## Desktop C-ACDET-2506 Practice Test Software - Get SAP Actual Exam Environment

Reliable SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite C-ACDET-2506 Dumps Questions and dumps ebook make your career more successful. SAP provides updated, free reliable SAP Certified Associate - Configuring SAP Ariba

Strategic Sourcing Suite dumps free download. And the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite price is affordable. With 365 days updates. It works with all operating systems like Linux, Windows, Android, Mac, and IOS, etc.

## SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q56-Q61):

### NEW QUESTION # 56

Which syntax is used for writing custom Validity Conditions?

- A. Regular expression
- B. Python
- C. XML
- **D. Scheme**

**Answer: D**

### NEW QUESTION # 57

Users are able to publish a contract workspace without populating the Supplier field. What action can be performed on the Supplier field to force population before publishing?

- A. Configure a validity condition
- **B. Enable Require value before publish**
- C. Enable Required
- D. Configure a visibility condition

**Answer: B**

Explanation:

SAP Ariba provides a specific property in the Advanced tab called "Require value before publish", which ensures that a field must be populated prior to the contract workspace being published. Enabling this option on the Supplier field enforces this mandatory behavior during the publish action. The standard "Required" checkbox only enforces field completion in the UI during data entry but does not prevent publishing if the field is empty. Visibility conditions control whether the field is displayed, not whether it is required at publish. Validity conditions enforce value correctness but not presence at publish time. This feature enhances data completeness at critical lifecycle points.

### NEW QUESTION # 58

Which of the following accurately describes the migration of flex master data templates using the migration tool?

- **A. The templates are migrated by the tool, but the data must be loaded manually later.**
- B. Both the templates and their data are fully migrated by the tool.
- C. Neither the templates nor the data is migrated using the tool.
- D. Only the data of the flex master data templates is migrated; templates must be created manually.

**Answer: A**

Explanation:

In SAP Ariba, the migration tool (Intelligent Configuration Manager - ICM) migrates flex master data templates (the structure and definitions), but it does not migrate the actual master data records. The master data itself must be manually exported from the source and imported into the target environment after templates are migrated. This separation helps ensure data integrity and allows for more controlled migration processes.

### NEW QUESTION # 59

Which data elements are shared in a Suite-Integrated Environment? (Select 3 correct answers)

- A. Supplier Catalogs
- **B. Suppliers**

- C. User Group mapping
- D. Exception Types
- E. Users

**Answer: B,C,E**

Explanation:

In a Suite-Integrated SAP Ariba environment, master data elements such as Suppliers, Users, and User Group mappings are shared across sourcing and procurement modules, enabling unified access and data consistency. Supplier Catalogs and Exception Types are not typically shared master data in this context. This integration supports seamless workflows and consistent security roles, enhancing usability and governance.

#### NEW QUESTION # 60

When you have created a new custom field and marked it as reportable, saved and published your changes, but the field does not show up in reports. How can you resolve the issue?

- A. Wait 2 hours for the schema to refresh automatically.
- B. You did not assign the custom field to the appropriate report category.
- C. Custom fields must be created in the same module where reports are generated.
- D. Run the "Retrieve flexible fields metadata for reporting" task under Reporting Manager.

**Answer: D**

Explanation:

After publishing a custom reportable field, the "Retrieve flexible fields metadata for reporting" task must be run to update the reporting schema with the new field metadata. Without this manual step, the reports do not recognize the new field despite it being published. The system does not perform automatic timed refreshes of the schema. Module location or report category assignment is not a prerequisite for report visibility in SAP Ariba's analytics.

#### NEW QUESTION # 61

.....

We want to provide our customers with different versions of C-ACDET-2506 test guides to suit their needs in order to learn more efficiently. Our C-ACDET-2506 qualification test can help you make full use of the time and resources to absorb knowledge and information. If you are accustomed to using the printed version of the material, we have a PDF version of the C-ACDET-2506 study tool for you to download and print, so that you can view the learning materials as long as you have free time. If you choose to study online, we have an assessment system that will make an assessment based on your learning of the C-ACDET-2506 qualification test to help you identify weaknesses so that you can understand your own defects of knowledge and develop a dedicated learning plan. Moreover our C-ACDET-2506 test guides provide customers with supplement service-mock test, which can totally inspire them to study hard and check for defects during their learning process. Our commitment is not frank, as long as you choose our C-ACDET-2506 study tool you will truly appreciate the benefits of our products.
