Development-Lifecycle-and-Deployment-Architect Soft test engine stimulates the real environment of the exam, and you can know what the real exam looks like through this version.

### Salesforce Certified Development Lifecycle and Deployment Architect Sample Questions (Q21-Q26):

#### NEW QUESTION # 21

Universal Containers have just acquired Planetary storage. Both companies use salesforce.com to manage their sales activities. The two companies have many customers in common and the company plans to merge the two sales organizations, but the products and sales processes between the two original companies will remain different and distinct. What factor should the company consider in merging the two Salesforce.com orgs into a single org?

- A. Business processes on standard objects can be merged without modifications
- B. Transactional sales data could be combined without modification since standard objects are used
- C. Salespersons selling both product lines would need two logins, once for each product line
- D. Customer data could be merged with modifications using standardization and de -duplication

**Answer: D**

Explanation:

Explanation

The most challenging factor to consider in merging the two Salesforce.com orgs into a single org is the customer data, as it may contain duplicates, inconsistencies, and conflicts. Option D suggests using standardization and de-duplication tools to merge the customer data, which is a reasonable approach. Option A is not true, as transactional sales data may have different formats, fields, and values in the two orgs. Option B is not necessary, as salespersons selling both product lines can use a single login in the merged org. Option C is not true, as business processes on standard objects may have different workflows, validation rules, and triggers in the two orgs.

#### NEW QUESTION # 22

Universal Containers (UC) is using Salesforce for their sales organization. The sales users have created several dashboards using multiple running users. The admins have also added a few workflow rules that send email notifications to some sales users. What should an Architect consider while planning the deployment of such components? Choose 2 answers

- A. If the username in the source org doesn't exist in the target org, the deployment will continue and Salesforce will automatically create the username in the target org.
- B. If the username in the source org doesn't exist in the target org, the deployment will stop until the usernames are resolved or removed.
- C. User fields are ignored during metadata deployments and all such users need to be manually created in the target org before starting the deployment.
- D. User Fields are preserved during metadata deployments and Salesforce attempts to locate a matching user in the target org during deployment.

**Answer: B,D**

#### NEW QUESTION # 23

Universal Containers has just initiated a project involving a large distributed development and testing team. The development team members need access to a tool to manage requirements and the testing team needs access to a tool to manage defects. Additionally,

stakeholders are requesting ad-hoc status reports. What tool should an Architect recommend to support the project?

- A. Wave
- B. Code Repository
- C. Spreadsheets
- **D. Port management tool**

**Answer: D**

#### NEW QUESTION # 24

Universal Containers has asked the salesforce architect to establish a governance framework to manage all of those Salesforce initiatives within the company. What is the first step the Architect should take?

- **A. Identify relevant Stakeholders from within Universal Containers to obtain governance goals and objectives**
- B. Implement a comprehensive DevOps framework for all initiatives within Universal Containers
- C. Establish a global Center of Excellence to define and manage Salesforce development standards across the organization
- D. Implement a project management tool to manage all change requests on the project

**Answer: A**

Explanation:

The first step in establishing a governance framework is to identify the relevant stakeholders from within the organization to obtain their goals and objectives. This will help to define the scope, roles, responsibilities, and processes for managing the Salesforce initiatives. The other options are possible steps to take later, but not the first one.

#### NEW QUESTION # 25

Universal Containers (UC) has many different business units, all requesting new projects to be built into a single Salesforce Org. UC management is concerned with a lack of appropriate project properties and roadmap for the Salesforce ecosystem. What should an Architect recommend?

- A. Use design Standards for Governance.
- B. Create project charters for each project.
- C. Create a Release Management Process.
- **D. Create a Center of Excellence with a charter document.**

**Answer: D**

Explanation:

Explanation

Creating a Center of Excellence with a charter document is a recommended practice for managing multiple projects and aligning them with the business goals and roadmap. A Center of Excellence is a cross-functional team that provides guidance, support, and governance for the Salesforce ecosystem. A charter document defines the vision, mission, roles, and responsibilities of the Center of Excellence.

#### NEW QUESTION # 26
