### NEW QUESTION # 106

Northern Trail Outfitters wants to improve overall responsiveness to customers.

Which Dispatch technique should the Consultant implement to provide the greatest schedule flexibility?

- **A. Enable Drip-feed to dispatch the next appointments.**
- B. Shuffle daily work manually via the Gantt.
- C. Leverage Resource Schedule Optimization.
- D. Configure the Auto Dispatch scheduled job.

**Answer: A**

Explanation:

Drip Feed Dispatching is a feature that allows dispatching groups of service appointments to technicians at regular intervals instead of all at once[121]. Enabling Drip-feed to dispatch the next appointments would allow Northern Trail Outfitters to improve overall responsiveness to customers by providing the greatest schedule flexibility and allowing technicians to adjust their schedules based on real-time conditions[122].

Shuffling daily work manually via the Gantt would not provide the greatest schedule flexibility. The Gantt is a tool that allows dispatchers to view and manage service appointments on a timeline[123]. Leveraging Resource Schedule Optimization would not provide the greatest schedule flexibility. Resource Schedule Optimization is a feature that allows optimizing service appointments based on predefined criteria such as travel time or priority[124]. Configuring the Auto Dispatch scheduled job would not provide the greatest schedule flexibility. Auto Dispatch is a feature that allows automatically assigning service appointments to resources based on predefined criteria such as skills or availability[125].
