## Valid AD0-E117 Exam Online, Reliable AD0-E117 Dumps Book

You can run the Adobe Experience Manager Architect Master AD0-E117 PDF Questions file on any device laptop, smartphone or tablet, etc. You just need to memorize all AD0-E117 exam questions in the pdf dumps file. Adobe AD0-E117 practice test

software (Web-based and desktop) is specifically useful to attempt the AD0-E117 Practice Exam. It has been a proven strategy to pass professional exams like the Adobe AD0-E117 exam in the last few years. Adobe Experience Manager Architect Master AD0-E117 practice test software is an excellent way to engage candidates in practice.

## Adobe Experience Manager Architect Master Sample Questions (Q59-Q64):

### NEW QUESTION # 59

An AEM architect is planning to move the existing content from an AEM 6.5 instance to an AEM as a Cloud Service instance using the Content Transfer Tool. The architect is going to run the offline compaction on AEM 6.5 for migration purposes. What two actions would the architect take before starting the migration? (Choose two.)

- A. Ensure source AEM instance has free disk space of minimum 1.5x the JCR size
- B. Enable Wipe mode on AEM as cloud repository
- C. Ensure destination AEM instance has free disk space of minimum 1.5x the JCR size
- D. Disable Wipe mode on AEM as cloud repository

Answer: A,D

### NEW QUESTION # 60

A customer is migrating from their On-Premises AEM 6.4 instances to AEM as a Cloud Service. Next to the required code refactoring, a content migration of approximately 100,000 pages needs to be performed. The customer wants the content freeze period to be limited so that editors can continue to do content actions as long as possible. Which two recommendations should the Architect make for the migration of the content pages? (Choose two.)

- A. Migrate the content using Lazy Content Migration approach
- B. Migrate content deltas using a query-based packaging tool
- C. Ensure sufficient storage space on the On-Premise AEM instance
- D. Upscale the memory of the On-Premise AEM instance
- E. Migrate the content using the Content Transfer Tool

Answer: C,D

### NEW QUESTION # 61

A customer wants to migrate their AEM environment from an on-premise infrastructure to a public cloud to improve performance. The customer currently hosts many assets (images, videos, documents) in the DAM. Approximately 10 business users frequently upload new assets and update existing assets. Editors then use these assets on the sites. What should an Architect do as part of this migration?

- A. Set up Connected Assets to share the DAM assets in the sites
- B. Move to a shared datastore and enable binary less replication
- C. Set up a horizontally scalable AEM environment on MongoDB
- D. Run online revision cleanup before moving to the new storage format

Answer: D

Explanation:

"running online revision cleanup before moving to the new storage format can reduce the size of the repository and improve performance".

### NEW QUESTION # 62

A client publishes content by a tree activation, which frequently invalidates the page cache in short succession. This causes the visitors to almost always hit an empty cache. The implementation uses a .stat file for invalidation. The client wants to delay the invalidation of cached pages while the publishing is in progress, so that the cached files are served until the invalidation completes. Which AEM dispatcher's feature can the architect propose to delay cache invalidation?

- A. Set the Dispatcher to use /gracePeriod property of dispatcher.any for auto-invalidation

- B. Set the Dispatcher to adjust /statfileslevel property of dispatcher.any
- C. Set the Dispatcher to use /invalidate property of dispatcher.any for auto-invalidation
- D. Use ServeStaleOnError dispatcher configuration to render the cache in case of error

**Answer: A**

### NEW QUESTION # 63

AEM Site users report that the web content pages render very slowly. An Architect notices that the CPU usages of the AEM Publish instances are spiking and reviews the following entry in the log:  
[Frt Nov 27 23:11:00 2019] [I] [pid 16004 (tid 140134145820416)] Current cache hit ratio: 47.94 % What should the Architect do to increase the dispatcher cache ratio and prevent the AEM Publish CPU usage spikes?

- A. Add additional AEM instances to the Publish Farm
- B. Create a cron job that will delete the dispatcher cache on a regular basis
- C. Add additional dispatcher servers
- **D. Review and optimize the Dispatcher cache configuration**

**Answer: D**

Explanation:

According to Adobe Experience Manager documentation<sup>5</sup>, dispatcher is a caching and load balancing tool that can be used to improve performance and security of AEM sites. Dispatcher cache configuration can be adjusted using various properties in the dispatcher.any file<sup>6</sup>. Creating a cron job that will delete the dispatcher cache on a regular basis is not a good idea as it will reduce the cache hit ratio and increase the load on AEM servers.

### NEW QUESTION # 64
