

C-AIG-2412 practice questions & C-AIG-2412 latest torrent & C-AIG-2412 training material

P.S. Free 2026 SAP C-AIG-2412 dumps are available on Google Drive shared by ExamDiscuss: https://drive.google.com/open?id=113feUgT75gNIx_jnuf7uuVTAtxMdxLSb

We have a group of experts dedicated to the C-AIG-2412 exam questions for many years. And the questions and answers of our C-AIG-2412 practice materials are closely related with the real exam. Besides, they constantly keep the updating of products to ensure the accuracy of questions. All C-AIG-2412 Actual Exams are 100 percent assured. Besides, we price the C-AIG-2412 actual exam with reasonable fee without charging anything expensive.

SAP C-AIG-2412 Exam Syllabus Topics:

Topic	Details
Topic 1	• SAP AI Core: This section of the exam measures the skills of AI Developers and covers the fundamental components of SAP AI Core. Candidates are assessed on their ability to work with the core services that allow machine learning models to be deployed and managed within SAP environments. The focus is on understanding how AI Core fits into SAP's ecosystem and ensures smooth integration with enterprise applications.
Topic 2	• Advanced AI Techniques with SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers advanced techniques available through SAP's Generative AI Hub. Candidates are assessed on their ability to design, optimize, and scale generative AI solutions that go beyond basic implementations. The focus includes applying sophisticated strategies to integrate advanced models, manage performance, and align AI-driven outcomes with complex enterprise goals.
Topic 3	• Large Language Models (LLMs): This section of the exam measures the skills of AI Developers and covers the practical use of large language models in SAP environments. Candidates are expected to understand how LLMs can be applied to automate tasks, enhance decision-making, and improve user interaction within SAP systems. The exam evaluates knowledge of handling model selection, fine-tuning, and adapting LLMs to specific business cases.
Topic 4	• SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers SAP's Generative AI Hub, which acts as the central layer for designing and managing generative AI solutions. The exam tests knowledge of building, deploying, and connecting AI models to business scenarios through the Hub. Emphasis is placed on leveraging the Hub to streamline workflows and ensure scalable solutions that align with organizational needs.

Exam C-AIG-2412 Collection Pdf - C-AIG-2412 Test Lab Questions

For there are some problems with those still in the incubation period of strict control, thus to maintain the C-AIG-2412 quiz guide timely, let the user comfortable working in a better environment. You can completely trust the accuracy of our SAP C-AIG-2412 Exam Questions because we will full refund if you failed exam with our training materials.

SAP Certified Associate - SAP Generative AI Developer Sample Questions (Q21-Q26):

NEW QUESTION # 21

Where can you configure language models in generative AI hub?

- A. The Configuration tab of the SAP BTP cockpit
- B. The Orchestration tab in SAP AI Launchpad
- C. The Models tab in Prompt Editor
- **D. The Configuration tab within ML Operations in SAP AI Launchpad**

Answer: D

Explanation:

In SAP's Generative AI Hub, configuring language models is a crucial step for integrating AI capabilities into applications.

1. Accessing the Configuration Interface:

* ML Operations Section: Within SAP AI Launchpad, navigate to the ML Operations section to manage machine learning models and operations.

* Configuration Tab: In the Configuration tab, you can set up and manage various aspects of language models, including selecting model providers, specifying model versions, and configuring deployment settings.

2. Steps to Configure Language Models:

* Model Selection: Choose the desired language model from the available options, such as GPT-4 or other large language models (LLMs) provided through the Generative AI Hub.

* Parameter Configuration: Set parameters like model version, input constraints, and performance settings to tailor the model's behavior to your application's requirements.

* Deployment Setup: Configure deployment details to ensure the model is accessible and integrated appropriately within your application's infrastructure.

NEW QUESTION # 22

What are the applications of generative AI that go beyond traditional chatbot applications?

Note: There are 2 correct answers to this question.

- A. To follow a specific schema - human input, AI processing, and output for human consumption.
- **B. To interpret human instructions and control software systems always producing output for human consumption.**
- **C. To interpret human instructions and control software systems without necessarily producing output for human consumption.**
- D. To produce outputs based on software input.

Answer: B,C

NEW QUESTION # 23

What must be defined in an executable to train a machine learning model using SAP AI Core? Note: There are 2 correct answers to this question.

- **A. Pipeline containers to be used**
- **B. Infrastructure resources such as CPUs or GPUs**
- C. User scripts to manually execute pipeline steps
- D. Deployment templates for SAP AI Launchpad

Answer: A,B

NEW QUESTION # 24

What are some characteristics of the SAP generative AI hub? Note: There are 2 correct answers to this question.

- A. It ensures relevant, reliable, and responsible business AI.
- B. It operates independently of SAP's partners and ecosystem.
- C. It provides instant access to a wide range of large language models (LLMs).
- D. It only supports traditional machine learning models.

Answer: A,C

NEW QUESTION # 25

You want to assign urgency and sentiment categories to a large number of customer emails. You want to get a valid json string output for creating custom applications. You decide to develop a prompt for the same using generative AI hub.

What is the main purpose of the following code in this context?

```
prompt_test = ""Your task is to extract and categorize messages. Here are some examples:
```

```
{{?technique_examples}}
```

```
Use the examples when extract and categorize the following message:
```

```
{{?input}}
```

```
Extract and return a json with the following keys and values:
```

```
- "urgency" as one of {{?urgency}}
```

```
- "sentiment" as one of {{?sentiment}}
```

```
"categories" list of the best matching support category tags from: {{?categories}} Your complete message should be a valid json string that can be read directly and only contains the keys mentioned in t
```

```
import random
random.seed(42)
k = 3
examples = random
```

```
sample(dev_set, k)
example_template = ""<example> {example_input} examples
```

```
"\n--\n".join([example_template.format(example_input=example["message"], example_output=json.dumps(example["f_test =
```

```
partial(send_request, prompt=prompt_test, technique_examples=examples, **option_lists)
response =
```

```
f_test(input=mail["message"])
```

- A. Train a language model from scratch
- B. Preprocess a dataset for machine learning
- C. Generate random examples for language model training
- D. Evaluate the performance of a language model using few-shot learning

Answer: D

NEW QUESTION # 26

.....

By imparting the knowledge of the C-AIG-2412 exam to those ardent exam candidates who are eager to succeed like you, they treat it as responsibility to offer help. So please prepare to get striking progress if you can get our C-AIG-2412 Study Guide with following steps for your information. With our C-AIG-2412 learning materials for 20 to 30 hours, we can claim that you will be confident to go to write your C-AIG-2412 exam and pass it.
