General pest management 7a

To control pests of structures, pesticide application is the only means for suppressing pests.
False
When technicians use other practices in addition to pesticide use for controlling pests: These practices often reduce pesticide use or make such use a secondary operation of the program.
The title technician is used in this manual to denote:
All of the above.
Which Michigan regulation requires that pesticide applications be made in a manner that prevents off-target discharges of pesticides, and that pesticide application equipment be properly calibrated and in sound mechanical condition?
Regulation 637
Which Michigan legislation gives the MDARD authority to certify commercial applicators and to prescribe standards for certification?
Natural Resources and Environmental Protection Act
Which federal legislation specifies that all pesticides be classified as either general-use or restricted-use?
FIFRA
Which Michigan legislation establishes the types of certified applicators and expands the pesticide record-keeping requirements?
Regulation 636
Structural pest managers do not have to concern themselves with the possibility of harming endangered species.
False
In Michigan, a vehicle used to transport pesticides for a pesticide application business must:
Have the name of the pesticide applicator firm and the business phone number printed on the exterior
In Michigan, commercial pesticide applicators must provide their customer written information in the Applicator Service Agreement including:
All of the above.
Describe what type of pesticide information should be a part of the risk and benefit information provided to customers.
Definition, general description, why pesticide is used, general toxicity information (i.e. compound type, where applied, exposure information, amount/type applied, label compliance), precautionary measures and instructions to customer on site preparation, precautions, etc.
If requested, a commercial pesticide applicator must provide the customer with pesticide product labels and MSDS sheets.
True
Pesticide drift is not a concern to Category 7A applicators.
False
Notification and posting requirements include:

It-Passports平時では、OCPE専門試験の審査に数か月から1年かかることもありますが、Category-7A-General-and-Household-Pest-Control試験ガイドを使用すれば、試験の前に20〜30時間かけて復習し、Category-7A-General-and-Household-Pest-Control学習教材を使用すれば、Category-7A-General-and-Household-Pest-Control学習資料にはすべての重要なテストポイントが既に含まれているため、他のレビュー資料は不要になります。同時に、Category-7A-General-and-Household-Pest-Control学習教材は、復習するためのまったく新しい学習方法を提供します-演習の過程で知識を習得しましょう。Pesticide Applicator Category 7A General and Household Pest Control Exam試験に簡単かつゆっくと合格します。

OCPE Pesticide Applicator Category 7A General and Household Pest Control Exam 認定 Category-7A-General-and-Household-Pest-Control 試験問題 (Q68-Q73):

質問 # 68

Which of the following would be an example of the IPM practice of cultural controls?

- A. Caulking
- **B. Garbage elimination**
- C. Threshold numbers elevation

正解: B

解説:

Cultural controls in IPM involve modifying the environment to make it less favorable for pests.

Garbage elimination is a cultural control because it removes food sources that attract pests like roaches or flies, as noted in the General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 4: IPM). Option A (caulking) is a mechanical control, as it physically blocks pest entry.

Option B (threshold numbers elevation) refers to monitoring, not a cultural practice.

質問 # 69

___ pressure is suggested for indoor use with a handheld sprayer.

- **A. Low**
- B. A power sprayer and high
- C. High

正解: A

解説:

For indoor applications with a handheld sprayer, low pressure is recommended to minimize overspray and reduce the risk of pesticide drift onto non-target areas, such as furniture or food surfaces. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 5: Pesticide Application) advises using low-pressure settings (typically under 50 psi) for indoor crack-and-crevice or spot treatments. Option A (high pressure) and Option B (power sprayer and high) are more suited for outdoor or large-scale applications, not indoor household pest control.

質問 # 70

The term commercial pesticide applicator includes anyone applying pesticides as a service, and the commercial pesticide applicator must be licensed ___ pesticides.

- A. Only to apply restricted use
- **B. To apply any**
- C. Only to apply general use

正解: B

解説:

In New Jersey, a commercial pesticide applicator is defined as anyone applying pesticides as a service, whether for hire or as part of their job (N.J.A.C. 7:30-1.2). This includes both general use and restricted use pesticides (RUPs). A Category 7A applicator must be licensed to apply any pesticide, as their work may involve both types depending on the pest and situation. Option A is incorrect because it excludes RUPs, which applicators may need to use. Option B is incorrect because it excludes general use pesticides, which are commonly used in household pest control.

質問 # 71

Pesticide labels often specify the type of respirator to be used by its TC designation. Which of the following is the chemical cartridge respirator designation?

- A. TC-19
- B. TC-84
- **C. TC-23**

正解: C

解説:

The TC designation is assigned by the National Institute for Occupational Safety and Health (NIOSH) to classify respirators. TC-23 designates chemical cartridge respirators, which are used to protect against specific gases and vapors, as specified on pesticide labels for Category 7A applications. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 3: Pesticide Safety) notes that TC-23 respirators are commonly required for pesticide applications involving volatile chemicals. Option A (TC-84) refers to particulate respirators (e.g., N95 masks). Option C (TC-19) is not a valid designation for pesticide use.

質問 # 72

FIRST AID for TEMPRID if swallowed includes:

- A. Giving sips of water even if victim is unconscious
- **B. Sipping water if conscious but no induced vomiting unless told to do so by poison control center or doctor**
- C. Inducing vomiting if conscious

正解: B

解説:

The TEMPRID SC label provides first aid instructions: if swallowed, the victim should sip water if conscious, but vomiting should not be induced unless directed by a poison control center or doctor. This aligns with standard pesticide safety protocols in the General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 3: Pesticide Safety). Option A (inducing vomiting) can be dangerous without professional guidance. Option B (giving water if unconscious) is incorrect, as no liquids should be given to an unconscious person.

質問 # 73

.....

Category-7A-General-and-Household-Pest-Control試験トレーニングの開発者は、受験者の視点に立って、各ユーザーがCategory-7A-General-and-Household-Pest-Control学習教材を調整するための条件を満たします。さらに、Category-7A-General-and-Household-Pest-Controlガイドの質問はどんどん安くなっており、より多く購入してより多くお届けします。購入する顧客が多いほど、割引は大きくなります。Category-7A-General-and-Household-Pest-Controlの実際の試験ガイドの優位性をユーザーに提供するために、思いやりのあるサービスも提供します。ユーザーはCategory-7A-General-and-Household-Pest-Controlの学習教材に関連する質問があり、すぐにスタッフの助けを得ることができますマナー。
