## UiAAAv1 Valid Exam Forum, UiAAAv1 Certification Dumps

Our UiAAAv1 exam prep boosts many merits and useful functions to make you to learn efficiently and easily. Our UiAAAv1 guide questions are compiled and approved elaborately by experienced professionals and experts. The download and tryout of our UiAAAv1 torrent question before the purchase are free and we provide free update and the discounts to the old client. Our customer service personnel are working on the whole day and can solve your doubts and questions at any time. so you can download, install and use our UiAAAv1 Guide Torrent quickly with ease.

## UiPath Agentic Automation Associate Sample Questions (Q43-Q48):

### NEW QUESTION # 43

Which tool should a Citrix Administrator use to monitor the overall daily performance of a Citrix Virtual Apps and Desktops Site?

- A. CDF Traces
- B. Citrix Director
- C. HDX Monitor
- D. Citrix Studio

**Answer: B**

Explanation:

Citrix Director is the monitoring and management tool designed for Citrix Virtual Apps and Desktops. It provides administrators with daily performance insights, including logon times, session usage, resource utilization, and alerts, making it the correct tool for overall site performance monitoring.

#### NEW QUESTION # 44

A Virtual Delivery Agent (VDA) is unable to register with the Delivery Controller. Which three factors could be causing this issue? (Choose three.)

- A. Improperly configured firewalls
- B. Citrix ICA service NOT running
- C. Incorrectly configured Citrix policy in Active Directory
- D. Incorrectly configured reverse DNS lookups in a forest
- E. Time differences between VDA-enabled machines and the Domain Controller

**Answer: A,B,E**

Explanation:

Improperly configured firewalls can block communication between the VDA and Delivery Controller.

Time differences greater than 5 minutes between the VDA and Domain Controller can prevent Kerberos authentication, leading to registration failure.

The Citrix ICA service (BrokerAgent) must be running for the VDA to register; if stopped, registration will fail.

#### NEW QUESTION # 45

Scenario: A Citrix Administrator is investigating an instability in the system that is causing the Print Spooler service to stop frequently on the Virtual Delivery Agent (VDA) machine. The administrator finds printer driver conflicts in the environment and needs to remove the problem drivers while still maintaining printing functionality. Which policy setting can the administrator use to resolve this issue on the VDA machine?

- A. Use only printer model specific drivers
- B. Automatic installation of in-box printer drivers
- C. Use universal printing only
- D. Auto-create all client printers

**Answer: C**

Explanation:

By enabling the "Use universal printing only" policy, the VDA will rely exclusively on the Citrix Universal Print Driver instead of loading multiple printer model-specific drivers. This resolves driver conflicts, stabilizes the Print Spooler service, and maintains printing functionality.

#### NEW QUESTION # 46

Scenario: A StoreFront store supports 150 users who have full access to all enterprise resources.

A Citrix Administrator needs to create a new StoreFront store for contractors who will work onsite for two months. The contractors need access to specific resources but will NOT be Active Directory users.

Which option should the administrator select while creating the store for contractors?

- A. HTTP Basic
- B. Unauthenticated
- C. Smart card
- D. Pass-through

**Answer: B**

#### NEW QUESTION # 47

What are three daily steps a Citrix Administrator should take to monitor a Citrix Virtual Apps and Desktops infrastructure? (Choose three.)

- A. Perform a capacity assessment.
- B. Test environment access.
- C. Check for warnings or alerts with Citrix Director.
- D. Review available Citrix software upgrades.
- E. Review Citrix policies.
