## Valid MB-500 Latest Braindumps Free & Passing MB-500 Exam is No More a Challenging Task

According to different kinds of questionnaires based on study condition among different age groups, our MB-500 test prep is totally designed for these study groups to improve their capability and efficiency when preparing for Microsoft Dynamics 365: Finance and Operations Apps Developer MB-500 Exams, thus inspiring them obtain the targeted Microsoft MB-500 certificate successfully.

### Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q160-Q165):

#### NEW QUESTION # 160

A company uses Dynamics 365 Unified Operations.

You need to integrate the system with third-party applications.

Which data integration strategies should you use? To answer, drag the appropriate data integration strategies to the correct scenarios. Each strategy may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Strategies        | Scenario  | Strategy |
|-------------------|---|----------|
| OData endpoint    | Users have a customer portal and must be able to query the status of orders for customers in near real time. Less than 500 status requests occur per hour.  |          |
| batch data API    | Employees use a third-party app to record customer orders. You must upload orders to the system once each hour. The company processes approximately 10,000 orders each hour.  |          |
| custom service    | Employees use a third-party software as a service app to manage delivery schedules. The software must be able to calculate and obtain inventory availability for deliveries in real time. Approximately 5,000 requests occur each hour. |          |
| Excel integration |   |          |

**Answer:**

Explanation:

| Strategies        | Scenario  | Strategy       |
|-------------------|---|----------------|
| OData endpoint    | Users have a customer portal and must be able to query the status of orders for customers in near real time. Less than 500 status requests occur per hour.  | custom service |
| batch data API    | Employees use a third-party app to record customer orders. You must upload orders to the system once each hour. The company processes approximately 10,000 orders each hour.  | batch data API |
| custom service    | Employees use a third-party software as a service app to manage delivery schedules. The software must be able to calculate and obtain inventory availability for deliveries in real time. Approximately 5,000 requests occur each hour. | OData endpoint |
| Excel integration |   |                |

Explanation

### Scenario

### Strategy

Users have a customer portal and must be able to query the status of orders for customers in near real time. Less than 500 status requests occur per hour.

custom service

Employees use a third-party app to record customer orders. You must upload orders to the system once each hour. The company processes approximately 10,000 orders each hour.

batch data API

Employees use a third-party software as a service app to manage delivery schedules. The software must be able to calculate and obtain inventory availability for deliveries in real time. Approximately 5,000 requests occur each hour.

OData endpoint

Box 1: custom service

Custom service peak data volume is 1,000 records per hour.

Box 2: batch data API

This scenario is best implemented by using batch data APIs, which has a peak data volume of 300,000 records per hour.

Box 3: OData endpoint

Peak data volume for reading Odata status of orders is 5,000 records per hour.

This scenario is best implemented by using the OData service endpoints to read order status information.

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/data-entities/integration-overview>

### NEW QUESTION # 161

You are a Dynamics 365 Finance developer. You have the following Extended Data Types (EDTs):

| Name        | Comments                 |
|-------------|--------------------------|
| AccountBase | Root EDT                 |
| AccountId   | Derives from AccountBase |

You plan to modify the EDT properties by using an extension.

You need to determine which operations can be performed.

Which operation is possible?

- A. Create an extension for AccountBase and decrease the field size.
- B. Create a derived EDT for AccountId and decrease the field size.
- C. Create an extension for AccountBase and increase the field size.
- D. Create an extension for AccountId and increase the field size.

**Answer: C**

Explanation:

You can only set the new String size to a value equal to or larger than the base EDT value.

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/extensibility/modify-edt>

### NEW QUESTION # 162

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an enumeration named truckStatus that has the following statuses:

Empty

Loaded

Completed

You have the following code:

```

switch (trunkTable.TruckStatus)
{
    case TruckStatus::Empty:
        Info("1");
        break;
    case TruckStatus::Loaded:
        Info("2");
        break;
    case TruckStatus::Completed:
        Info("3");
        break;
}

```

You need to extend this enumeration and add the following statuses to the enumeration: Quarantine, InTransit. You must then modify code that validates the switch statement.

Solution: Add a post handler to the method that checks the enumeration and logic for your new enumeration values using the enumeration value.

```

if ( truckTable.TruckStatus == TruckStatus::Quarantine || truckTable.TruckStatus == TruckStatus::InTransit)
{
    Info("Extended");
}

```

Does the solution meet the goal?

- A. No
- B. Yes.

**Answer: B**

### NEW QUESTION # 163

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses Dynamics 365 finance and operations apps.

You have a custom enumeration named CarType. The enumeration has the following elements: Sedan, SUV.

You must extend CarType and add a new element named MUV to CarType.

You need to develop a solution that meets the requirements.

Solution: Set the Is Extensible property to true for the CarType enumeration. Create an extension for the CarType base enumeration to add the MUV element.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

### NEW QUESTION # 164

You have the following code:

```

public void CompareValues ()
{
    Date myDate = str2date('01/08/1901', 123);
    boolean result1, result2, result3;
    result1 = (myDate + 1 == str2date('02/08/1901', 123));
    result2 = (int2str(real2int(myDate)) + 1 == str2date('02/08/1901', 123));
}

```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
 NOTE: Each correct selection is worth one point.

| Statement                   | Yes                   | No                    |
|-----------------------------|-----------------------|-----------------------|
| The value of result1 = true | <input type="radio"/> | <input type="radio"/> |
| The value of result2 = true | <input type="radio"/> | <input type="radio"/> |

Answer:

Explanation:

| Statement                   | Yes                              | No                               |
|-----------------------------|----------------------------------|----------------------------------|
| The value of result1 = true | <input checked="" type="radio"/> | <input type="radio"/>            |
| The value of result2 = true | <input type="radio"/>            | <input checked="" type="radio"/> |

Explanation:

| Statement                   | Yes                              | No                               |
|-----------------------------|----------------------------------|----------------------------------|
| The value of result1 = true | <input checked="" type="radio"/> | <input type="radio"/>            |
| The value of result2 = true | <input type="radio"/>            | <input checked="" type="radio"/> |

Box 1: Yes

Add 1 to a date adds one day.

Box 2: No

You cannot do a real2int conversion on a Date.
