if the customer no longer wants the feature that the Sprint Goal intended to meet? (Choose the best answer)

- A. The Scrum Master should cancel the Sprint

- B. The executive stakeholders should determine if the Sprint should continue
- C. The Product Owner should cancel the Sprint

Answer: C

Explanation:

If the Sprint Goal becomes obsolete (e.g., a feature is no longer needed), the Product Owner can cancel the Sprint. The Scrum Guide states: "A Sprint can be cancelled if the Sprint Goal becomes obsolete. Only the Product Owner has the authority to cancel the Sprint."

- * A: Correct-the Product Owner decides.
- * B: Stakeholders advise, but don't decide.

NEW QUESTION # 80

True or False: In the Sprint Review, the Product Backlog is re-prioritized by the stakeholders.

- A. True
- B. False

Answer: B

Explanation:

The Product Backlog is managed solely by the Product Owner, not stakeholders. The Scrum Guide explains:

"The Sprint Review is a working session... The Product Owner discusses the Product Backlog as it stands." Stakeholders provide feedback during the Sprint Review, which the Product Owner may use to adjust priorities, but they don't directly re-prioritize it.

- * A: False-stakeholders don't have this authority.

NEW QUESTION # 81

Which two statements explain why the Definition of "Done" is important to the Product Owner? (Choose the best two answers)

- A. It creates transparency regarding progress within the Scrum Team
- B. It assures the Increment reviewed at the Sprint Review is usable so the Product Owner may choose to release it.
- C. It helps the Product Owner track the open work during a Sprint.
- D. It identifies undone work that can be addressed in a separate Sprint.

Answer: A,B

Explanation:

The Definition of "Done" ensures quality and usability, critical for the Product Owner's value delivery:

- * A: Per the Scrum Guide, a "Done" Increment is usable, enabling the Product Owner to decide on releases at the Sprint Review.

NEW QUESTION # 82

What are two typical activities for a Product Owner in a Sprint? (Choose the best two answers)

- A. Attend every Daily Scrum to answer functional questions on the discussed Sprint Backlog items.
- B. Update the work plan for the Developers on a daily basis.
- C. Work with the Developers on Product Backlog refinement.
- D. Create financial reporting upon the spent hours reported by the Developers.
- E. Collaborate with stakeholders, user communities, and product managers.

Answer: C,E

Explanation:

The Product Owner's role during a Sprint centers on maximizing value through Product Backlog management and stakeholder engagement, as outlined in the Scrum Guide.

- * C: Refinement is a key activity: "The Product Owner may do the above work [Product Backlog management], or may delegate the responsibility to others. Regardless, the Product Owner remains accountable." Collaborating with Developers ensures items are clear and "Ready."

- * E: Stakeholder collaboration is critical: "The Product Owner is also accountable for effective Product Backlog management, which

includes... representing the needs of many stakeholders in the Product Backlog."

* A:Attending every Daily Scrum isn't typical; it's the Developers' event, and the Product Owner attends only if needed.

* B:The Developers manage their work plan (Sprint Backlog); the Product Owner doesn't update it.

NEW QUESTION # 83

Which two (2) metrics will help a Product Owner establish that value is being delivered? (Choose the best two answers)

- A. Time to market.
- B. Velocity.
- C. Budget spent.
- D. Productivity.
- E. Customer satisfaction.

Answer: A,E

Explanation:

The Product Owner's primary accountability is maximizing the value of the product, per the Scrum Guide.

Metrics should reflect outcomes, not just internal process efficiency:

* A (Time to market):Faster delivery of Increments to the market validates value through real-world feedback, a key Scrum principle.

* B (Customer satisfaction):This directly measures whether the product meets user needs, aligning with value delivery.

* C (Velocity):While useful for Developers to gauge capacity, it's an internal metric, not a direct indicator of value.

* D (Productivity):This focuses on effort, not outcome, and isn't tied to value in Scrum.

NEW QUESTION # 84

.....
