

# Test C-ADBTP-2601 Objectives Pdf | C-ADBTP-2601 Top Exam Dumps

After a series of investigations and studies, we found that those students who wish to pass the C-ADBTP-2601 exam through their own in-depth study of the textbooks are often slack in their learning. Some students may even feel headaches when they read the content that difficult to understand in the textbooks. Our C-ADBTP-2601 Study Materials are excellent examination review products composed by senior industry experts that focuses on researching the mock examination products which simulate the real C-ADBTP-2601 test environment. And you will be more confident to pass the C-ADBTP-2601 exam.

We strongly advise you to buy our windows software of the C-ADBTP-2601 study materials, which can simulate the real test environment. There is no doubt that you will never feel bored on learning our C-ADBTP-2601 practice materials because of the smooth operation. You will find that learning is becoming interesting and easy. During the operation of the C-ADBTP-2601 Study Materials on your computers, the running systems of the C-ADBTP-2601 study guide will be flexible, which saves you a lot of troubles and help you concentrate on study.

## C-ADBTP-2601 Top Exam Dumps, Test C-ADBTP-2601 Pdf

We believe that our test-orientated high-quality C-ADBTP-2601 exam questions would be the best choice for you, we sincerely hope all of our candidates can pass C-ADBTP-2601 exam, and enjoy the tremendous benefits of our C-ADBTP-2601 prep guide. The pass rate of our C-ADBTP-2601 exam questions is as high as 99% to 100%. Helping candidates to pass the C-ADBTP-2601 Exam has always been a virtue in our company's culture, and you can connect with us through email at the process of purchasing and using, we would reply you as fast as we can.

### SAP Administrating SAP Business Technology Platform(C\_ADBTP\_2601) Sample Questions (Q10-Q15):

#### NEW QUESTION # 10

##### SIMULATION

##### Enable Service Subscriptions

In the entitlements of a directory, add a service plan for a service subscription. Assign and create this subscription to/in a subaccount of the directory.

##### Task 1: Entitle a Service in a Directory

In your SAP BTP cockpit, enable entitlement management for your Partner directory.

In your Partner directory, entitle the standard (Application) service plan for the SAP Build Work Zone, standard edition.

#### Answer:

##### Explanation:

See the Explanation below for complete solution.

##### Explanation:

##### Before You Start

Log in to the SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open the Partner directory.

##### Why this matters:

Both actions in this task must be done at the Partner directory level, not directly in a subaccount.

##### Step 1 - Open the Partner Directory

##### What to do

In the left navigation, click Directories.

Select Partner.

##### Explanation:

This opens the directory where you must manage entitlements for this task.

##### What to verify

You should now be inside the Partner directory page.

##### Step 2 - Open Entitlements

##### What to do

Inside the Partner directory, go to Entitlements.

##### Explanation:

This is the area where you manage quota and service plan assignments for the directory and its subaccounts.

##### What to verify

You should see the entitlements page for Partner.

##### Step 3 - Enable Entitlement Management for the Partner Directory

##### What to do

In the Entitlements area, look for the option to Enable Entitlement Management.

Click Enable.

##### Explanation:

A directory must have entitlement management enabled before you can add and manage service plans there.

##### What to verify

After enabling, the Partner directory should allow entitlement assignment and management.

##### Step 4 - Start Adding a Service Plan

##### What to do

In the Entitlements page of the Partner directory, click Configure Entitlements or Add Service Plans.

□ Explanation:

This opens the service catalog where you can select the service and plan to add.

What to verify

You should see the list of available services and plans.

□ Step 5 - Find the Required Service

What to do

Search for or scroll to:

SAP Build Work Zone, standard edition

Select that service.

Explanation:

You must choose the exact service named in the task. Be careful not to select a different SAP Build service by mistake.

What to verify

The selected service should be:

SAP Build Work Zone, standard edition

□ Step 6 - Select the Correct Service Plan

What to do

Under the selected service, choose the service plan:

standard (Application)

Add the plan to the entitlement configuration.

Explanation:

This task requires the standard (Application) service plan specifically.

Do not choose another plan if more than one is listed.

What to verify

The selected plan should read exactly:

standard (Application)

□ Step 7 - Save the Entitlement Changes

What to do

Click Add, Save, or Confirm depending on the screen.

Then click Save for the entitlement configuration.

Explanation:

This commits the new service plan entitlement to the Partner directory.

What to verify

After saving, the entitlements list for Partner should include:

SAP Build Work Zone, standard edition

plan: standard (Application)

□ Final Expected Result for Task 1

Inside the Partner directory:

Entitlement management is enabled

The service SAP Build Work Zone, standard edition is entitled

The plan standard (Application) is added

Common Mistakes to Avoid

1. Working in the wrong level

Do this in:

Partner directory

Not in:

Global Account

Subaccount

Another directory

2. Forgetting to enable entitlement management first

If entitlement management is not enabled for the directory, you may not be able to add the service plan properly.

3. Choosing the wrong service

Be sure you select:

SAP Build Work Zone, standard edition

Not another SAP Build service.

4. Choosing the wrong plan

You must select:

standard (Application)

## NEW QUESTION # 11

### SIMULATION

Establish Shared Services

Task 1: Create a Shared Services Directory and Subaccounts

In your SAP BTP cockpit, create the directory Shared Services (Description: Shared Accounts) with your global account as the parent.

In the Shared Services directory, create the subaccount SH Dev (Description: Shared Services Development) with subdomain btpops#####-sh-dev in the region Amazon Web Services (AWS) → Europe (Frankfurt) cf-eu10.

In the Shared Services directory, create the subaccount SH Ops (Description: Shared Services Operations) with subdomain btpops#####-sh-ops in the region Amazon Web Services (AWS) → Europe (Frankfurt) cf-eu10.

### Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before You Start

Log in to the SAP BTP Cockpit.

Open the correct Global Account.

Make sure you are working in the correct global account before creating anything.

Why this matters:

The new directory and both subaccounts must be created inside the correct global account hierarchy.

Part A - Create the Shared Services Directory

Step 1 - Open Directories

What to do

In the SAP BTP Cockpit, open your Global Account.

In the left navigation menu, click Directories.

□ Explanation:

This is where you create and manage directory structures under the global account.

What to verify

You should now see the list of existing directories.

Step 2 - Create the Directory Shared Services

What to do

Click Create or Create Directory.

Enter the following values:

Name: Shared Services

Description: Shared Accounts

Parent: your Global Account

Click Create.

□ Explanation:

This creates a new top-level directory directly under the global account.

It will be used to hold the shared-services subaccounts.

What to verify

You should now see:

Shared Services

under the global account.

Part B - Create the SH Dev Subaccount

Step 3 - Open the Shared Services Directory

What to do

In the directory list, select Shared Services.

Explanation:

Both required subaccounts must be created inside this directory.

What to verify

You should now be inside the Shared Services directory.

Step 4 - Open Subaccounts

What to do

Inside Shared Services, open Subaccounts.

Click Create → Subaccount.

Explanation:

This opens the subaccount creation screen.

Step 5 - Create SH Dev

What to do

Enter the following:

Display Name / Name: SH Dev

Description: Shared Services Development

Subdomain: btpops####-sh-dev

Set the region as:

Cloud Provider: Amazon Web Services (AWS)

Region: Europe (Frankfurt)

Technical Region / Environment: cf-eu10

Then click Create.

Explanation:

This creates the shared services development subaccount in the required AWS Frankfurt region.

What to verify

After creation, you should see:

SH Dev

inside the Shared Services directory.

Part C - Create the SH Ops Subaccount

Step 6 - Start a New Subaccount

What to do

Still inside Shared Services, click Create → Subaccount again.

Explanation:

This opens the form for the second required subaccount.

Step 7 - Create SH Ops

What to do

Enter the following:

Display Name / Name: SH Ops

Description: Shared Services Operations

Subdomain: btpops####-sh-ops

Set the region as:

Cloud Provider: Amazon Web Services (AWS)

Region: Europe (Frankfurt)

Technical Region / Environment: cf-eu10

Then click Create.

Explanation:

This creates the shared services operations subaccount in the same required region.

What to verify

After creation, you should see:

SH Ops

inside the Shared Services directory.

Final Expected Result for Task 1

You should now have:

Directory

Shared Services

Description: Shared Accounts

Parent: Global Account

Subaccounts inside Shared Services

SH Dev

Description: Shared Services Development

Subdomain: btpops####-sh-dev

Region: AWS → Europe (Frankfurt) cf-eu10

SH Ops

Description: Shared Services Operations

Subdomain: btpops####-sh-ops

Region: AWS → Europe (Frankfurt) cf-eu10

Common Mistakes to Avoid

1. Creating the directory in the wrong place

Shared Services must be created with:

parent = Global Account

2. Creating the subaccounts outside the directory

Both subaccounts must be created inside:

Shared Services

3. Wrong subdomain values

Use exactly:

btpops####-sh-dev

btpops####-sh-ops

Only replace #### with your global account number.

4. Wrong region

Both subaccounts must use:

Amazon Web Services (AWS)

Europe (Frankfurt)

cf-eu10

5. Mixing up SH Dev and SH Ops

Be careful:

SH Dev = Shared Services Development

SH Ops = Shared Services Operations

## NEW QUESTION # 12

### SIMULATION

Create a Service Instance in Cloud Foundry

Enable a service instance of the HTML5 Application Repository Service for Cloud Foundry.

Create a Service Instance in a Cloud Foundry Environment

In your SAP BTP cockpit, in the EU HCM Dev subaccount, create the service instance html5-eu-hcm-dev for the HTML5 Application Repository Service with the service plan app-host in the Cloud Foundry space activity-recording

### Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open Human Resources.

Open the EU HCM Dev subaccount.

This matters because the task must be completed in EU HCM Dev, and the service instance must be created in the specific Cloud Foundry space activity-recording. SAP Help also confirms that the HTML5 Application Repository is used in the Cloud Foundry environment and that the app-host plan is the host service used to store HTML5 application content.

Step 1 - Open the Cloud Foundry space

In EU HCM Dev, go to:

Cloud Foundry

Spaces

Select the space:

activity-recording

SAP Help describes creating Cloud Foundry service instances by first navigating to the subaccount, opening Cloud Foundry Spaces, selecting the target space, and then using that space's Services > Service Instances area.

Step 2 - Open Service Instances in the space

Inside the activity-recording space, go to:

Services

Service Instances

This is the Cloud Foundry-space-level location used for creating service instances in that space.

Step 3 - Start creating the new instance

Click Create.

□ A wizard opens for the new service instance. SAP Help describes this as the standard cockpit flow for creating service instances in Cloud Foundry spaces.

Step 4 - Choose the required service

In the service selection, choose:

HTML5 Application Repository Service

SAP Help documents the HTML5 Application Repository as the service used for centrally storing HTML5 applications' static

content on SAP BTP in the Cloud Foundry environment.

Step 5 - Choose the required service plan

Select the service plan:

app-host

SAP Help states that the app-host service plan is used to deploy applications to the HTML5 Application Repository.

Step 6 - Enter the instance name

Set the service instance name to:

html5-eu-hcm-dev

Then continue and confirm creation.

SAP Help recommends using a CLI-friendly name for service instances, and the task gives the exact required name.

Step 7 - Verify the space is correct

Before final confirmation, verify the target Cloud Foundry space is:

activity-recording

This is important because Cloud Foundry service instances are created within a specific space, not only at the subaccount level.

Step 8 - Create and confirm

Click Create or Finish.

Wait for the status to change from in-progress to created.

SAP Help notes that after creation, the instance appears in the service instances table and its status can be checked there.

Final expected result

Inside EU HCM Dev, in Cloud Foundry space activity-recording, you should have a service instance with:

Service: HTML5 Application Repository Service

Plan: app-host

Instance Name: html5-eu-hcm-dev

Common mistakes to avoid

Creating the instance in the wrong subaccount; it must be EU HCM Dev.

Creating it in the wrong Cloud Foundry space; it must be activity-recording.

Choosing the wrong service; use HTML5 Application Repository Service.

Choosing the wrong plan; use app-host. SAP Help specifically links app-host with hosting deployed HTML5 app content.

Typing the wrong instance name; use exactly html5-eu-hcm-dev.

## NEW QUESTION # 13

### SIMULATION

Enable a Cloud Foundry Environment

Add a service plan for Cloud Foundry environment and enable it in a subaccount.

Task 1: Add a Service Plan for Cloud Foundry Environment

In your SAP BTP cockpit, in your EU HCM Dev subaccount, entitle one MEMORY service plan for the Cloud Foundry Runtime.

### Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open your correct Global Account.

Go to the Human Resources directory.

Open the EU HCM Dev subaccount.

This matters because the runtime memory quota must be assigned to the EU HCM Dev subaccount specifically. SAP documents that the MEMORY plan is the quota-bearing plan for Cloud Foundry Runtime.

Step 1 - Open the EU HCM Dev subaccount

In the cockpit, choose Directories.

Open Human Resources.

Select EU HCM Dev.

You should now be on the EU HCM Dev subaccount page.

Step 2 - Open Entitlements

In EU HCM Dev, choose Entitlements.

SAP Help confirms that service plans and quota assignments for a subaccount are configured in the Entitlements area.

Step 3 - Configure entitlements

Click Configure Entitlements or Add Service Plans.

Search for:

Cloud Foundry Runtime

In SAP Help, this appears as Cloud Foundry Runtime (APPLICATION\_RUNTIME), and the relevant plan for assigning runtime memory is MEMORY.

Step 4 - Select the MEMORY plan

Under Cloud Foundry Runtime, select:

MEMORY

Set the quantity to 1 if the cockpit shows an amount/quota field.

Add the plan to the subaccount.

Save the entitlement changes.

SAP documents that the MEMORY plan is specifically used to assign runtime memory quota to the subaccount, and that 1 unit corresponds to 1 GB of runtime memory when quota is adjusted or assigned.

Step 5 - Verify the result

After saving, check the Entitlements page of EU HCM Dev.

You should see:

Cloud Foundry Runtime

plan: MEMORY

quantity: 1 if shown

Final expected result

Inside EU HCM Dev:

Cloud Foundry Runtime is entitled

the service plan is MEMORY

the assigned amount is 1 if the cockpit displays quantity/quota units

Common mistakes to avoid

Doing this in the wrong subaccount; it must be EU HCM Dev

Choosing the wrong Cloud Foundry plan; the task asks for MEMORY

Forgetting to save the entitlement change after adding the plan

Confusing the runtime memory entitlement with the later step of actually enabling the Cloud Foundry environment; SAP distinguishes the MEMORY runtime quota from enabling the Cloud Foundry org itself.

## NEW QUESTION # 14

.....

What we provide for you is the latest and comprehensive C-ADBTP-2601 exam dumps, the safest purchase guarantee and the immediate update of C-ADBTP-2601 exam software. Free demo download can make you be rest assured to buy; one-year free update of C-ADBTP-2601 Exam software after payment can assure you during your preparation for the exam. What's more, what make you be rest assured most is that we develop the exam software which will help more candidates get C-ADBTP-2601 exam certification.

**C-ADBTP-2601 Top Exam Dumps:** <https://www.passsureexam.com/C-ADBTP-2601-pass4sure-exam-dumps.html>

The price of C-ADBTP-2601 exam materials is quite reasonable, you can afford it no matter you are students or the employees in the company, SAP Test C-ADBTP-2601 Objectives Pdf Don't be eased and lazy when you have to struggle with the most hard-working age, If you want to purchase safe & reliable C-ADBTP-2601 prep for sure torrent materials, our products will be the best option for you, So it is very important for a lot of people to gain the C-ADBTP-2601 certification.

Despite what Human Resource folks might think, you will not be able C-ADBTP-2601 to excel in all these sectors, If you live in a very formal and proper community, you probably need to wear a business suit.

## Valid C-ADBTP-2601 exam training material & cost-effective C-ADBTP-2601 PDF files

The price of C-ADBTP-2601 Exam Materials is quite reasonable, you can afford it no matter you are students or the employees in the company, Don't be eased and lazy when you have to struggle with the most hard-working age.

If you want to purchase safe & reliable C-ADBTP-2601 prep for sure torrent materials, our products will be the best option for you, So it is very important for a lot of people to gain the C-ADBTP-2601 certification.
