Topic 6	<ul style="list-style-type: none"> • Managing Clean Core: It focuses on the application of core principles to ERP for enhancing business process agility.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q54-Q59):

NEW QUESTION # 54

Which catalogue types require the use of selection sets? Correct 2

- A. Actions
- B. Characteristic
- C. Defect type
- D. Tasks
- E. Usage decision

Answer: B,E

NEW QUESTION # 55

Which of the following API types does SAP recommend to use to achieve clean core integrations? Note: There are 2 correct answers to this question.

- A. IDoc
- B. RFC
- C. OData
- D. SOAP

Answer: C,D

Explanation:

For clean core integrations in SAP S/4HANA (minimizing custom code):

* SOAP (A): SAP recommends SOAP APIs for robust, secure integrations (e.g., enterprise services), supporting clean core by leveraging standard interfaces.

* OData (D): OData is the preferred RESTful API type for S/4HANA, enabling flexible, standard integrations (e.g., via SAP Gateway), a cornerstone of clean core.

* RFC (B): Remote Function Calls are legacy and less favored for clean core due to tight coupling.

* IDoc (C): IDocs are traditional EDI-focused, not prioritized for modern clean core integrations.

Thus, "SOAP" and "OData" are the correct answers. References: SAP Help Portal - "Integration APIs in S/4HANA"; SAP S/4HANA Developer Guide - "Clean Core APIs".

NEW QUESTION # 56

You are using quantitative inspection characteristics during a production results recording. What are some of the results confirmation control indicators available for quantitative results? Note: There are 3 correct answers to this question.

- A. Summarized recording

- B. Mean value
- C. Single result
- D. Classed recording
- E. Mean value and standard deviation

Answer: A,B,C

NEW QUESTION # 57

Your customer requires the lab to use quantitative characteristics during a production result recording. Which result confirmation control indicators are available for quantitative results

- A. Summarized
- B. Mean value
- C. Class confirmation
- D. Tolerance keys
- E. Single value

Answer: A,C,E

NEW QUESTION # 58

You have configured the system so that inspection lots are created for delivery items automatically. What does the system do if the sample size of the inspection lot has not been calculated and you remove the respective delivery item?

- A. The system marks the lot for cancellation
- B. The system cancels the lot
- C. The system posts a usage decision
- D. The system sends a workflow message to the quality technician

Answer: B

Explanation:

When inspection lots are created automatically for delivery items (inspection type 10) and the sample size isn't calculated (status CRTD):

* The System Cancels the Lot (B): If the delivery item is removed (e.g., via VL02N), the associated inspection lot is canceled automatically because its reference (the delivery item) no longer exists. The system updates the lot status to "CANC" (SPRO > QM > Quality Inspection > Inspection Lot Creation

> Define Follow-Up Actions). This is standard behavior to maintain data consistency.

* Posts a Usage Decision (A): UD (transaction QA11) requires sample calculation and results, which hasn't occurred here.

* Marks the Lot for Cancellation (C): The lot is fully canceled, not just marked, in this scenario.

* Sends a Workflow Message (D): Workflow notifications require custom configuration and aren't standard here.

Thus, "The system cancels the lot" is the correct answer. References: SAP Help Portal - "Inspection Lot Processing for Deliveries"; SAP S/4HANA QM User Guide - "Lot Cancellation".

NEW QUESTION # 59

.....

Confronting a tie-up during your review of the exam? Feeling anxious and confused to choose the perfect C_TS414_2023 latest dumps to pass it smoothly? We understand your situation of susceptibility about the exam, and our C_TS414_2023 test guide can offer timely help on your issues right here right now. Without tawdry points of knowledge to remember, our experts systematize all knowledge for your reference. You can download our free demos and get to know synoptic outline before buying. We offer free demos as your experimental tryout before downloading our Real C_TS414_2023 Exam Questions. For more textual content about practicing exam questions, you can download our products with reasonable prices and get your practice begin within 5 minutes.
