CompTIA Cloud+ (CV0-004) Certification Exam Sample Questions (Q29-Q34):

NEW QUESTION # 29

A company wants to create a few additional VDIs so support vendors and contractors have a secure method to access the company's cloud environment. When a cloud administrator attempts to create the additional instances in the new locations, the operation is successful in some locations but fails in others. Which of the following is the most likely reason for this failure?

- A. Service quotas
- B. Deprecation of functionality

- C. Regional service availability
- D. Partial service outages

Answer: A

Explanation:

If a cloud administrator can create additional instances in some locations but not others, the most likely reason for this failure is service quotas. Cloud providers often have quotas on the number of resources that can be created, and these limits can vary by region.

NEW QUESTION # 30

A security engineer recently discovered a vulnerability in the operating system of the company VMs. The operations team reviews the issue and decides all VMs need to be updated from version 3.4.0 to 3.4.1. Which of the following best describes the type of update that will be applied?

- A. Ephemeral
- B. Consistent
- C. Major
- D. Minor

Answer: D

Explanation:

The update from version 3.4.0 to 3.4.1 is considered a minor update, typically involving small bug fixes or security patches that do not include major feature changes or improvements. References: CompTIA Cloud+ Study Guide (Exam CV0-004) - Chapter on Systems Management

NEW QUESTION # 31

A cloud engineer wants to deploy a new application to the cloud and is writing the following script:

```
terraform {
  required_providers {
    cloud_provider1 = {
      source = "hashicorp/cloud_provider1"
      version = "~> 4.16"
    }
  }
  required_version = ">= 1.2.0"
}
provider "cloud_provider1" {
  region = "us-west-2"
}
resource "server_instance" "app_server" {
  ami = "ami-830c94e3"
  instance_type = "t2.micro"
  tags = {
    Name = "AppServerInstance"
  }
}
```

Which of the following actions will this script perform?

- A. Create a new cloud resource.
- B. Build a local server.
- C. Upload a new VM image.

- D. Import a cloud module.

Answer: A

Explanation:

The script shown is written in Terraform, which is an infrastructure as code (IaC) tool used for building, changing, and versioning infrastructure safely and efficiently. This particular Terraform script specifies a required provider and its version, the Terraform version, sets the cloud provider's region, and then defines a resource for a server instance with a specific AMI ID and instance type. It also includes tags for the instance.

The action this script will perform is to create a new cloud resource, specifically a server instance on the cloud provider's platform.

NEW QUESTION # 32

An organization needs to retain its data for compliance reasons but only when required. Which of the following would be the most cost-effective type of tiered storage?

- A. Hot
- B. Cold
- C. Archive
- D. Warm

Answer: C

Explanation:

Archive storage is the most cost-effective type of tiered storage for retaining data that is infrequently accessed and only when required for compliance reasons. It is designed for long-term storage and offers lower storage costs compared to hot, cold, or warm storage tiers. References: Understanding data storage and the various tiers, including archival storage, is part of cloud storage strategies covered in the CompTIA Cloud+ certification.

NEW QUESTION # 33

A cloud security analyst is looking for existing security vulnerabilities on software applications. Which of the following describes this vulnerability management phase?

- A. identification
- B. Report
- C. Analyze
- D. Remediation

Answer: A

Explanation:

The phase of vulnerability management that involves looking for existing security vulnerabilities on software applications is known as 'Identification'. This step precedes analysis, reporting, and remediation, focusing on discovering known and unknown vulnerabilities within the system or software to assess the security posture effectively.

NEW QUESTION # 34

.....
