Three Formats OF Microsoft GH-900 Practice Material By DumpsKing

You can try a free demo to check the desktop GitHub Foundations (GH-900) practice exam software before buying. The Microsoft GH-900 practice test, which is the very best self-assessment tool is customizable. And you can change its time and number of questions. All the formats of DumpsKing are designed and revised as per the feedback of more than thousands of experts in this field. Thus DumpsKing reduce your chances of failure in the actual GitHub Foundations (GH-900) exam. So this product helps in reducing your tension and gaining more focus on your preparation only.

Microsoft GH-900 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Benefits of the GitHub Community: This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects.
Topic 2	<ul style="list-style-type: none"> • Collaboration Features: This section measures skills of Software Engineers and Team Leads and covers collaborative workflows using GitHub. It includes forking repositories, creating and managing pull requests, reviewing and merging code changes, and using GitHub Actions to support CI • CD pipelines. Candidates also explore project management features such as creating and managing issues, using labels, milestones, and project boards, and tracking progress through GitHub Projects.
Topic 3	<ul style="list-style-type: none"> • Working with GitHub Repositories: This domain targets Repository Administrators and Content Managers, focusing on managing repository settings and permissions. Candidates learn to configure repositories, use templates, and effectively manage files by adding, editing, and deleting. The domain also addresses versioning of files and the use of GitHub Desktop for streamlined file management tasks within repositories.
Topic 4	<ul style="list-style-type: none"> • Project Management: This section is designed for Project Coordinators and Product Managers and focuses on using GitHub Projects for project management. Candidates learn to create and manage GitHub Projects, utilize project boards for organizing tasks, and integrate project workflows with issues and pull requests to maintain project visibility and progress.
Topic 5	<ul style="list-style-type: none"> • Modern Development: This domain assesses abilities of DevOps Engineers and Continuous Integration Specialists in implementing modern development practices. It emphasizes understanding DevOps principles and leveraging GitHub Actions for automation and CI • CD pipeline implementation. Candidates also learn GitHub's tools and best practices for conducting and managing code reviews.

Microsoft GitHub Foundations Sample Questions (Q43-Q48):

NEW QUESTION # 43

What is a gist?

- A. Markdown document
- **B. Git repository**
- C. GitHub Pages site
- D. GitHub app

Answer: B

Explanation:

A gist on GitHub is essentially a Git repository, albeit a simplified one, designed for sharing snippets of code, notes, or other text content. Gists support version control and can be public or secret.

Gist as a Git Repository:

Option B is correct because each gist is a Git repository, meaning you can clone it, commit changes, and even fork it, just like any other Git repository.

Incorrect Options:

Option A is incorrect because a gist is not an app; it's a feature of GitHub that provides a simplified repository.

Option C is incorrect because while a gist may contain Markdown documents, it is fundamentally a repository that can hold various file types.

Option D is incorrect because GitHub Pages is a separate service for hosting websites, not related to gists.

GitHub Docs: About Gists

NEW QUESTION # 44

Which of the following options is available as a default Discussion category?

- A. Bug report

- B. Daily check-in
- **C. Show and tell**
- D. Security concern

Answer: C

Explanation:

In GitHub Discussions, several default categories are provided to help organize conversations within a project. One of the default categories is Show and tell. This category is designed for users to showcase their work, share progress, or discuss achievements with the community. The other options listed (Bug report, Daily check-in, Security concern) are not default categories but could be custom categories created by the repository maintainers.

NEW QUESTION # 45

The difference between GitHub Desktop and github.com is that Desktop:

- A. Is a self-hosted version of GitHub.
- B. Is only available on Windows operating systems.
- C. Is a standalone software application.
- **D. Offers a graphical user interface.**
- E. Enables integration with office suite applications.

Answer: D

Explanation:

GitHub Desktop is a standalone application that provides a graphical user interface (GUI) for interacting with GitHub repositories, as opposed to the command-line or web-based interfaces available on github.com.

Graphical User Interface:

Option D is correct because GitHub Desktop offers a GUI, making it easier for users to manage repositories, perform commits, and handle other Git-related tasks without needing to use the command line.

Incorrect Options:

Option A is partially correct in that GitHub Desktop is a standalone application, but the key difference is the GUI.

Option B is incorrect because GitHub Desktop does not specifically enable integration with office suite applications.

Option C is incorrect because GitHub Desktop is available on both Windows and macOS.

Option E is incorrect because GitHub Desktop is not a self-hosted version of GitHub; it is a client application for accessing GitHub repositories.

GitHub Docs: GitHub Desktop Documentation

NEW QUESTION # 46

Which of the following GitHub syntax formats is consistent with the associated text?

- A. This is a link
- B. 1. This is an ordered list
- C. This is bolded text
- D. * This is a heading
- **E. <!-- This is a comment -->**

Answer: E

Explanation:

GitHub supports various syntax formats that align with Markdown and HTML conventions. Here's a breakdown of the provided options:

Comment Syntax:

Option C is correct. The syntax <!-- This is a comment --> is used in Markdown files to insert comments. These comments will not be rendered in the final output, making them useful for adding notes or instructions within the code or documentation.

Incorrect Options:

Option A (* This is a heading) is incorrect because an asterisk (*) denotes an unordered list item, not a heading. A heading in Markdown is typically created with one or more hash symbols (#).

Option B (This is a link) is incorrect because this is plain text and not the syntax for creating a link. The correct syntax would be

[This is a link](URL).

Option D (This is bolded text) is incorrect because this is plain text, not the correct Markdown syntax for bold text, which should be ****This is bolded text**** or **__This is bolded text__**.

Option E (1. This is an ordered list) is incorrect as it does represent an ordered list item, but it was not the syntax format asked about in the question. The question specifically focuses on matching associated text with syntax, where only the comment option is correct.

NEW QUESTION # 47

Workflows can reference actions in:

(Each correct answer presents a complete solution. Choose three.)

- **A. Any public repository.**
- B. GitHub Packages.
- **C. A published Docker container image on Docker Hub.**
- D. An enterprise marketplace.
- **E. The same repository as your workflow file.**

Answer: A,C,E

Explanation:

In GitHub Actions workflows, actions can be referenced from various sources depending on the needs of the workflow.

Any Public Repository:

Option A is correct. Actions can be referenced from any public GitHub repository, allowing the reuse of shared actions across multiple projects.

The Same Repository as Your Workflow File:

Option B is correct. Actions stored in the same repository as the workflow file can be referenced directly, which is common for custom actions specific to that project.

A Published Docker Container Image on Docker Hub:

Option E is correct. Workflows can reference actions that are provided as Docker container images hosted on Docker Hub, allowing integration of complex tools and environments.

Incorrect Options:

Option C (GitHub Packages) is incorrect as it is more commonly used for storing and managing dependencies, not actions.

Option D (An enterprise marketplace) is incorrect because GitHub Actions are not directly referenced from an enterprise marketplace but rather from public repositories or Docker images.
