

Salesforce Certified Tableau Server Administrator test for engine, Analytics-Admn-201 VCE test engine

P.S. Free 2026 Salesforce Analytics-Admn-201 dumps are available on Google Drive shared by Prep4cram: <https://drive.google.com/open?id=1900yacvTWGQqHdkn7zSGzWxPTgiSW41C>

In addition to the advantages of high quality, our Analytics-Admn-201 study materials also provide various versions. In order to meet your personal habits, you can freely choose any version within PDF, APP or PC version. Among them, the PDF version is most suitable for candidates who prefer paper materials, because it supports printing. If you want to use our Analytics-Admn-201 Study Materials on your phone at any time, then APP version is your best choice as long as you have browsers on your phone.

Having a good command of professional knowledge for customers related to this Analytics-Admn-201 exam is of superior condition. However, that is not certain and sure enough to successfully pass this exam. You need efficiency and exam skills as well. Actually, a great majority of exam candidates feel abstracted at this point, wondering which one is the perfect practice material they are looking for. To make things clear, we will instruct you on the traits of our Analytics-Admn-201 real materials one by one. Here we recommend our Analytics-Admn-201 guide question for your reference.

>> **New Analytics-Admn-201 Test Blueprint** <<

Unique Features of Prep4cram's Salesforce Analytics-Admn-201 Exam Dumps (Desktop and Web-Based)

Our Analytics-Admn-201 study materials have a high quality which is mainly reflected in the pass rate. Our product can promise a higher pass rate than other study materials. 99% people who have used our Analytics-Admn-201 study materials passed their exam and got their certificate successfully, it is no doubt that it means our Analytics-Admn-201 study materials have a 99% pass rate. So our product will be a very good choice for you. If you are anxious about whether you can pass your exam and get the certificate, we think you need to buy our Analytics-Admn-201 Study Materials as your study tool, our product will lend you a good helping hand. If you are willing to take our Analytics-Admn-201 study materials into more consideration, it must be very easy for you to pass your exam in a short time.

Salesforce Certified Tableau Server Administrator Sample Questions (Q29-

Q34):

NEW QUESTION # 29

You have a server that contains 16 processor cores. What is the default number of VizQL instances configured by the installer?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

The VizQL Server process in Tableau Server handles rendering visualizations and processing queries for users viewing dashboards or workbooks. During installation, Tableau Server automatically configures the number of VizQL instances based on the number of processor cores on the machine, following this rule:

Default VizQL instances = 2 per node, unless manually adjusted post-installation.

In multi-node setups, additional instances may be added based on core count, but the question specifies a single server with 16 cores.

The installer does not scale VizQL instances linearly with core count by default (e.g., it doesn't set 1 instance per 4 cores). Instead: For a single-node installation, the default is 2 VizQL instances, regardless of core count (assuming the minimum hardware requirements are met: 8 cores, 32 GB RAM).

Administrators can later adjust this using TSM (e.g., tsm topology set-process) based on performance needs, but the question asks for the default configured by the installer.

Option A (4): Incorrect. Four instances might be configured manually for a 16-core server, but it's not the default.

Option B (6): Incorrect. Six instances exceed the default for a single node.

Option C (10): Incorrect. Ten instances are far beyond the default and would require manual configuration.

Option D (2): Correct. The installer sets 2 VizQL instances by default on a single-node installation.

Reference: Tableau Server Documentation - "Server Process Settings" (<https://help.tableau.com/current/server/en-us/processes.htm>).

NEW QUESTION # 30

What two Tableau Services Manager (TSM) processes continue to run when Tableau Server is stopped?

(Choose two.)

- A. Backgrounder
- **B. License Manager**
- **C. Administration Controller**
- D. VizQL Server

Answer: B,C

Explanation:

Tableau Server consists of multiple processes managed by TSM. When you stop Tableau Server (e.g., via tsm stop), most application processes halt, but some TSM-specific processes remain active to manage the server's infrastructure. Let's examine each:

* TSM Processes: These include the Administration Controller, Administration Agent, and License Manager, which handle configuration, monitoring, and licensing.

* Application Processes: These include VizQL Server, Backgrounder, Data Server, etc., which deliver Tableau's core functionality and stop when the server is stopped.

When tsm stop is executed:

* The Administration Controller (port 8850) continues running to manage TSM operations (e.g., restarts, status checks).

* The License Manager remains active to validate licenses and ensure compliance, even when the server is offline.

* Application processes like VizQL Server and Backgrounder shut down, as they're tied to user-facing services.

* Option B (License Manager): Correct. It persists to handle licensing tasks, ensuring the server can restart without license issues.

* Option D (Administration Controller): Correct. It's the core TSM process, always running to accept commands and manage the server state.

* Option A (VizQL Server): Incorrect. VizQL stops, as it renders visualizations for users—an application process tied to active server operation.

* Option C (Backgrounder): Incorrect. Backgrounder stops, as it processes background tasks (e.g., extract refreshes), which halt

when the server is down.

Why This Matters: Understanding which processes persist helps administrators troubleshoot and manage server lifecycle events effectively.

Reference: Tableau Server Documentation - "TSM Processes" (https://help.tableau.com/current/server/en-us/tsm_overview.htm#processes).

NEW QUESTION # 31

You install Tableau Server on a server that has four processor cores. How many instances of each Tableau Server process are installed?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

Tableau Server's installer configures process instances based on hardware and deployment type (single-node vs. multi-node). For a single-node installation with 4 cores, we need to consider the default process topology

. Let's break this down exhaustively:

* Key Processes:

* Gateway: Handles incoming requests (1 instance).

* Application Server (VizPortal): Manages UI and sessions (1 instance).

* VizQL Server: Renders visualizations (2 instances).

* Backgrounder: Runs extract refreshes, subscriptions (1 instance).

* Data Server: Manages data connections (1 instance).

* File Store: Stores extracts (1 instance).

* Repository: Metadata database (1 instance, active).

* Cluster Controller, Cache Server, etc.: Supporting processes (typically 1 each).

* Default Configuration:

* On a single-node install, Tableau sets 1 instance per process unless specified otherwise, except for VizQL, which defaults to 2.

* The installer doesn't scale instances linearly with cores (e.g., 4 cores # 4 instances). Post-install, TSM can adjust this (e.g., tsm topology set-process), but the question asks for the installed default.

* Minimum hardware (8 cores, 32 GB RAM) suggests higher defaults, but 4 cores still triggers a minimal setup.

* Option B (1): Correct with Caveat.

* Most processes (e.g., Backgrounder, Gateway, Data Server) default to 1 instance on install, regardless of 4 cores.

* VizQL defaults to 2, but the question's phrasing ("each process") implies a general rule.

Historically (and per docs), 1 is the baseline for most, with VizQL as the exception.

* Interpretation: Assuming "each" means the typical case, 1 fits most processes on a 4-core single- node setup.

* Option A (2): Incorrect. Only VizQL defaults to 2; others don't.

* Option C (8): Incorrect. Far exceeds defaults-8 cores might justify more, but not 4.

* Option D (4): Incorrect. Not tied to core count by default; manual config would be needed.

Why This Matters: Understanding defaults aids capacity planning-4 cores is below production minimum (8), so performance tuning may be needed post-install.

Reference: Tableau Server Documentation - "Server Process Settings" (<https://help.tableau.com/current/server/en-us/processes.htm>).

NEW QUESTION # 32

What command should you run to update the automatically-generated secrets that are created during a Tableau Server installation?

- A. tsm licenses refresh
- B. tsm security validate-asset-keys
- C. tsm data-access caching set -r 1
- **D. tsm security regenerate-internal-tokens**

Answer: D

Explanation:

Tableau Server uses internal secrets (tokens) for secure communication between its processes (e.g., Repository, File Store). These are automatically generated during installation and can be regenerated if compromised or for security maintenance. The command to update these is:

* `tsm security regenerate-internal-tokens`: This regenerates the internal security tokens, ensuring all processes use the new tokens after a restart.

* Option C (`tsm security regenerate-internal-tokens`): Correct. This is the documented command for updating internal secrets.

* Option A (`tsm data-access caching set -r 1`): Incorrect. This command configures caching behavior, not security tokens.

* Option B (`tsm licenses refresh`): Incorrect. This refreshes license data, unrelated to internal secrets.

* Option D (`tsm security validate-asset-keys`): Incorrect. This validates encryption keys for assets, not internal tokens.

Reference: Tableau Server Documentation - "Regenerate Internal Tokens" (https://help.tableau.com/current/server/en-us/cli_security.htm#regenerate-internal-tokens).

NEW QUESTION # 33

What are two features of the Tableau Server user-based license? (Choose two.)

- **A. Enables distinct user roles**
- B. A perpetual license
- C. Restricts the number of machine cores you can deploy
- **D. A subscription license**

Answer: A,D

Explanation:

Tableau Server's user-based licensing model assigns licenses to individual users (Creator, Explorer, Viewer) rather than machines or cores. Key features include:

* Subscription license: Licenses are typically subscription-based, renewed annually or monthly, aligning with Tableau's pricing model.

* Distinct user roles: It supports three roles (Creator, Explorer, Viewer), each with specific capabilities, enabling granular access control.

* Option A (A subscription license): Correct. User-based licenses are subscription-based by default.

* Option B (Enables distinct user roles): Correct. The model defines Creator, Explorer, and Viewer roles.

* Option C (Restricts the number of machine cores): Incorrect. This applies to core-based licensing, not user-based.

* Option D (A perpetual license): Incorrect. Perpetual licenses were phased out; user-based licenses are subscription-based as of recent models.

Reference: Tableau Server Documentation - "Licensing Overview" (https://help.tableau.com/current/server/en-us/license_usage.htm).

NEW QUESTION # 34

.....

Luckily, we are going to tell you a good new that the demo of the Analytics-Admn-201 study materials are easily available in our company. If you buy the study materials from our company, we are glad to offer you with the best demo of our study materials. You will have a deep understanding of the Analytics-Admn-201 Study Materials from our company, and then you will find that the study materials from our company will very useful and suitable for you to prepare for you Analytics-Admn-201 exam.

Exam Analytics-Admn-201 Simulator Online: https://www.prep4cram.com/Analytics-Admn-201_exam-questions.html

So the validity and reliability of Analytics-Admn-201 exam training material are very important and necessary, Our company has carried out cooperation with a lot of top IT experts in many countries to compile the Analytics-Admn-201 best questions for IT workers and our exam preparation are famous for their high quality and favorable prices, When I found Prep4cram Exam Analytics-Admn-201 Simulator Online had the best training tools for Salesforce Exam Analytics-Admn-201 Simulator Online exam I made my decision.

Using the JRockit Management Console, Types of Honeynets, So the validity and reliability of Analytics-Admn-201 exam training material are very important and necessary, Our company has carried out cooperation with a lot of top IT experts in many countries to compile the Analytics-Admn-201 best questions for IT workers and our exam preparation are famous for their high quality and favorable prices.

100% Pass Salesforce - Analytics-Admn-201 - Professional New Salesforce
