Trustable CASPO-001 Valid Exam Guide - Pass CASPO-001 Exam

The authoritative, efficient, and thoughtful service of CASPO-001 learning question will give you the best user experience, and you can also get what you want with our CASPO-001 study materials. I hope our study materials can accompany you to pursue your dreams. If you can choose CASPO-001 test guide, we will be very happy. We look forward to meeting you. You can choose your favorite our study materials version according to your feelings. When you use CASPO-001 Test Guide, you can also get our services at any time. We will try our best to solve your problems for you. I believe that you will be more inclined to choose a good service product, such as CASPO-001 learning question. After all, everyone wants to be treated warmly and kindly, and hope to learn in a more pleasant mood.

GAQM CASPO-001 (Certified Agile Scrum Product Owner) Certification Exam is designed to test an individual's knowledge and skills as a product owner in an agile environment. Certified Agile Scrum Product Owner (CASPO) certification exam focuses on testing the candidates' ability to manage the product backlog, prioritize features, and work collaboratively with the development team. Additionally, the exam also tests the candidate's knowledge of agile principles and practices, including Scrum framework, product development, and product lifecycle management.

The CASPO certification exam consists of 100 multiple-choice questions that need to be completed in 120 minutes. CASPO-001 Exam can be taken online, and the results are available immediately after the exam is completed. The passing score for the exam is 70%, and individuals who pass the exam are granted the CASPO certification, which is valid for three years.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q77-Q82):

NEW QUESTION # 77

The time-box for a Daily Scrum is? (Choose the best answer)

- A. 4 hours.
- B. 15 minutes for a 4-week Sprint. For shorter Sprints it is usually shorter.
- C. The same time of day every day.
- **D. 15 minutes.**
- E. Two minutes per person.

Answer: D

Explanation:

The Scrum Guide defines the Daily Scrum as a 15-minute time-boxed event: "The Daily Scrum is a 15-minute event for the Developers of the Scrum Team." This duration is fixed regardless of Sprint length, ensuring consistency and focus on synchronizing work and identifying impediments. Option A refers to a scheduling practice, not the time-box. Option B is arbitrary and not Scrum-defined. Option C is far too long and contradicts the Scrum Guide. Option E incorrectly suggests variability based on Sprint length, which isn't supported-15 minutes is the standard. Thus, D is the correct answer.

NEW QUESTION # 78

Who is responsible for clearly expressing Product Backlog Items? (Choose the best answer)

- **A. The Product Owner.**
- B. The Scrum Master, or the Scrum Master may have the Developers do it.
- C. The Scrum Master.
- D. The business analyst who represents the Product Owner in the Developers.

Answer: A

Explanation:

The Scrum Guide explicitly states: "The Product Owner is accountable for effective Product Backlog management, which includes... clearly expressing Product Backlog items." This responsibility ensures that the items reflect stakeholder needs and are understandable to the Developers. Option B is incorrect-the Scrum Master facilitates and coaches, not manages the Product Backlog. Option C is wrong-neither the Scrum Master nor Developers are accountable for this; it's the Product Owner's role. Option D introduces a "business analyst" role, which isn't part of Scrum; the Product Owner directly handles this duty without delegation to a proxy. Thus, A is correct.

NEW QUESTION # 79

Which statement best describes the Sprint Backlog as an outcome of the Sprint Planning? (Choose the best answer)

- A. It is a complete list of all work to be done in a Sprint.
- B. It is ordered by the Product Owner.
- **C. It is the Developers' plan for the Sprint.**
- D. Each task is estimated in hours.
- E. Every item has a designated owner.

Answer: C

Explanation:

The Scrum Guide defines the Sprint Backlog as "a plan by and for the Developers" that includes selected Product Backlog items and a plan to deliver the Sprint Goal. Option C accurately reflects this ownership and purpose. Option A is too absolute-while it's a plan, it's not necessarily "complete" as it can evolve during the Sprint. Option B is incorrect-Scrum does not mandate hour-based estimates; estimation is up to the Developers' discretion. Option D is false-items don't require individual owners; the Developers collectively own the Sprint Backlog. Option E is wrong-the Product Owner orders the Product Backlog, not the Sprint Backlog, which is managed by the Developers. Thus, C is the best description.

NEW QUESTION # 80

How much work must the Developers do to a Product Backlog item it selects for a Sprint? (Choose the best answer)

- A. All development work and at least some testing.
- **B. As much as it has told the Product Owner will be done for every Product Backlog item it selects in conformance with the Definition of "Done".**
- C. As much as it can fit into the Sprint. Any remaining work will be transferred to a subsequent Sprint.
- D. A proportional amount of time on analysis, design, programming, testing, and documentation.

Answer: B

Explanation:

The Scrum Guide mandates that all work selected for a Sprint must meet the Definition of "Done": "The Increment is the sum of all the Product Backlog items completed during a Sprint and the value of the increments of all previous Sprints." During Sprint Planning, the Developers forecast what they can deliver as a "Done" Increment, committing to that scope. Option A reflects this accountability. Option B suggests incomplete work carries over, which violates the Increment's usability requirement. Option C is too vague and not tied to "Done." Option D imposes a process Scrum doesn't require. Thus, A is correct.

NEW QUESTION # 81

What is the tactic a Scrum Master should use to divide a group of 100 people into multiple Scrum Teams? (Choose the best answer)

- A. Create teams based on their skills across multiple layers (such as database, UI, etc.).
- B. Ask the Product Owner to assign the people to teams.
- **C. Ask the Developers to divide themselves into teams.**

Answer: C

Explanation:

The Scrum Guide emphasizes self-organization and self-management as core principles for the Scrum Team, particularly the Developers: "They are self-managing, meaning they internally decide who does what, when, and how." When forming multiple Scrum Teams from a large group, the Scrum Master's role is to facilitate and coach, not dictate. Option C aligns with this by empowering the Developers to self-organize into teams, fostering ownership and collaboration. Option A (skill-based division) is too prescriptive and risks creating component teams rather than cross-functional ones, which Scrum favors. Option B shifts responsibility to the Product Owner, whose role is Product Backlog management, not team formation. Thus, C is the best tactic.
