Valid XDR-Analyst Vce Dumps | Latest XDR-Analyst Demo

What's more, part of that ExamsLabs XDR-Analyst dumps now are free: https://drive.google.com/open?id=1S36SaAwVelwZpGa0sO0iiOhVTKILsjqi

ExamsLabs XDR-Analyst study torrent is popular in IT candidates, why does this XDR-Analyst training material has attracted so many pros? Now, if you receive XDR-Analyst prep torrent, you will be surprised by available, affordable, updated and best valid Palo Alto Networks XDR-Analyst Download Pdf dumps. After using the XDR-Analyst latest test collection, you will never be fair about the XDR-Analyst actual test. The knowledge you get from XDR-Analyst dumps cram can bring you 100% pass.

In order to provide users with the most abundant XDR-Analyst learning materials, our company has collected a large amount of information. And set up a professional team to analyze this information. So our XDR-Analyst study questions contain absolutely all the information you need. At the same time, not only you will find the full information in our XDR-Analyst Practice Guide, but also you can discover that the information is the latest and our XDR-Analyst exam braindumps can help you pass the exam for sure just by the first attempt.

Palo Alto Networks XDR-Analyst Exam Dumps - Secret Hacks To Crack XDR-Analyst Exam

Our XDR-Analyst exam questions just focus on what is important and help you achieve your goal. With high-quality XDR-Analyst guide materials and flexible choices of learning mode, they would bring about the convenience and easiness for you. Every page is carefully arranged by our experts with clear layout and helpful knowledge to remember. In your every stage of review, our XDR-Analyst practice prep will make you satisfied.

Palo Alto Networks XDR Analyst Sample Questions (Q70-Q75):

NEW QUESTION # 70
Where can SHA256 hash values be used in Cortex XDR Malware Protection Profiles?

- A. in the Linux Malware Protection Profile to indicate allowed Java libraries
- B. in the Windows Malware Protection Profile to indicate allowed executables
- C. in the macOS Malware Protection Profile to indicate allowed signers
- D. SHA256 hashes cannot be used in Cortex XDR Malware Protection Profiles

Answer: B

Explanation:
Cortex XDR Malware Protection Profiles allow you to configure the malware prevention settings for Windows, Linux, and macOS endpoints. You can use SHA256 hash values in the Windows Malware Protection Profile to indicate allowed executables that you want to exclude from malware scanning. This can help you reduce false positives and improve performance by skipping the scanning of known benign files. You can add up to 1000 SHA256 hash values per profile. You cannot use SHA256 hash values in the Linux or macOS Malware Protection Profiles, but you can use other criteria such as file path, file name, or signer to exclude files from scanning. Reference:
Malware Protection Profiles
Configure a Windows Malware Protection Profile
PCDRA Study Guide

NEW QUESTION # 71
Which built-in dashboard would be the best option for an executive, if they were looking for the Mean Time to Resolution (MTTR) metric?

- A. Security Manager Dashboard
- B. Data Ingestion Dashboard
- C. Security Admin Dashboard
- D. Incident Management Dashboard

Answer: D

Explanation:
The Incident Management Dashboard provides a high-level overview of the incident response process, including the Mean Time to Resolution (MTTR) metric. This metric measures the average time it takes to resolve an incident from the moment it is created to the moment it is closed. The dashboard also shows the number of incidents by status, severity, and assigned analyst, as well as the top alerts by category, source, and destination. The Incident Management Dashboard is designed for executives and managers who want to monitor the performance and efficiency of their security teams. Reference: [PCDRA Study Guide], page 18.

NEW QUESTION # 72
How does Cortex XDR agent for Windows prevent ransomware attacks from compromising the file system?

- A. by patching vulnerable applications.
- B. by encrypting the disk first.
- C. by retrieving the encryption key.
- D. by utilizing decoy Files.

Answer: D

Explanation:
Cortex XDR agent for Windows prevents ransomware attacks from compromising the file system by utilizing decoy files. Decoy files are randomly generated files that are placed in strategic locations on the endpoint, such as the user's desktop, documents, and pictures folders. These files are designed to look like valuable data that ransomware would target for encryption. When Cortex XDR agent detects that a process is attempting to access or modify a decoy file, it immediately blocks the process and alerts the administrator. This way, Cortex XDR agent can stop ransomware attacks before they can cause any damage to the real files on the endpoint. Reference:
Anti-Ransomware Protection

NEW QUESTION # 73
What is the outcome of creating and implementing an alert exclusion?

- A. The Cortex XDR agent will not create an alert for this event in the future.
- B. The Cortex XDR agent will allow the process that was blocked to run on the endpoint.
- C. The Cortex XDR console will delete those alerts and block ingestion of them in the future.
- D. The Cortex XDR console will hide those alerts.

Answer: D

Explanation:
The outcome of creating and implementing an alert exclusion is that the Cortex XDR console will hide those alerts that match the exclusion criteria. An alert exclusion is a policy that allows you to filter out alerts that are not relevant, false positives, or low priority, and focus on the alerts that require your attention. When you create an alert exclusion, you can specify the criteria that define which alerts you want to exclude, such as alert name, severity, source, or endpoint. After you create an alert exclusion, Cortex XDR will hide any future alerts that match the criteria, and exclude them from incidents and search query results. However, the alert exclusion does not affect the behavior of the Cortex XDR agent or the security policy on the endpoint. The Cortex XDR agent will still create an alert for the event and apply the appropriate action, such as blocking or quarantining, according to the security policy. The alert exclusion only affects the visibility of the alert on the Cortex XDR console, not the actual protection of the endpoint. Therefore, the correct answer is B, the Cortex XDR console will hide those alerts12 Reference:
Alert Exclusions
Create an Alert Exclusion Policy

NEW QUESTION # 74
Where would you go to add an exception to exclude a specific file hash from examination by the Malware profile for a Windows endpoint?

- A. Find the Malware profile attached to the endpoint, Under Portable Executable and DLL Examination add the hash to the allow list.
- B. In the Action Center, choose Allow list, select new action, select add to allow list, add your hash to the list, and apply it.
- C. Find the exceptions profile attached to the endpoint, under process exceptions select local analysis, paste the hash and save.
- D. From the rules menu select new exception, fill out the criteria, choose the scope to apply it to, hit save.

Answer: B

Explanation:
To add an exception to exclude a specific file hash from examination by the Malware profile for a Windows endpoint, you need to use the Action Center in Cortex XDR. The Action Center allows you to create and manage actions that apply to endpoints, such as adding files or processes to the allow list or block list, isolating or unisolating endpoints, or initiating live terminal sessions. To add a file hash to the allow list, you need to choose Allow list, select new action, select add to allow list, add your hash to the list, and apply it. This will prevent the Malware profile from scanning or blocking the file on the endpoints that match the scope of the action. Reference: Cortex XDR 3: Responding to Attacks1, Action Center2

NEW QUESTION # 75
.....

Our web-based practice test is accessible from anywhere with an internet connection, which means you can take it at your convenience. This Palo Alto Networks XDR-Analyst Practice Test is designed to simulate the actual exam and help you become familiar with the test format. You can access the web-based practice exam from anywhere with an internet connection to study on the go or from the comfort of your own home. You can receive your mock exam result instantly.
