## 최신 Microsoft Certified AB-730 무료샘플문제 (Q101-Q106):

질문 # 101

You create a Microsoft 365 Copilot notebook and add a file named Process.docx from a Microsoft SharePoint site as a reference. Yesterday, a user updated Process.docx in the SharePoint site.

What will occur when you chat in the notebook?

- A. The chat will reference only the original version of Process.docx.
- B. The chat will reference both versions of Process.docx.
- C. The chat will reference the most recent version of Process.docx.

정답: C

설명:

When a file from a Microsoft SharePoint site is added as a reference in a Microsoft 365 Copilot notebook, Copilot links to the document rather than copying it. Consequently, when the prompt runs again, Copilot automatically reads the most recent version of the file, ensuring updates are reflected.

### 질문 # 102

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Microsoft 365 Copilot is trained on your organization's business data.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot can summarize emails in mailboxes that were shared with you.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot leverages the security framework defined in Microsoft 365 to provide you with access to emails, documents, and other enterprise data.	<input type="radio"/>	<input type="radio"/>

### 질문 # 103

You need to access Microsoft 365 Copilot from a web browser. Which URL should you use?

- A. <https://myapps.microsoft.com>
- B. <https://m365.cloud.microsoft>
- C. <https://copilotstudio.microsoft.com>
- D. <https://myaccount.microsoft.com>

정답: B

설명:

Microsoft 365 Copilot can be accessed via its dedicated web experience for enterprise users. The correct web entry point for Microsoft 365 Copilot is <https://m365.cloud.microsoft>, which provides authenticated access to Copilot features within the Microsoft 365 environment.

This URL routes users into the Microsoft 365 ecosystem where Copilot integrates with organizational data such as SharePoint,

OneDrive, Teams, and Outlook. It ensures that users are authenticated through Microsoft Entra ID and that access controls are enforced according to tenant policies.

Option B refers to Copilot Studio, which is used to build and manage custom copilots and agents rather than access the Microsoft 365 Copilot chat experience. Option C (My Apps) is a general application launcher portal. Option D is an incorrect account management URL and does not provide Copilot access.

Therefore, to access Microsoft 365 Copilot from a web browser, the correct URL is <https://m365.cloud.microsoft>.

Answer Area

Microsoft

Statements

You can delete your conversation history only if your administrator allows you to do so.

When you delete a conversation, the associated files stored in Microsoft SharePoint are also deleted.

When you uninstall a Copilot agent, all the conversations associated with the agent are retained.

Yes No

Yes No

Yes No

Explanation:

Microsoft 365 Copilot operates within enterprise governance and compliance controls. For conversation history, tenant administrators can configure retention and deletion policies. Therefore, users can delete conversation history only if allowed by administrative policy, making Statement 1 correct.

Deleting a Copilot conversation removes the chat interaction but does not delete underlying source files such as documents stored in SharePoint or OneDrive. These files are governed independently by Microsoft 365 storage and retention policies. Hence, Statement 2 is incorrect.

When a Copilot agent is uninstalled, it removes access to the agent interface but does not delete previously generated conversations. Conversations are stored as part of user activity history and remain available unless explicitly deleted (subject to policy). Therefore, Statement 3 is correct.

Thus, the correct responses are Yes, No, Yes .
