Salesforce Certified B2C Commerce Cloud Developer Sample Questions (Q127-Q132):

NEW QUESTION # 127

A developer has these requirements for out-of-stock products:

Save the SKUs of the out-of-stock products that the customer is interested in
Save the customer email regardless if the customer is a guest or registered
Email the customer when the product is back-in-stock
Which step should the developer perform as part of the solution to achieve the requirements?

- A. Create a new custom object type that has a set-of-string type custom attribute for the SKUs and a string for the email field.
- **B. Create a new set-of-string type custom attribute to the system object type Product to save all the customer email addresses for back-in-stock notification.**
- C. Create a new system object type that has a set-of-string type custom attribute for the SKUs and a string for the email field.
- D. Create a new set-of-string type custom attribute to the system object type Profile to save all the SKUs and use the existing email field for the email.

Answer: B

NEW QUESTION # 128

A developer needs to perform the same additional checks before completing multiple routes in a custom controller, in order to decide whether to render a template or redirect the user to a different page.

According to SFRA best practices, what is the correct approach to improve code reusability in this scenario?

- A. Replace the existing routes by creating a controller in separate new cartridge.
- **B. Define a new middleware function and use it in the existing routes.**
- C. Use the superModule property in the existing routes to extend their functionality.
- D. Append a new function to all the existing routes with the server module.

Answer: B

NEW QUESTION # 129
