Test Salesforce PDI Free - PDI Test Testking

our PDI actual exam has won thousands of people's support. All of them have passed the exam and got the certificate. They live a better life now. Our PDI study guide can release your stress of preparation for the test. Our PDI Exam Engine is professional, which can help you pass the exam for the first time. If you can't wait getting the certificate, you are supposed to choose our PDI study guide.

Salesforce Platform Developer I (PDI) Sample Questions (Q120-Q125):

NEW QUESTION # 120

The sales management team requires that the lead source field of the Lead record be populated when Lead is converted. What would a developer use to ensure that a user populates the Lead source field?

- A. Validation rule
- B. Process builder
- C. Workflow rule
- D. Formula field

Answer: A

NEW QUESTION # 121

Universal Containers wants to automatically assign new cases to the appropriate support representative based on the case origin. They have created a custom field on the Case object to store the support representative name.

What is the best solution to assign the case to the appropriate support representative?

- A. Use a validation rule on the Case object.
- **B. Use an Assignment Flow element.**
- C. Use a trigger on the Case object.
- D. Use a formula field on the Case object.

Answer: B

Explanation:

* A Flow with an Assignment element is the best declarative solution to assign cases based on criteria such as Case Origin. It can automatically evaluate the value of the Case Origin and assign the support representative.

* Why not other options?

* A: Using a trigger is a programmatic approach and less ideal when declarative tools can solve the problem.

* B: A formula field cannot assign values; it only calculates and displays results.

* C: Validation rules are used to enforce constraints, not for assigning values.

Salesforce Flows Overview

NEW QUESTION # 122

The operation manager at a construction company uses a custom object called Machinery to manage the usage and maintenance of its cranes and other machinery. The manager wants to be able to assign machinery to different construction jobs, and track the dates and costs associated with each job. More than one piece of machinery can be assigned to one construction job.

What should a developer do to meet these requirements?

- A. Create a Master-Detail Lookup on the Machinery object to the Construction Job object.
- B. Create a junction object with Master-Detail Relationship to both the Machinery object and the Construction Job object.
- **C. Create a lookup field on the Construction Job object to the Machinery object.**
- D. Create a lookup field on the Machinery object to the Construction Job object.

Answer: C

NEW QUESTION # 123

Given the code below, what can be done so that recordcount can be accessed by a test class, but not by a non-test class? Public class mycontroller { private integer recordcount; }

- A. Add a seealldata annotation to the test class
- B. Change recordcount from private to public
- **C. Add the testvisible annotation to recordcount**
- D. Add the testvisible annotation to the mycontroller class

Answer: C

NEW QUESTION # 124

A developer has the controller class below.

□ Which code block will run successfully in an execute anonymous window?

- A. myFooController m = new myFooController(); System.assert(m.prop == 0);
- **B. myFooController m = new myFooController(); System.assert(m.prop == null);**
- C. myFooController m = new myFooController(); System.assert(m.prop != null);
- D. myFooController m = new myFooController(); System.assert(m.prop == 1);

Answer: B
