If the clients need to take note of the important information they need they can write them on the papers to be convenient for reading or print them on the papers. The clients can read our OGBA-101 Study Materials in the form of PDF or on the printed papers. Thus the clients learn at any time and in any place and practice the OGBA-101 exam practice guide repeatedly.

The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q67-Q72):

NEW QUESTION # 67

Complete the sentence. The four dimensions used to scope an architecture are:

- A. Business, Data, Application, Technology
- B. Strategy, Portfolio, Project, Solution Delivery
- C. Breadth, Depth, Time Period, Architecture Domains
- D. Strategy, Segment, Capability, Budget

Answer: C

Explanation:

In TOGAF, the dimensions for scoping an architecture are Breadth (coverage across the organization), Depth (level of detail), Time Period (horizon of the architecture), and Architecture Domains (the four architecture domains of Business, Data, Application, and Technology). These dimensions ensure comprehensive scoping and contextual alignment.

References: TOGAF Standard, Chapter on Scoping the Architecture.

According to TOGAF, defining the scope of an architecture involves considering these four key dimensions:

* **Breadth:** This refers to how much of the enterprise is covered by the architecture. It defines the boundaries of the architecture, which could range from a single department to the entire organization, or even extending to external partners.

* **Depth:** This dimension determines the level of detail included in the architecture. It can range from high-level conceptual models to detailed specifications of individual components.

* **Time Period:** This specifies the timeframe for the architecture, including the intended lifespan of the architecture and any planned phases or iterations. It addresses questions like "What is the architecture for now?" and "What should the architecture look like in the future?"

* **Architecture Domains:** This dimension defines which of the four architecture domains (Business, Data, Application, Technology) are included in the scope. The selection of domains depends on the specific needs and objectives of the architecture development effort.

NEW QUESTION # 68

Which of the following is a benefit of developing a TOGAF business scenario?

- A. It provides general rules and guidelines to support planning at the enterprise level.
- B. It provides an organizing framework for the change activity in a project.
- C. It provides a versatile approach to business planning.
- D. It can be an important aid to vendors in delivering appropriate solutions.

Answer: D

Explanation:

Developing a TOGAF business scenario provides several benefits, particularly in aiding vendors to deliver appropriate solutions.

Here's a detailed explanation:

* **TOGAF Business Scenarios:**

* Business scenarios are used to capture and describe business requirements, helping to identify and understand business needs and challenges.

* **Role in Vendor Engagement:**

* **Clarity of Requirements:** Business scenarios provide clear and detailed descriptions of the business context, needs, and requirements. This helps vendors understand what solutions are necessary to address specific business challenges.

* **Alignment of Solutions:** By providing a comprehensive view of the business environment and requirements, business scenarios ensure that the solutions proposed by vendors are aligned with the actual business needs and strategic goals.

* **TOGAF ADM References:**

* **Phase A: Architecture Vision:** In this phase, business scenarios are developed to capture stakeholder concerns and requirements, providing a basis for the architecture vision.

* **Vendor Communication:** Business scenarios are communicated to vendors to ensure that their solutions fit within the overall architecture and meet the specific requirements of the business.

* Benefits:

* Effective Solution Design: Vendors can design solutions that are tailored to the specific needs of the business, reducing the risk of misalignment and ensuring better outcomes.

* Improved Collaboration: Business scenarios facilitate better collaboration between the enterprise and vendors by providing a common understanding of the requirements and expected outcomes.

In summary, developing a TOGAF business scenario aids vendors in delivering appropriate solutions by providing clear and detailed descriptions of business requirements, ensuring alignment with business needs and strategic goals.

NEW QUESTION # 69

What component of the Architecture Repository is an architectural representation of SBBs supporting the Architecture Landscape?

- A. Solutions Repository
- **B. Solutions Landscape**
- C. Solutions Library
- D. Solutions Continuum

Answer: B

Explanation:

The component of the Architecture Repository that is an architectural representation of SBBs supporting the Architecture Landscape is the Solutions Landscape³. The Solutions Landscape presents an architectural representation of the Solution Building Blocks (SBBs) that support the Architecture Landscape and have been planned or deployed by the enterprise³. The Solutions Landscape shows how SBBs are mapped to Architecture Building Blocks (ABBs) in different architecture domains and levels³. The Solutions Landscape can help to ensure consistency and alignment between the Architecture Landscape and the solutions that implement it.

NEW QUESTION # 70

Which deliverable is first produced In Phase A, also updated In Phase E, and helps the architect to understand the baseline and target for the enterprise?

- A. Stakeholder Map
- B. Architecture Contracts
- **C. Capability Assessment**
- D. Consolidated Gaps, Solutions, and Dependencies matrix

Answer: C

NEW QUESTION # 71

Which of the following best describes a business capability map?

- A. A self-contained view of the business that is independent of organizational structure, business processes, systems and applications.
- B. A reference model that provides a conceptual definition of all the key building blocks within a business architecture
- C. The highest-level description of an organization, covering all missions and functions of the business.
- **D. A holistic representation of capabilities, including end-to-end delivery value, and the relationships between these capabilities.**

Answer: D

Explanation:

A business capability map is a comprehensive representation that showcases an organization's abilities in a structured manner. It identifies and illustrates the various business capabilities that allow the enterprise to function and deliver value. These capabilities are often defined independently of the organizational structure, processes, or technology, focusing instead on what the business does and can do. This map encompasses the end-to-end value delivery and how different capabilities interrelate and support one another, thus providing a holistic view of the business's functional abilities.
