# C_ACDET_2506 Reliable Exam Review - Latest C_ACDET_2506 Test Question

Windows computers support the desktop practice test software. ActualTorrent has a complete support team to fix issues of SAP C_ACDET_2506 practice test software users. ActualTorrent practice tests (desktop and web-based) produce score report at the end of each attempt. So, that users get awareness of their SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) preparation status and remove their mistakes.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 2	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 3	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Latest C_ACDET_2506 Test Question & C_ACDET_2506 Training Courses

The content of our C_ACDET_2506 quiz torrent is imbued with useful exam questions easily appear in the real condition. We are still moderately developing our latest C_ACDET_2506 exam torrent all the time to help you cope with difficulties. All exam candidates make overt progress after using our C_ACDET_2506 Quiz torrent. By devoting ourselves to providing high-quality practice materials to our customers all these years, we can guarantee all content are the essential part to practice and remember. Stop dithering and make up your mind at once, C_ACDET_2506 test prep will not let you down.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q23-Q28):

NEW QUESTION # 23
When you create a custom field, how do you define where the field is added?

- A. Each field can be linked to multiple screens, identified via UI GroupClass ID
- B. The field is added to a project header, identified by the templateClass ID
- C. The field is added to a class, identified by the record ID
- D. The field is added to a class, identified by a class name

Answer: D

Explanation:
In SAP Ariba, custom fields are associated with a specific class identified by its class name, such as ContractWorkspace or ProcureLineItem. This class-level association determines where the field is available within the application. When added to a parent class, the field inherits to all its subclasses, affecting all relevant data objects. The field is not linked via UI group IDs, project templates, or record IDs, which relate to different configuration aspects. This class-based design supports consistent data models and inheritance in SAP Ariba's architecture.

NEW QUESTION # 24
What is the key role of the SAP Deployment Lead assigned to the project?

- A. To advise the customer and partner in solution configurations
- B. To act as the liaison between the customer and SAP Support in resolving technical issues and manage customer escalations
- C. To perform configuration changes required to the SAP Ariba Strategic Sourcing suite solutions
- D. To test and validate the solution prior to go-live

Answer: B

Explanation:
The SAP Deployment Lead acts as the primary liaison between the customer and SAP Support, managing technical issues, escalations, and coordination during the deployment lifecycle. They oversee environment readiness, migration activities, and issue resolution. Advising on configurations is typically the Functional Lead's role, configuration changes are done by consultants, and testing is led by the customer or testing teams. The Deployment Lead focuses on technical project management and communication.

NEW QUESTION # 25
What is the recommended order off operations for creating a required Flex Master Data (FMD) type field in a project header?:

- A.
- B.
- C.
- D.

Answer: C

NEW QUESTION # 26

Which of the following data elements must be manually loaded into the Production environment after full configuration migration is completed using the Intelligent Configuration Manager (ICM)? (Select 2 correct answers)

- A. User to Group Mapping
- B. Relation and Relation Entries
- C. Units of Measure
- D. Enumerations

Answer: B,D

Explanation:

After migrating configurations using ICM,Enumerations and Relation entries require manual loading into Productionbecause they are not included in automatic migration bundles. Enumerations provide picklist values, while Relations define dependencies between fields. Units of Measure are typically part of standard configuration or migrated automatically. User to Group Mapping is managed separately through provisioning or identity management tools, not via ICM. Manual loading of these data elements ensures data integrity and avoids missing references.

NEW QUESTION # 27

If you add a custom field to the ConntractWorkspace class, which other class(es) will that field be added to?

- A. ContractRequest
- B. Internal ContractWorkspace and SalesContractWorkspace
- C. SalesContractRequest and InternalContractRequest
- D. AbstractContractWorkspace

Answer: B

NEW QUESTION # 28

......

But there are question is that how you can pass the C_ACDET_2506 exam and get a certificate. The best answer is to download and learn our C_ACDET_2506 quiz torrent. Our products will help you get what you want in a short time. You just need little time to download and install it after you purchase, then you just need spend about 20~30 hours to learn it.
