

Free PDF 2026 Google Professional-Cloud-Architect: Updated Google Certified Professional - Cloud Architect (GCP) Testkings

P.S. Free 2026 Google Professional-Cloud-Architect dumps are available on Google Drive shared by PDFBraindumps:
<https://drive.google.com/open?id=1XeIkV9W2nMkY3wCX7EzS9WGfkKHhITP>

All three Google Professional-Cloud-Architect exam dumps formats are ready for download. Just select the best Google Professional-Cloud-Architect exam questions type and download it after paying an affordable Professional-Cloud-Architect exam questions charge and start preparation today. We offer you the most accurate Professional-Cloud-Architect Exam Answers that will be your key to pass the certification exam in your first try.

In order to meet the needs of all people, the experts of our company designed such a Professional-Cloud-Architect guide torrent that can help you pass your exam successfully. Having our study materials, it will be very easy for you to get the certification in a short time. If you try purchase our study materials, you will find our Professional-Cloud-Architect question torrent will be very useful for you. We are confident that you will be attracted to our Professional-Cloud-Architect guide question.

>> Updated Professional-Cloud-Architect Testkings <<

Google Professional-Cloud-Architect Exam | Updated Professional-Cloud-Architect Testkings - Free Download of Professional-Cloud-Architect Exam Products

Without bothering to stick to any formality, our Professional-Cloud-Architect learning quiz can be obtained within five minutes. No need to line up or queue up to get our Professional-Cloud-Architect practice materials. They are not only efficient on downloading aspect, but can expedite your process of review. No harangue is included within Professional-Cloud-Architect Training Materials and every page is written by our proficient experts with dedication. And we have demos of the Professional-Cloud-Architect study guide, you can free download before purchase.

Google Certified Professional - Cloud Architect (GCP) Sample Questions

(Q152-Q157):

NEW QUESTION # 152

You need to ensure reliability for your application and operations by supporting reliable task scheduling for compute on GCP. Leveraging Google best practices, what should you do?

- A. Using the Cron service provided by App Engine, publish messages to a Cloud Pub/Sub topic. Subscribe to that topic using a message-processing utility service running on Compute Engine instances.
- B. Using the Cron service provided by Google Kubernetes Engine (GKE), publish messages directly to a message-processing utility service running on Compute Engine instances.
- C. Using the Cron service provided by App Engine, publishing messages directly to a message-processing utility service running on Compute Engine instances.
- D. Using the Cron service provided by GKE, publish messages to a Cloud Pub/Sub topic. Subscribe to that topic using a message-processing utility service running on Compute Engine instances.

Answer: A

Explanation:

<https://cloud.google.com/solutions/reliable-task-scheduling-compute-engine>

NEW QUESTION # 153

Your company wants you to build a highly reliable web application with a few public APIs as the backend.

You don't expect a lot of user traffic, but traffic could spike occasionally. You want to leverage Cloud Load Balancing, and the solution must be cost-effective for users. What should you do?

- A. Store static content such as HTML and images in a Cloud Storage bucket. Use Cloud Functions to host the APIs and save the user data in Firestore.
- B. Store static content such as HTML and images in Cloud CDN. Host the APIs on App Engine and store the user data in Cloud SQL.
- C. Store static content such as HTML and images in Cloud CDN. Use Cloud Run to host the APIs and save the user data in Cloud SQL.
- D. Store static content such as HTML and images in a Cloud Storage bucket. Host the APIs on a zonal Google Kubernetes Engine cluster with worker nodes in multiple zones, and save the user data in Cloud Spanner.

Answer: D

NEW QUESTION # 154

You have an App Engine application that needs to be updated. You want to test the update with production traffic before replacing the current application version.

What should you do?

- A. Deploy the update as a new version in the App Engine application, and split traffic between the new and current versions.
- B. Deploy the update as a new App Engine application, and use Google's global HTTP load balancing to split traffic between the new and current applications.
- C. Deploy the update using the Instance Group Updater to create a partial rollout, which allows for canary testing.
- D. Deploy the update in a new VPC, and use Google's global HTTP load balancing to split traffic between the update and current applications.

Answer: A

NEW QUESTION # 155

Case Study: 2 - TerramEarth Case Study

Company Overview

TerramEarth manufactures heavy equipment for the mining and agricultural industries: About 80% of their business is from mining and 20% from agriculture. They currently have over 500 dealers and service centers in 100 countries. Their mission is to build products that make their customers more productive.

Company Background

TerramEarth formed in 1946, when several small, family owned companies combined to retool after World War II. The company cares about their employees and customers and considers them to be extended members of their family. TerramEarth is proud of their ability to innovate on their core products and find new markets as their customers' needs change. For the past 20 years trends in the industry have been largely toward increasing productivity by using larger vehicles with a human operator.

Solution Concept

There are 20 million TerramEarth vehicles in operation that collect 120 fields of data per second.

Data is stored locally on the vehicle and can be accessed for analysis when a vehicle is serviced.

The data is downloaded via a maintenance port. This same port can be used to adjust operational parameters, allowing the vehicles to be upgraded in the field with new computing modules.

Approximately 200,000 vehicles are connected to a cellular network, allowing TerramEarth to collect data directly. At a rate of 120 fields of data per second, with 22 hours of operation per day.

TerramEarth collects a total of about 9 TB/day from these connected vehicles.

Existing Technical Environment

TerramEarth's existing architecture is composed of Linux-based systems that reside in a data center. These systems `gzip` CSV files from the field and upload via FTP, transform and aggregate them, and place the data in their data warehouse. Because this process takes time, aggregated reports are based on data that is 3 weeks old.

With this data, TerramEarth has been able to preemptively stock replacement parts and reduce unplanned downtime of their vehicles by 60%. However, because the data is stale, some customers are without their vehicles for up to 4 weeks while they wait for replacement parts.

Business Requirements

- Decrease unplanned vehicle downtime to less than 1 week, without increasing the cost of carrying surplus inventory
- Support the dealer network with more data on how their customers use their equipment IP better position new products and services.
- Have the ability to partner with different companies-especially with seed and fertilizer suppliers in the fast-growing agricultural business-to create compelling joint offerings for their customers

CEO Statement

We have been successful in capitalizing on the trend toward larger vehicles to increase the productivity of our customers.

Technological change is occurring rapidly and TerramEarth has taken advantage of connected devices technology to provide our customers with better services, such as our intelligent farming equipment. With this technology, we have been able to increase farmers' yields by 25%, by using past trends to adjust how our vehicles operate. These advances have led to the rapid growth of our agricultural product line, which we expect will generate 50% of our revenues by 2020.

CTO Statement

Our competitive advantage has always been in the manufacturing process with our ability to build better vehicles for tower cost than our competitors. However, new products with different approaches are constantly being developed, and I'm concerned that we lack the skills to undergo the next wave of transformations in our industry. Unfortunately, our CEO doesn't take technology obsolescence seriously and he considers the many new companies in our industry to be niche players. My goals are to build our skills while addressing immediate market needs through incremental innovations.

Your agricultural division is experimenting with fully autonomous vehicles. You want your architecture to promote strong security during vehicle operation.

Which two architectures should you consider? (Choose two.)

- A. Use multiple connectivity subsystems for redundancy.
- **B. Use a trusted platform module (TPM) and verify firmware and binaries on boot.**
- C. Enclose the vehicle's drive electronics in a Faraday cage to isolate chips.
- **D. Treat every micro service call between modules on the vehicle as untrusted.**
- E. Use a functional programming language to isolate code execution cycles.
- F. Require IPv6 for connectivity to ensure a secure address space.

Answer: B,D

NEW QUESTION # 156

Your organization has decided to restrict the use of external IP addresses on instances to only approved instances. You want to enforce this requirement across all of your Virtual Private Clouds (VPCs). What should you do?

- A. Implement a Cloud NAT solution to remove the need for external IP addresses entirely.
- B. Remove the default route on all VPCs. Move all approved instances into a new subnet that has a default route to an internet gateway.

- C. Create a new VPC in custom mode. Create a new subnet for the approved instances, and set a default route to the internet gateway on this new subnet.
- D. Set an Organization Policy with a constraint on constraints/compute.vmExternalIpAccess. List the approved instances in the allowedValues list.

Answer: D

Explanation:

NEW QUESTION # 157

.....

Good product and all-round service are the driving forces for a company. Our Company is always striving to develop not only our Professional-Cloud-Architect latest practice dumps, but also our service because we know they are the aces in the hole to prolong our career. Reliable service makes it easier to get oriented to the exam. If our candidates fail to pass the Professional-Cloud-Architect exam unfortunately, you can show us the failed record, and we will give you a full refund. The combination of Professional-Cloud-Architect Exam Guide and sweet service is a winning combination for our company, so you can totally believe that we are sincerely hope you can pass the Professional-Cloud-Architect exam, and we will always provide you help and solutions with pleasure, please contact us through email then.

Professional-Cloud-Architect Latest Dumps Questions: https://www.pdfbraindumps.com/Professional-Cloud-Architect_valid-braindumps.html

PDFBraindumps is a real exam braindumps provider that ensures you pass the Professional-Cloud-Architect braindumps exam with high rate, Google Updated Professional-Cloud-Architect Testkings If you want to succeed in your exam and get the related exam, you have to set a suitable study program, Buy real Google Certified Professional - Cloud Architect (GCP) questions and start preparation for the Professional-Cloud-Architect test today, It is convenient for our consumers to check Google Professional-Cloud-Architect exam questions free of charge before purchasing the Google Professional-Cloud-Architect practice exam.

Clip Art Task Pane—Enables you to search the Office Professional-Cloud-Architect Clip Gallery and insert clip art into your Office application documents, If you don't have your galoshes, PDFBraindumps is a real exam braindumps provider that ensures you pass the Professional-Cloud-Architect Braindumps exam with high rate.

Free PDF Quiz 2026 Newest Google Professional-Cloud-Architect: Updated Google Certified Professional - Cloud Architect (GCP) Testkings

If you want to succeed in your exam and get the related exam, you have to set a suitable study program, Buy real Google Certified Professional - Cloud Architect (GCP) questions and start preparation for the Professional-Cloud-Architect test today!

It is convenient for our consumers to check Google Professional-Cloud-Architect exam questions free of charge before purchasing the Google Professional-Cloud-Architect practice exam, If you follow the steps of our Professional-Cloud-Architect exam questions, you can easily and happily learn and ultimately succeed in the ocean of learning.
