# NSE4_FGT_AD-7.6 Valid Test Online, Reliable NSE4_FGT_AD-7.6 Test Sims

Are you still staying up for the NSE4_FGT_AD-7.6 exam day and night? If your answer is yes, then you may wish to try our NSE4_FGT_AD-7.6 exam materials. We are professional not only on the content that contains the most accurate and useful information, but also on the after-sales services that provide the quickest and most efficient assistants. With our NSE4_FGT_AD-7.6 practice torrent for 20 to 30 hours, we can claim that you are ready to take part in your NSE4_FGT_AD-7.6 exam and will achieve your expected scores.

The language in our NSE4_FGT_AD-7.6 test guide is easy to understand that will make any learner without any learning disabilities, whether you are a student or a in-service staff, whether you are a novice or an experienced staff who has abundant experience for many years. Our NSE4_FGT_AD-7.6 Exam Questions are applicable for everyone in all walks of life which is not depends on your educated level. Therefore, it should be a great wonderful idea to choose our NSE4_FGT_AD-7.6 guide torrent for sailing through the difficult test and pass it.

How to Prepare For NSE4_FGT_AD-7.6 Fortinet NSE 4 - FortiOS 7.6 Administrator?

We are equipped with a team of IT elites who have a good knowledge of IT field and do lots of study in Fortinet certification exam. All dumps free of Pass4guide are creating based on the actual test. Our colleagues check the updating of NSE4_FGT_AD-7.6 Test Questions everyday to make sure that all answers are latest and valid. Our NSE4_FGT_AD-7.6 test study material contains valid top questions and detailed exam answers.

Fortinet NSE4_FGT_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	• Routing: This domain covers configuring static routes for packet forwarding and implementing SD-WAN to load balance traffic across multiple WAN links.
Topic 2	• Firewall Policies and Authentication: This domain focuses on creating firewall policies, configuring SNAT and DNAT for address translation, implementing various authentication methods, and deploying FSSO for user identification.
Topic 3	• Content Inspection: This domain addresses inspecting encrypted traffic using certificates, understanding inspection modes and web filtering, configuring application control, deploying antivirus scanning modes, and implementing IPS for threat protection.
Topic 4	• Deployment and System Configuration: This domain covers initial FortiGate setup, logging configuration and troubleshooting, FGCP HA cluster configuration, resource and connectivity diagnostics, FortiGate cloud deployments (CNF and VM), and FortiSASE administration with user onboarding.
Topic 5	• VPN: This domain focuses on implementing meshed or partially redundant IPsec VPN topologies for secure connections.

Fortinet NSE 4 - FortiOS 7.6 Administrator Sample Questions (Q67-Q72):

NEW QUESTION # 67
An administrator configures FortiGuard servers as DNS servers on FortiGate using default settings.
What is true about the DNS connection to a FortiGuard server?

- A. It uses UDP 53.
- B. It uses UDP 8888.
- C. It uses DNS over TLS.
- D. It uses DNS over HTTPS.

Answer: C

Explanation:
When using FortiGuard servers for DNS, FortiOS uses DNS over TLS (DoT) by default to secure the DNS traffic. New FortiGuard DNS servers have been added as primary and secondary servers.

NEW QUESTION # 68
Refer to the exhibit. The administrator configured SD-WAN rules and set the FortiGate traffic log page to display SD-WAN-specific columns: SD-WAN Quality and SD- WAN Rule Name.
FortiGate allows the traffic according to policy ID 1 placed at the top. This is the policy that allows SD-WAN traffic. Despite these settings, the traffic logs do not show the name of the SD-WAN rule used to steer those traffic flows.
What could be the reason?

SD-WAN traffic log

Application Name ▼	Result	Policy ID	Destination Interface	SD-WAN Quality	SD-WAN Rule Name
▣ YouTube	✓ Accept (8.08 kB / 27...	1(DIA)	▣ port2		
▣ YouTube	✓ Accept (UTM Allowed)	1(DIA)	▣ port2		
f Facebook	✓ Accept (UTM Allowed)	1(DIA)	▣ port1		
f Facebook	✓ Accept (UTM Allowed)	1(DIA)	▣ port1		
f Facebook	✓ Accept (3.33 kB / 10...	1(DIA)	▣ port1		
▣ YouTube	✓ Accept (44.63 kB/ 3...	1(DIA)	▣ port2		
▣ CNN	✓ Accept (UTM Allowed)	1(DIA)	▣ port1		
▣ CNN	✓ Accept (UTM Allowed)	1(DIA)	▣ port2		
▣ CNN	✓ Accept (UTM Allowed)	1(DIA)	▣ port2		

- A. There is no application control profile applied to the firewall policy.
- B. SD-WAN rule names do not appear immediately. The administrator must refresh the page.
- C. Destinations in the SD-WAN rules are configured for each application, but feature visibility is not enabled.
- D. FortiGate load balanced the traffic according to the implicit SD-WAN rule.

Answer: D

Explanation:
Note that the ImplicitSD-WAN rule name does not appear in the SD-WAN Rule Name column.
When the traffic is steered according to this rule, the field remains empty.

NEW QUESTION # 69
Refer to the exhibit.

Firewall policies

ID	Name	From	To	Source	Destination	Schedule	Service	Action	IP Pool	NAT
▣ LAN to WAN ❶										
1	Full_Access	▣ LAN (port3)	▣ WAN (port1) ▣ WAN (port2)	🔲 all	🔲 all	🕓 always	🖵 ALL	✓ ACCEPT	⊕ IP Pool	✅ NAT
▣ WAN to LAN ❸										
2	Deny	▣ WAN (port1)	▣ LAN (port3)	🔲 Deny_IP	🔲 all	🕓 always	🖵 ALL	⊘ DENY		
3	Allow_access	▣ WAN (port1)	▣ LAN (port3)	🔲 all	🔲 Webserver	🕓 always	🖵 ALL	✓ ACCEPT		❌ Disabled
4	Webserver	▣ WAN (port1)	▣ LAN (port3)	🔲 all	🔲 Webserver	🕓 always	🖵 ALL	✓ ACCEPT		❌ Disabled
▣ Implicit ❶										
0	Implicit Deny	🔲 any	🔲 any	🔲 all	🔲 all	🕓 always	🖵 ALL	⊘ DENY		

Which statement about this firewall policy list is true?

- A. The firewall policies are listed by ingress and egress interfaces pairing view.
- B. LAN to WAN, WAN to LAN, and Implicit are sequence grouping view lists.
- C. The Implicit group can include more than one deny firewall policy.
- D. The firewall policies are listed by ID sequence view.

Answer: B

Explanation:
The firewall policy list shown is displayed in the sequence grouping view, where policies are grouped based on their traffic direction - such as LAN to WAN, WAN to LAN, and Implicit. This view helps administrators quickly identify and manage policies according to their interface pairings and logical traffic flow, rather than by numerical ID order.

NEW QUESTION # 70
A network administrator has configured an SSL/SSH inspection profile defined for full SSL inspection and set with a private CA certificate. The firewall policy that allows the traffic uses this profile for SSL inspection and performs web filtering. When visiting any HTTPS websites, the browser reports certificate warning errors.
What is the reason for the certificate warning errors?

- A. The SSL cipher compliance option is not enabled on the SSL inspection profile. This setting is required when the SSL inspection profile is defined with a private CA certificate.
- B. The certificate used by FortiGate for SSL inspection does not contain the required certificate extensions.
- C. With full SSL inspection it is not possible to avoid certificate warning errors at the browser level.
- D. The browser does not recognize the certificate in use as signed by a trusted CA.

Answer: D

Explanation:
The certificate warning errors occur because the SSL inspection profile is configured to use a private CA certificate that is not recognized by the browser as being signed by a trusted CA. For the browser to trust the FortiGate's re-signed certificates, the CA certificate used by FortiGate for SSL inspection must be installed in the browser's trusted certificate store. Until the browser recognizes the certificate authority (CA) as trusted, it will continue to display warning errors when accessing HTTPS websites.

NEW QUESTION # 71
Refer to the exhibit showing a FortiGuard connection debug output.

FortiGuard connection debug output

```
FortiGate # diagnose debug rating
Locale       : english

Service      : Web-filter
Status       : Enable
License      : Contract

Service      : Antispam
Status       : Disable

Service      : Virus Outbreak Prevention
Status       : Disable

Num. of servers : 1
Protocol        : https
Port            : 443
Anycast         : Enable
Default servers : Included

-=- Server List (Thu Jun  9 11:26:56 2022) -=-

IP              Weight  RTT Flags TZ  FortiGuard-requests  Curr Lost Total Lost Updated Time
173.243.141.16     -8   18   DI   0                    4            0           0 Thu Jun  9 11:26:24 2022
12.34.97.18        20   30        1                    1            0           0 Thu Jun  9 11:26:24 2022
210.7.96.18       160  305        9                    0            0           0 Thu Jun  9 11:26:24 2022
```

Based on the output, which two facts does the administrator know about the FortiGuard connection? (Choose two.)

- A. A local FortiManager is one of the servers FortiGate communicates with.
- B. One server was contacted to retrieve the contract information.
- C. There is at least one server that lost packets consecutively.
- D. FortiGate is using default FortiGuard communication settings.

Answer: B,D

Explanation:
The output shows that one server was contacted to retrieve FortiGuard contract information, as indicated under "Service : Web-filter" with "License : Contract" and "Num. of servers : 1." The entry "Default servers : Included" confirms that FortiGate is using the default FortiGuard communication settings, meaning it communicates directly with Fortinet's public FortiGuard servers instead of a custom or local override.
