Salesforce Certified Advanced Administrator Sample Questions (Q67-Q72):

NEW QUESTION # 67

An administrator has created a flow that sends platform events whenever an opportunity is updated. An Apex developer has been tasked to write code that listens for these events. When reviewing the debug logs for a user, the developer can see that the flow ran, but the debug Information is missing.

What should the administrator recommend to assist with debugging?

- **A. Set a debug log on the Automated Process entity.**
- B. Select the Debug Enabled checkbox on platform events,
- C. Search the AppExchange to find a tool that assists with debugging.
- D. Platform events are unavailable for debugging.

Answer: A

NEW QUESTION # 68

A user started to work remotely. They are having an issue logging in. What could be the issue?

- A. They are signing in from a mobile device.
- **B. The user is not in the IP range for their profile.**
- C. The login session has expired for this user.
- D. The time zone for the profile is outside of login hours.

Answer: B

Explanation:

Explanation

IP ranges are settings that restrict login access to Salesforce from specific IP addresses. Administrators can set IP ranges at the org level or at the profile level. If a user tries to log in from an IP address that is outside the allowed range for their profile or their org, they will not be able to access Salesforce. Therefore, if a user started to work remotely and is having an issue logging in, it could be because they are not in the IP range for their profile or their org. References:

NEW QUESTION # 69

A sales user is assigned to a permission set group that gives them Modify All access to Accounts. An administrator assigns the same user to a muting permission set that mutes Deletes access on Account.

What level of access will the sales user have on the Account object?

- **A. Read, Create, and Edit**
- B. Read-only
- C. Modify All
- D. No Access

Answer: A

NEW QUESTION # 70

An administrator created a new custom object. When trying to upload new records to the custom object using Data Loader, they are unable to see the new custom object in the list of available objects.

What should the administrator do to resolve the issue?

- A. Check the Field-Level Security of the new custom object's Name field.
- B. Ensure Allow Sharing is checked on the custom object.
- C. Assign a permission set to give them access to the new object.
- **D. Confirm the object is marked as deployed and not in development.**

Answer: D

Explanation:

When creating a new custom object, administrators can choose to mark it as deployed or in development. If an object is marked as in development, it is not visible to users or available in tools such as Data Loader, even if they have access to it through their profile.

or permission set. To make the object available for data import, the administrator needs to mark it as deployed. References:

NEW QUESTION # 71

Sales managers at Ursa Major Solar have asked for some additional automation around opportunity reminders. If the opportunity is in the Proposal stage a week before the close date, they want an email sent to the opportunity owner and manager. If the Budget Approved custom field is checked, the managers want to be notified immediately. How should these requirements be met without using code?

- **A. Create a record-triggered flow with scheduled paths. Configure the trigger to flow after the record is saved.**
- B. Create a schedule-triggered flow for the Opportunity object. Configure the trigger to flow daily.
- C. Create a record-triggered flow with scheduled paths. Configure the trigger to flow before the record is saved.
- D. Create a schedule-triggered flow. Configure the trigger to flow weekly.

Answer: A

Explanation:

Explanation

A record-triggered flow lets you automate actions when a record is created or updated. You can use scheduled paths to schedule actions relative to a date field on the record, such as close date. You should configure the trigger to flow after the record is saved so that you can access the updated field values. References:
