

SAP E-S4CPE-2405최고품질인증시험기출자료, E-S4CPE-2405최신버전덤프공부문제

BONUS!!! Pass4Test E-S4CPE-2405 시험 문제집 전체 버전을 무료로 다운로드하세요: https://drive.google.com/open?id=1qBK6_EqldgqxshzUqmm29CpUlabFnxIg

Pass4Test는 다른 회사들이 이루지 못한 Pass4Test만의 매우 특별한 이점을 가지고 있습니다. Pass4Test의 SAP E-S4CPE-2405덤프는 전문적인 엔지니어들의 SAP E-S4CPE-2405 시험을 분석이후에 선택이 된 문제들이고 적지만 매우 가치 있는 질문과 답변들로 되어있는 학습가이드입니다. 고객들은 단지 Pass4Test에서 제공해드리는 SAP E-S4CPE-2405덤프의 질문과 답변들을 이해하고 마스터하면 첫 시험에서 고득점으로 합격을 할 것입니다.

SAP E-S4CPE-2405 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> System Landscapes and Identity Access Management: This section of the exam measures skills of system administrators and focuses on designing and managing SAP system landscapes while ensuring secure and efficient identity access management. It includes concepts related to system environments, user authentication, and authorization controls.
주제 2	<ul style="list-style-type: none"> Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of application consultants and covers configuring SAP solutions to meet business needs, along with setting up and managing the SAP Fiori Launchpad. It also touches on customizing the user interface for an optimal and user-friendly experience.
주제 3	<ul style="list-style-type: none"> Introduction to Cloud Computing and SAP Cloud ERP Deployment Options: This section of the exam measures skills of cloud solution architects and focuses on the fundamentals of cloud computing, along with the different deployment models available for SAP Cloud ERP. It addresses the benefits, challenges, and selection criteria for choosing the most suitable deployment option in alignment with business goals.
주제 4	<ul style="list-style-type: none"> Extensibility, Integration, and Clean Core: This section of the exam measures skills of integration specialists and involves understanding the principles of extending SAP functionality without compromising the clean core approach. It includes integrating SAP with other systems, maintaining system integrity, and ensuring sustainable customizations.

적중율 높은 E-S4CPE-2405최고품질 인증시험 기출자료 시험덤프

인재도 많고 경쟁도 치열한 이 사회에서 IT업계 인재들은 인기가 아주 많습니다. 하지만 팽팽한 경쟁률도 무시할 수 없습니다. 많은 IT인재들도 어려운 인증시험을 패스하여 자기만의 자리를 지켜야만 합니다. 우리 Pass4Test에서는

마침 전문적으로 이러한 IT인사들에게 편리하게 시험을 패스할수 있도록 유용한 자료들을 제공하고 있습니다. SAP 인증E-S4CPE-2405인증은 아주 중요한 인증시험중의 하나입니다. Pass4Test의SAP 인증E-S4CPE-2405로 시험을 한방에 정복하세요.

최신 SAP Certified Application Specialist E-S4CPE-2405 무료샘플문제 (Q37-Q42):

질문 # 37

You are preparing for an SAP S/4HANA Cloud Private Edition implementation project. What do you find in the Roadmap Viewer?
Note: There are 2 correct answers to this question.

- A. Business process flows
- B. Tasks and deliverables to complete each phase
- C. Clean Core quality gates
- D. Solution process setup instructions

정답: B,C

질문 # 38

Which analyses does the Custom Code Migration app deliver? Note: There are 2 correct answers to this question.

- A. Checking customer-defined artifacts against the simplification database to analyze which items do NOT comply with SAP S/4HANA
- B. Gathering the number of active business functions in the customer's system and whether they are compatible with SAP S/4HANA
- C. Gathering statistical information about development objects in the customer's system that need to be adapted
- D. Identifying SAP Fiori apps that best fit the customer's needs, based on historical transaction volume and usage

정답: A,C

설명:

The Custom Code Migration app in SAP S/4HANA Cloud Private Edition supports system conversions by analyzing custom ABAP code for compatibility with S/4HANA. Let's analyze:

- * A. Gathering statistical information about development objects in the customer's system that need to be adapted: This is correct. The app provides statistics on custom objects (e.g., programs, enhancements) in the customer's system, identifying those requiring adaptation due to S/4HANA's simplified data models or deprecated features.
- * B. Identifying SAP Fiori apps that best fit the customer's needs, based on historical transaction volume and usage: This is incorrect. This analysis is part of tools like the SAP Readiness Check or Fiori Apps Recommendation Report, not the Custom Code Migration app, which focuses on code compatibility.
- * C. Gathering the number of active business functions in the customer's system and whether they are compatible with SAP S/4HANA: This is incorrect. Business function compatibility is assessed via the SAP Readiness Check or Simplification Item Check, not the Custom Code Migration app, which targets custom code.
- * D. Checking customer-defined artifacts against the simplification database to analyze which items do NOT comply with SAP S/4HANA: This is correct. The app compares custom artifacts against the S/4HANA simplification database, flagging non-compliant items (e.g., obsolete transactions, tables) that need adjustment. In summary, the Custom Code Migration app delivers A (Gathering statistical information about development objects) and D (Checking customer-defined artifacts against the simplification database).

질문 # 39

You are working on a Selective Data Transition project where most of the solution is being redesigned. Which approach do you use?

- A. Dual-stack Split
- B. Shell Conversion

- C. Mix & Match
- D. Lift & Shift

정답: B

질문 # 40

Which solution is designed to help customers understand their environmental, social, and governance (ESG) data?

- A. SAP Responsible Design and Production
- B. SAP Sustainability Footprint Management
- C. SAP Sustainability Control Tower
- D. SAP Green Token

정답: C

설명:

SAP offers several solutions under its sustainability portfolio to address environmental, social, and governance (ESG) needs. The question asks for the solution designed to help customers understand their ESG data, implying a focus on visibility, reporting, and insights. Let's analyze the options:

- * A. SAP Sustainability Control Tower: This is the correct answer. SAP Sustainability Control Tower is a cloud-based solution designed to provide a centralized platform for managing, monitoring, and reporting ESG data. It helps organizations understand their sustainability performance by offering dashboards, KPIs, and analytics to track metrics like carbon emissions, diversity, and governance compliance. It integrates with SAP S/4HANA (including Private Edition) and other systems to provide actionable insights, making it the primary tool for ESG understanding as per SAP's sustainability strategy.
- * B. SAP Green Token: This solution focuses on tracking the sustainability attributes of products across supply chains (e.g., carbon footprint of materials) using blockchain technology. While it supports ESG goals, it is more operational and specific to supply chain transparency rather than providing a broad understanding of ESG data. Thus, it is not the best fit here.
- * C. SAP Sustainability Footprint Management: This tool calculates and manages product-level carbon footprints and environmental impacts, integrating with SAP S/4HANA. It is more focused on measurement and operational management of environmental data rather than providing a holistic understanding of ESG data across the organization. Hence, it is incorrect in this context.
- * D. SAP Responsible Design and Production: This solution helps companies design sustainable products and manage extended producer responsibility (e.g., plastic taxes). It is operational and industry-specific, not a broad ESG data understanding tool, making it an incorrect choice.

In conclusion, SAP Sustainability Control Tower is the solution designed to help customers understand their ESG data through comprehensive visibility and reporting.

질문 # 41

You have assigned a business role to an end user who has been granted access to only one app. The app does NOT show up on the user's launchpad and you are not available to support.

What can the user do?

- A. Create a page and assign it to the launchpad space.
- B. Assign a launchpad space to the business role.
- C. Assign a different business role that provides access.
- D. Use the search function to find the app.

정답: D

설명:

When an end user is assigned a business role granting access to only one app, but the app does not appear on their SAP Fiori launchpad, the user can utilize the search function to locate and access the app.

Option A: Assign a different business role that provides access.

This option is not feasible for the end user, as assigning business roles typically requires administrative privileges.

Option B: Create a page and assign it to the launchpad space.

This option is not applicable, as creating pages and assigning them to launchpad spaces are tasks performed by administrators, not
