Salesforce Certified Sharing and Visibility Architect Sample Questions (Q32-Q37):

NEW QUESTION # 32
To grant Universal Containers sales managers access to shipment records properly it was necessarily to the IT Team is worried about improper access to records.
Which two features and best practices should a Salesforce architect recommended to mitigate the risk?

- A. Use runAs system method in test classes to test using different users and profiles.
- B. User isAccessable keyword Apex classes to assure recor visibility will be followed.
- C. USe isShareable keyword in Apex classes to assure record visibility will be followed
- D. Use with Sharing keyword in Apex classes to assure record visibility will be followed

Answer: A,D

Explanation:
Explanation
According to this source, the runAs system method in test classes can be used to test using different users and profiles, and the with sharing keyword in Apex classes can be used to enforce record visibility rules. The other options are not valid keywords in Apex

NEW QUESTION # 33
Universal Containers (UC) has implemented Customer Community with customer community plus licenses for their distributors.
Some distributors requested granting specific community users (agents) to view cases submitted by other agents of the same distributor.
Which feature only supports these requirements?

- A. Partner community admin.
- B. Permission set to grant community admin permission
- C. Delegate external user
- D. Partner super user

Answer: D

Explanation:
Explanation
Partner super user is the only feature that supports the requirement of granting specific community users (agents) to view cases submitted by other agents of the same distributor. Partner super users are community users who can access and edit data owned by other partner users in their account. They can also access reports and dashboards that display data from their account1. Permission set to grant community admin permission, delegate external user, and partner community admin are not features that can achieve the same result.

NEW QUESTION # 34
Universal Container has a set of Account management users that should only see accounts once the account becomes a customer.
The type field on the Account identifies whether the account is a prospect, customer, partner, or other. Which two methods could an Architect use to enable this sharing requirement, assuming a private sharing model for accounts? Choose two:

- A. Create a criteria-based sharing rule that shares the account to the account management group when the type is customer
- B. Institute a business process that calls for the account manager to be added to the account team once the account becomes a customer
- C. Create a public list view, where accounts of type customer are included and share the list view with account management public group
- D. Create an account sharing rule that shares all accounts owned by sales to be shared with account management roles and subordinates

Answer: A,B

NEW QUESTION # 35

Which users have access to Opportunity records owned by an external user, assuming no other changes to the sharing model have been implemented?

- A. The record owner and any user above the external user in the role hierarchy.
- B. The record owner and any user below the external user in the role hierarchy.
- C. The record owner only.
- D. The record owner and all internal users.

Answer: A

NEW QUESTION # 36

Sales manager at universal containers (UC) have requested viewing customer invoices in Salesforce. Invoice data is mastered in the ERP system. The architect at UC decided to surface the customer invoices in salesforce using external objects and did the following:
-Configured an external object called Invoice.
-Created a lookup relationship between account and the invoice.
How can the architect grant the sales managers access to the customer invoices data?

- A. By creating sharing rules to share the invoices records with users in sales mangers roles.
- B. By creating a sharing set to share invoices with users in sales manager role.
- C. By creating manual sharing to share invoices with relevant sales managers.
- D. By creating controlling the invoices object permission on the sales manager's profile.

Answer: D

NEW QUESTION # 37

......
